LOGEGA AND HIS FORDE SURRENDER

Bot's Sabmusion Will Mean Pacific tion of the Provinces-Lack of Food Distresses Insurgents - Constabulary Punishes the Insurrents.

MANILA, Oct. 28.-The constabulary reports a fight with insurgents near Passi, province of Iloilo, island of Panay, in which twenty-five insurgents were killed and three captured, together with a quantity of arms and ammunition.

The news from General Hughes regarding conditions in the island of Cebu is encouraging. Lorega has surrenderd with his entire force, with one cannon and several rifles, while General Hughes is negotiating for the surrender of Maxilot, who styles himself "governor militar politico."

His surrender will mean the pacification of the province.

Lack of food and the harassing effects of the aggressive tactics now pursued by the Americans forces are having the influence upon the natives. it many place where rice is doled out by the government only enough is given for one meal, so that it is hardly possible for any large quantity to find its way to the insurgents.

It is believed that the recent manifestations in the island of Samar were chiefly due to the lack of food, the insurgents finding it necessary to make outlets to the coast in order to obtain

The first labor problem growing out of the new tariff has arisen. A hat and umbrella factory, employing 600 hands, has found it necessary to close. The lawyers are making a protest to the commission, urging protection, as the same goods from Germany can be sold at half the price it takes to manu-

facture them here. Dispatches from Cahtalogan, Samar, say that stringent and energetic measures are being taken to suppress the insurrection in that island. General Smith has notified all the presidentes and head men of the Pueplos that in order to avoid trouble they must surrender all arms and turn over the persons implicated in the Balingiga massacre before November 6, threatening that otherwise the presidentes will be sent to the island of Guam, the villages destroyed and the property confiscated. LAST MOURS OF ASSASSIN

Coolgon Spends Final Day Immered From Vision of Man.

AUBURN, N. Y., Oct. 28 .- The time that Leon F. Czolgosz, assassin of President McKinley, has to live is reckoned by hours now, but there has been no relaxation of the stringent rule under which the prisoner has been secluded since his confinement. Auburn prison was closed yesterday to any who sought the assassin and so it will remain until the prisoner has paid the penalty which the law enacts.

In fact, the plan to deprive Czolgosa living of any notoriety has been extended to Czolgosz dead. Immediately after the execution the clothing of the murderer, with the vast accumulation of mail that came to the prison for him, will be burned and if possible the request of the parents of the dead man for his body will be evaded. It is feared that the removal of his body to Cleveland would lead to scenes of an unfortunate nature and the prison officials are very anxious to avoid anything of the kind. The plan of burnmg the clothing and letters of the murderer will prevent the exhibition of relics by those who pander to the mor-

The hour of 7 on Tuesday morning is the time set by Warden J. Warren Mead for the execution. Various reports changing that time have gone through Auburn. One rumor places the time at 7 o'clock Monday morning, but that is discredited by the fact that Superintendent of State Prisons Cornelius V. Collins will not arrive here until 2 p. m. Monday afternoon and none of the regularly summoned witnesses has yet reached Auburn.

LEAP TO THEIR DEATH.

Inmates of Eight-Story Building in Phil-

adelphia Forced to Jump. PHILADELPHIA, Oct. 28.-Nine teen known dead and property loss amounting to unward of \$500,000 is the result of a fire today in the business section of this city. The number of injured is not known definitely, but fully a score of victims were treated at various hospitals. Police and firemen tonight are searching in the ruins for bodles of those supposed to have been burned to death. The buildings destroyed were the eight-story structure, 1219 and 1221 Market street, occupied by Hunt, Wilkinson & Co., upholsterers and furniture dealers, and three-story buildings occupied by small merchantmen. The big furniture establishment extended back a half block to Commerce street and was owned by Henry C. Lea. Up to this time nineteen fatalities are reported. Such a disastrous fire, attended with so great a loss of life in such a brief time, was never before known in this city. Men and women died a lingering, agonizing death in the presence of thousands of spectators, who were unable to lift a hand to their as-

WEST FOR IRRIGATION

Senator DuBois Declares Mambers of Congress Are Determined.

THE LANDS MUST BE WATERED

Scheme by Government - Money for Land Sales-A Movement All Along the

SIOUX CITY, Ia., Oct. 26 .- The Journad this morning publishes an interview with Senator Fred J. Dubois of Blackfoott, Idaho, on the object of irrigation in the west. Senator Dubois is quoted as saying:

"It is going to be a leading question for congress to deal with. There isn't any doubt but that conditions demand an immediate consideration of this matter and speedy action. I think to the industrial situation in this country today. We are complaining of poverty among the people, when out in at least. this great new western country there are over 100,000,000 acres of land that are not used because they are fit for nothing in the present condition, but which can be reclaimed for agricultural purposes by irrigation.

