Press-Journal

THURSDAY, JAN 6 1906

Geo. A. Phipps, Editor.

ENTERED IN THE POST OFFICE AT HARRISON NEBR. AS SECOND CLASS MATTER

OFFICIAL PAPER OF SIOUX COUNTY.

1 Dollar Per Year.

Speaking of going to California to spend the winter. Why not stay in Nebraska?

A good resolution for New Year's Day—Resolve to support the papers that defend your rights and protect your interests.—The Commoner.

The New Year's number of the Rocky Mountain News contained an extended article about each mining county in the state with illustrations and figures relative to the output of the year. It will certainly be a very valuable advertisement for Colorado.

The announcement that periodicals would be denied second class privileges if their subscribers had not paid in advance seems to have been without foundation. If such was the intention of Mr. Maden, he was compelled by public sentiment to withdraw his decision.

In giving reasons for subscriptions to the Stuart Ledger, last week, it mentioned the fact that it didn't advertise two well known patent medicines. Evidently Miss Hudspeth overlooked the fact that the prominence she gave the names of these objectionable medicines on her local page was the best kind of an advertisement for them at no expense.

A few papers have recently been giving to Schley their support for President. While Schley, Dewey and Miles have been vindicated in the minds of the American people, in regard to what they did as soldiers, this seems hardly to be sufficient to think that they would be good democratic nominees for President or even that they desire this nomination. The Schley boom in Nebraska will doubtless serve a useful purpose, however.

WAKE UP.

The following clipping from the Lusk Herald illustrates how our enterprising neighbor in the west is preparing to cope with any situation which may arise in line of fighting fire.

"The special election, held last Thursday for the purpose of voting on additional water bonds for the town, passed off as quietly as though there was no election being held at all. There was little interest taken in the matter on account of all being unanimously in favor of the proposition, as will be shown by the vote cast. There were but 29 people who voted—a little more than one-third of the town—all cast in favor of bonds.

The hose house is under full headway now and with a few more days of fair weather the boys will have it completed and ready for use. The members of the company are doing the work on the structure, thus saving a carpenter bill on the same."

While the topography of the country around Lusk lends itself to a water system in a way which is entirely lacking around Harrison, yet this is not sufficient excuse for the citizens of Harrison ignoring the matter entirely. It is the universal opinion that a water system would have to be a voluntary affair with our citizens as the condition of the city treasury would not admit of a bond issue. Why not start the work now? The manner in which the citizens of Sioux county responded to the appeal for Mr. Wright and family proves that they are not lacking in public spirit and charity. This ought to be proof that a system of water works can be installed in Harrison by popular subscription. Why not wake up, lay our prejudices aside, call a mass meeting of the citizens, decide on a possible plan and appoint a committee to arrange details and another to get subscriptions. It is certainly better to spend a little money before a fire than to lose all. We surely cannot afford to let our neighbor on the west, who is a competitor of ours in seeking for our business, show more public spirit and unity of purpose than we.

Why not wake up? Bird Names.

The grebe, which, by the way, is more often found in fresh water, is so called from the "krib" or crest of feathers on its head. Of other wild fowl, the duck by its name implies that it is a diving bird, one that ducks its head under water; the coot is the "bob-tailed" water hen, and the snipe is the "snapper."

Architects in Japan make it a rule never to construct a building over our stories in height, for fear it will fall during an earthquake. Earthquakes are frequent there. Sometimes we have two in one month, but the damage is seldom great.

THE LAND LEASING

The difference between the trusts and the people is this—when the trusts want anything from congress they keep working until they get it, when the people want anything they make one try for it and then spend a year or two wondering why they did not get it.—The Commoner

The above paragraph expresses very tersely the situation in regard to the fight the capitalists are making to get a land-leasing bill passed at this session of Congress.

Their method of work in this instance has been to avoid publicity entirely, evidently hoping that in the rush of introducing other bills this one would not receive public attention. The reasons for this course of action are very plain. The promoters of this bill are men who realize fully that ninety per cent of the citizens of this western country do not want any such measure to become a law. The other ten per cent is composed of people who have large land holdings and would be enabled to lease enough government land adjoining them to squeeze all small stockmen entirely out. When this has been accomplished they will have things to suit their own sweet will and consolidation of all their interests into one gigantic live stock trust which controls the livestock output for the world is not very far distant. When that time comes, organized capital will dominate the West as it now does the East and nothing will be left to the poor man but to work for these trusts at what wages he may dictate.

