Mr. Harmon had besides, a copy of the New York Herald, dated April 15th, 1865, which contained the sad news of the assassination of president Lincoln, to the minutest detail. They are keepalikes which Mr. Harmon would not dispose of for anything.
—During the time that our institute which is now about to close has been in session, we have been a studious observer of the work which has been taken up and pursued during each session, and our conclusion is, that a teacher who through his or her indifference, neglects attending this Oasis of knowledge and thought, should in every instance be given secondary consideration, by the school board, for if a teacher wishes to keep in touch with the essential duties of their profession, and who does not—here, and no where else thus in the summer school or institute, can they alone obtain a portion of these well springs of knowledge which is imparted to all who attend. Our institute under the able management of Prof. Purviance, is a most successful one, as he ranks among the foremost educators in Nebraska, and our county teachers who have failed to attend, may never know how much they have missed. Much credit is due our county superintendent also for his untiring efforts to make the institute a pronounced success. Our teachers who are fortunate enough to be present during these two weeks, doubtless appreciate his work along this line.

under some trees and primped up a little and the first object that greeted my vision on arising from the bed, was the college building. The tea revived me and we were soon at Edward Kibbits, were very cordially received. They had been looking for us about two days. Soor, after we arrived our pastor called as, in passing he saw the prairie schooner and suspected who had arrived. We secured two rooms at once in "Grandpa Hocketts" house where we are quite at home. The old couple are just such wholesome people as I was surrounded by in my younger years, and it entirely banished any loneliness that was likely to steal over me in a land of strangers.
Of course we wanted to get the mail first, and oh how glad we were to get the home papers, three of them waiting for us. Neighbor Coffey will please accept our congratulations, over his nomination, and we wish him success. In our next we will try and give some idea of our impressions about this country. If the country is as agreeable, friendly, and sociable as its inhabitants, we cant help but feel at home here, when we get into our own house.
Mrs. F. W. KNORR.

What Imperialism Means.
"Imperialism," as defined and promoted by the Republican candidate for president and the party behind him, means a departure from the style of republican government, government by the people, established by the constitution. It means the creating of a large and costly standing army to maintain a government of colonies in far distant points of the globe, to be ruled by satraps who are stipendiaries of a centralized power which enriches its followers by the conferring of them of rich concessions at the expense of an overtaxed people.—Synagogue (N. Y.) Telegram.

Administration organs, throughout the country are now howling. Just because Bryan, in his speech of acceptance did not say enough to suit their fancy, about silver. Too bad! But the veil of hypocrisy under which these salaried serfs, would lure the thinking masses is too frail, and the very slightest breath of truth tears it aside, and all who care to, may see the real motive of those paid votaries, of the McMillan band wagon, their aim though a most fruitless one, is to sow discord, if possible among the followers of our standard bearer, William Jennings Bryan, and thus possibly gain a few votes for a man with a mind, which is not his own, and a will which he does not exercise, and who today is in favor of bimetalism and tomorrow against it, who at one moment is in favor of free trade with Porto Rico, and the next against it. Do the American people want such a man for president? This question is of much more importance to our people just now than whether or not W. J. Bryan, devoted much or little space to silver, in his speech of acceptance, all know just how he stands on the silver question.

Within the past thirty years the wealth of the United States, which was once fairly distributed, has been accumulated in the hands of a few, so that, according to the last census, 350,000 men own \$44,000,000,000, or over three-fourths of the wealth of this country, while 52 per cent of the population practically have no property at all and do not own their homes.—Senator R. F. Pettigrew.

The land office is in receipt of a circular containing the act of congress approved June 5, 1900, wherein it gives the right to every person, having filed on a homestead and commuted thereon to file another homestead. It also gives the right to those, having filed and lost their right for any reason, to make another entry. For instance, a person may have held a homestead and lost the same by reason of a contest. Such a person can file on another homestead. The law is a liberal one and credit is due those men in congress having engineered it through.—Alliance Gisp.