"In our state it is covered with sage brush. It is virgin soil, and it is the best soil in the United States, no place excepted. Sections that are irrigated through private or corporate means produce crops of grain, vegetables and fruit that no section of the country can equal. For instance, the soil will produce from 200 to 300 bushels of potatoes to the acre, and 25 bushels of wheat to the acre.

"We have the Snake river, a natural stream passing through Idahd, whose waters are used for irrigation purposes by private persons and companies. This river has a volume of water about like the Ohio river, and along its valleys canals and ditches are dug to drain the water out over the lands. I should say 2,500 miles of canals and ditches have been built by individuals and companies made up from a half dozen to a hundred farmers each. The most of the latter institutions are the co-operative plan.

"The plan I expect to promote this winter has been practically agreed upon by the senators and representatives in the western states which are interested. It is proposed that the government take hold of the matter of the development of these arid lands. The receipts of the land offices of the various states derived from the sale of government lands are to be applied as far as they are in excess of the salaries of the receivers, registrars, etc., to a fund to be expended in the building of reservoirs and canals on the high lands. Thus the great quantities of water that come from the snows on the mountains may be stopped from racing madly to the southlands and flooding the lower Mississippi out of its banks, causing loss of life and great destruction of property. The waters will be caught and corralled in the immense reservoirs, and thence out into the radiating ditches and released over the lands of the west as required by conditions or directed by

"You see this government irrigation will permit lands now unused to be reclaimed and sold to homeseekers by the government, which will raise more money each year for the irrigation fund. By this scheme of evolution every acre of arid land will eventually be made ready for cultivation in the great arid beit. California, Idaho, Wyoming. Montana Utah, the Dakotas, Nebraska and other states are interested in this matter.

"The management of the land offices will remain with the government, but there might be state laws to regulate the distribution of the water. It would be necessary to legislate to preserve the great white pine forests that stand on the hills of the west in order to avert the rapid melting of the snows. Men from the east are buying large tracts of these timber lands to cut out the trees, but this can be checked. We have in the state of Idaho alone 12,000,000 acres of unused lands.

FEEL THE LOSS IN CORN CORN.

NEW YORK, Oct. 36 .- Numerous floating grain elevators looming above the stores of the Atlantic basin, back of Governor's Island, and 124 berthed steamers, many of them tossing idly, attest an unprecedented duliness in ocean freights, says the World. It is due to the shortage of the corn crop out west. Corn exports are 30,000,000 bushels behind the same date of 1900.

"Corn makes ocean freights-not

wheat," explained Broker Lunham of Lunham & Moore, freight brokers and forwarding agents, Produce exchange. Experts estimate 100,000 tons of ocean cargo space tied up in New York, about the same in Philadelphia, and smaller amounts in Boston, Baltimore. Norfolk and New Orleans. Coal that was formerly carried to Europe for \$3.75 and \$4 a ton is now carried for \$2. Marderer of William McKinley Has Rot Short Time to Live.

ALBANY, N. Y., Oct. 25 .- Leon F Czolgosz, the murderer of President McKinley, will be electrocuted at 7 a. m. on Tuesday, October 29, at Auburn

Warden Mead has selected Tuesday, so that final arrangements may be made on Monday. In doing this he is following the general custom in the state prisons relative to electrocutions. It does away with the necessity for making final arrangements on Sunday. The sentence of the court was that the execution of Czolgosz should take place during the week comencing October 28, leaving to the warden of the prison full power to select the day of the week in which to carry out the mandates of the law. This latitude is given the warden to secure secrecy as to the time of the execution and to guard against delay from accident, such as in 1893 caused a delay of an hour in an execution after the condemned man had been taken into the death house at Auburn penitentlary.

BIG FIRE AT ARMOUR'S

South Omaka Packing Plant Has a Forty-Thousand Dollar Loss.

FERTILIZER DEPARTMENT RUINED

Threatened Property - Two Hours of Battle-Great Difficulty to Save Frightened Cattle from Vinducts.

OMAHA, Oct. 25 .- Fire almost demost totally destroyed the fertilizer department at Armour's, South Omaha, last night. By hard work the firemen kept the flames from spreading and thereby saved an immense amount of property which at one time was in danger. Just a few minutes before 10 o'clock a watchman discovered flames in the fertilizer building, which is at the west end of the north row of buildings. An alarm was at once sent in and the big chime whistle sounded a distress call which could be heard three

In response to the alarm the South Omaha department answered promptly, but the stock yards department under Chief Ambler turned the Arst stream on the blaze. All of the packing houses sent their departments and as the water pressure was excellent the building was flooded in a short time.