"Visionary" you will doubtless say but so were the predictions of students of the tendencies of our times a few years ago called visionary when they predicted that all large interests would be consolidated in a few years, yet these consolidations have come and organized labor went down in inglorious defeat before these great powers only a few months ago.

Now is the time to stamp this measure out and a little work now will mean more than a great deal after the measure has secured some headway in Congress. The capitalists have been at work for several months projecting their plans and laying their wires, but all the time keeping the measure from the public honest men do not fear publicity or men who are working for the greatest good for the greatest number.

It is therefore necessary that the people of this section who are interested in the welfare of their interests, act and act at once. The attention of the newspapers of this section is called to the need of immediate action. This co-operation is desired in pushing the work of informing our representatives in the National Congress to what the sentiments really is by the people who live here and expect to build up this country as a land of homes.

If the sentiments of the people can be shown successfully to the National Congress we will have little to fear, but the danger is in allowing the capitalists to cover up facts and make unfounded pretensions of doing the fair thing to all. Let the newspapers and the citizens have their voice heard at Washington even though it must go over the long distance telephone of petition.

SKILLED IN MANY SPORTS.

Left-Handed People Are Proficient in Ways That Astonish One. It is not wise to poke fun at a left-handed boy or girl. They may develop qualities that are unattainable by those who use their right hands preferably. Children who have fallen into this habit of using their left hands should not be taught to do violence to a strongly implanted instinct and use the right hand whether they will or go. Such a training not only inflicts upon the child a useless amount of hardship and inconvenience, but may do him serious injury, even to depriving him of the power of speech. According to the latest scientific discoveries all manner of havoc may be wrought with the brain by the adoption of this mistaken method of teaching left handed children to use the right-hand. This discovery is the result of experiments lately made at the University of Chicago, which has gone more deeply into the modern subject of "child study" than most of the universities. It is Professor Smedley, director of the department of pedagogical investigation, who has made the most fruitful experiments with the left-handed. He discovered that by far the greater majority of mothers looked upon left-handedness as a defect to be overcome at any cost and that the child was in consequence forced into a most uncongenial system of training. The greater number of children so trained, says Professor Smedley, are defective in speech. By endeavoring to substitute the use of the right hand the nice balance of the brain is disturbed and besides producing far less manual dexterity the power of speech may also be impaired. It is also a matter of record that left-handed persons are in games of skill more proficient than those who are right-handed.—Chicago Chronicle.

Some one has discovered that sunstroke is only the work of a microbe of peculiar shape and kind. It only remains now to find the germ which causes people to freeze to death in winter time. The germ which invades the physical anatomy that has been struck by lightning and the bacillus that plays havoc with persons who are run over by railroad trains can be hunted up and identified later.

Marsteller Bros.

Are now prepared to show AN ELEGANT LINE OF

SELZ School Shoes

It is a problem solved in Shoe Economy with a handsome balance at the end of the year when Selz School Shoes are purchased exclusively for the children. No manufacturer in the world builds a line of shoes as extensive—durable—handsome and low priced as the Selz Children's Shoes this year.

Look for the sign of "Selz." It marks the Popular Dealer.

Selz Shoes for Men, Women and Children are Satisfactory Shoes—Price—Quality—Comfort—Style.

SELZ, SCHWAB & CO., CHICAGO
Largest Manufacturers of Boots and Shoes in the World.

The Commercial Bank.

HARRISON, NEBRASKA.

DIRECTORS.

C. F. COFFEE, President. F. W. CLARKE, Cashier
CHAS. C. JAMESON. H. S. CLARKE. A. MCGINLEY

Stockmen having use for a bank at this point may rely on us to handle their entire Banking business. We are prepared to take care of our trade at all times.

Stock branded on right side or hip. Address, Ed. Husher, Foreman Harrison, Neb.

A. R. KENNEDY.
Cattle Branded on Right Hip and shoulder. P. O. Address, Crawford, Nebraska.

ED. MARON.
Cattle Branded on left side. Range on Kenning Water. Address Arata, Neb.

Inscriptions Render Votes Valid. Of the 2,500 defective votes cast at the recent election in New York more than half, it is said, were rendered void by inscriptions aimed at Mayor Van Wyck, such as "Anybody but him," "Not the less candidate," and so forth. Sometimes the name and address of the voter were given.—Chicago Chronicle.