The flames spread with astenishing rapidity and when the roof fell the blaze illuminated the stock yands and the surrounding territory for a wide

As the various companies came up and reported for duty they were assigned stations, and by good manage ment the walls of the fertilizer building were kept cool, and thus the fire was prevented from spreading.

General Manager Kenyon of the Stock Yards company was early on the ground and he at once directed that the cattle on the viaduct be driven back to pens in the stock yards. This was no easy task, as the animals were badly frightened by the glare and the noise.

After the fire was under control, R. C. Howe, general manager of the plant, was asked about the loss. He said that the building was worth about \$25,-000, but that the walls could be saved. As for the contents, he could not say. The impression is that the loss will amount to fully \$40,000. This is covered by insurance. He said the fire would not interfere with the operation of the plant, but that work would continue today as usual.

About two years ago there was a fire in this same department of the Armour plant, but the loss was not nearly as much as it is now.

·Spontaneous combustion or a spark from the grinding machine is supposed to be the cause of the fire.

BIG PRODUCTION OF HARD COAL.

In Excres of Last Year and Demand In Excess of the supply.

PHILADELPHIA, Oct. 25 .- The production of anthracite coal in Pennsylvanta this year will be the largest in the history of the trade. Approximately the output will be about 10,000,-000 tons more than in 1900. The production last year was 45,107,484 tons; in 1899, 47,666,000 tons, and in 1898, 41.889,800 tons. For nine months of this year the shipment of coal has amounted to 40,309,786 tons, as against 24 202.710 tons for the same period last year. These figures only relate to the actual shipment and do not include that used at the mines and by the coal companies. The demand for hard coal this year has been greater than ever before. The production has been fully taken up and the mining companies have little stock on hand.

THE LIVE STOCK MARKET.

Latest Queintiess From South Omahe

SOUTH OMAHA. Cattle-There was a fairly liberal supply for this time of the week, but all kinds were in good demand and the market ruled active and steady to strong on all esirable grades. There were only about ifteen cars of corn-fed steers on sale and sone of those was what could, be called Inished. Anything at all desirable, howover, sold readily at steady to strong prices. Receipts included only about birty-five cars of cowe and heifers, and puyers took hold in good shape and the market was active and fully steady with resterday. A few of the choicest bunches possibly sold a little stronger, but still the situation is best described by calling t a good, steady market. There was no particular change noticeable in the prices oald for bulls, calves and stags, as they have been selling in just about the same notches all the week. The strong demand for feeders was the most noticeable fea-ture of the market. Buyers were all out early and paid good, strong prices for weighty cattle showing quality. The So far as the commoner grades and the medium weights are concerned, there was not much of any change, as they were neglected more or less, the same as they

have been all along. Hogs-The supply of hogs was light as ompared with the arrivals of the prerious days of this week, and as the demand was in good shape the market opened about steady with yesterday's verage. The bulk of the sales went at E.974-26.00. Some of the choicer loads old from \$6.00516.05 and a few went above that figure. Commoner grades sold from E.975 down. It was not a particularly actve market at those prices, but still the bulk of the offeringes was out of first

Sheep-The receipts of sheep and lambs ontinued liberal and packers were even more bearish than they were yesterday. They all tried to buy their supplies lower, ut as feeder buyers were numerous and anxious for supplies they outbid of the receipts today went to feeders at about stendy prices. A big ambs, the big proportion of which were good enough for killers, sold to a feeder which was considered a steady price. Mexican wethers, in the same way, were bought by a feeder at \$1.60.

BOYS DUEL WITH A NEEDLE.

Thirteen-Year-Old David Bernstein Stabe . Harry Himmelfarb.

CHICAGO, Oct. 26.-A large basting needle, such as is used by tailors, was the weapon with which David Bernstein, aged 13, stabbed 17-yearold Harry Himmelfarb to death tonight. -Today young brothers of the boys had a quarrel. When the older boys met tonight on the street near their homes they took up the quarrel of the little fellows. Himmelfarb, who is a coatmaker's helper, pulled from a half finished coat he was carrying home a big basting needle. He plunged 4t into young Bernstein's thigh and ran. Bernstein, mad with pain, pursued him, and drawing the needle from his leg, he held Himmelfarb with one hand while with the other he drove the long needle into his heart. Bernstein fled to his home,
