Treatment of Corn Smat The illustration shows the effect of the corn smut on the growing cars, and it is evident that the disease needs attention each season if the corn fields of following years are to be free from this troublesome difficulty. Probably the only way of getting rid of the trouble entirely is to gather the sinui pustules before they break and scatter the spores. This work should be done as soon as the trouble is noticed, going over the field two or three times during the summer and gathering the pustules carefully, then burning them. In

chicks that are of better ancestry that the others, or chicks that are showing good growth, and bear the earmarks of good layers, they should be market In some way to identify them.

Waste Products on the Farm.

The work done on the farm just be fore the busy spring planting begin is very important, if proper considera tion is given the matter of saving tha which is usually lost by inattention to details. The great waste of unsalable farm products amounts to millions of dollars annually, for farmers do no seem to understand that it is not at ways necessary to send produce away from the farms in order to find mar kets. The farm is the best market, it fact, that a farmer can have, for it this manner the disease will be grad- he keeps live stock he will be able to ually stamped out. It must be remem- sell his raw products by converting bered, however, that if the spores are them into the forms of meat, milk scattered over the field the crop of butter and wool. The difficulty is that amut next year will be corresponding the waste products on the farms are ly greater. Spraying with Bordeaux not properly utilized. One product mixture has not been fruitful of rethat of corn fodder, has been wasted for years, though now it is being put to use with the aid of the shred der, but it is in the manipulation and handling of the manure and weeds that the lessening of expense occurs.

Fattening Old Cows. There are those who think it does not agree with them. Given one frest grave of the Iron Mask. The old at and a regular grain feed every day does not run away because there is a during the summer, and they can be and they will continue to gain in flest the garden there is a subterranean pas all the season. Then a little succulent sage which leads by gentle descent food, as soft or mmature corn, waste direct to the cave of burial. The ques fat very rapidly when the grain feed is bones of this fascinating figure of a corn growers to do the same thing, and steer beef that the marketmen handle, A newly born giraffe stands high it will be comparatively easy to stamp and it will be sold at the same prices.—

as a man can walk, pulling the framework after him. When his companion ew England Homestead.

Swindling the Farmer. Still another signature swindle is re ported from Indiana. Sharpers from Chicago went through country districts, representing themselves as hunters. They would approach a farmer, tell him they wished to hunt on his land, and cheerfully pay \$5 for a permit to do so. The farmer would sign a receipt for the money, and this

turned up later as a promissory note for \$500. It is said that the swindlers secured \$5,000 in one county by this process. It is noticeable that most of the swindling schemes now worked to the detriment of the farmers, begin with the payment of a small sum, which disarms the suspicions of the victim.-Rural New Yorker.

Irrigating the Garden. The usual method of watering plants of any kind is by surface watering and in normal seasons this seems to answer the purpose, although it involves considerable labor. In dry seasons or in any season where it is possible to carry on the plan at moderate cost, a plan of trrigation which will carry the moisture under the surface of the soll so that the plants may use it as desired will be found most advantageous. Such a plan can be carried out by a system of tiles as it is done in arid sections. but when small areas are to be watered a number of trenches will answer the purpose if the water can be pumped into them at small expense

Rust in Wheat. Rust in wheat may be prevented by destroying the spores in the seed. One plan is to sonk the seed in a solution made by dissolving a pound of sulphate of copper in ten gallons of hot water. ind air to enter the soil, the stirring of allowing the seed to remain in the solu seed with fine land plaster and sowing or drilling as soon as dry. Wheat that showed indications of rust last year should be avoided, however, and new seed procured. It should also be planted on a different field from that on

Feeding Lambs Beet Pulp. During the past season the feeding of lambs on beet pulp has been very satisfactory. At Lansing, Mich., some 3,000 were fed. Although at first the pulp was not reliahed and several died from eating it, later they did well. It eems that the pulp gives the best sat

MAN IN THE IRON MASK

scient Cemetery of St. Paul in Paris His Supposed Burial Place.

over to workmen, who will demolish it to make room for a workshop. Rue Beautrellis is an ancient and narrow street which the omnibuses do not penetrate, remnant of the times when the Place des Vosges was the Place Royal and the home of beaux, "pe ruked," and red-hended. In the gar den of the doomed house, famous in times past as the residence of distinguished persons, is a grave which local tradition says is the resting-place of that mysterious figure in history-the Man with the Iron Mask, says the Paris correspondent of the Pall Mail Gazette. One remembers that this remarkable person died in the Bastile in 1703 and the local register says he was buried in the parish of St. Paul. Now. this garden undoubtedly forms a part of the ancient cemetery of St. Paul, and the church, itself, is near at hand, set in the midst of a cluster of old houses. It is in the garden that the famous Iron Mask is said to have been buried, and the spot is the Mecca of daily pligrimages. Outwardly, the place is uniovely enough, ragged and uncultivated. A few poor bedraggied flowers try to live on, cut off from the "My attention was called to Lydia sunshine by the over-topping houses. E. his spouse, Armande Bejart.

Hitherto the man in the street had imagined that were all the waters of every city and plain polluted he would is ready to staple the wire to a stake, still find immaculate springs in the the pin is put through the side of the Alps. But M. Binst, who presides over frame, locking the reel, when the wire a chemical laboratory at the Pasteur can be pulled up as taut as desired .- Institute, having no such faith, obtained some ice from the glaciers of Mont Blane itself and placed it under his pitiless microscope. His verdict shatters the dreams of mountaineers. It appears that even the summit, which so long remained untrodden by human feet, has lost its purity, if it ever had

The ice in question, and water melted therefrom, were found, on bacteriological analysis, to be "peopled with colonies of microbes." The statement which follows is particularly terrifying. It appears that "the germs in question were found to belong to the most varied families of bacteria."

M. Binst accounts for the pollution of the Mont Blanc glaciers, says the London Telegraph, by surmising that the microbes have been conveyed to the mountain peaks by the winds sweeping the cities in the valleys.

woman was recently robbed of \$3,000 in bills at 8 o'clock at night. her dress being literally cut from her body by the thieves. An unprotected woman has no business to be carrying \$3,000 at night anywhere unless she is prepared to take the consequences.

Within the past year the newspapers have recorded hundreds of cases of murder, assault, torture, robbery and arson, all due to the criminal careless ness of people keeping in their houses or on their persons, large sums of money which should be safely lodged in the banks. Many people are prejudiced against the banks, but where there is one bank failure there are a handred robberies. It is easy to take proper precautions but practically impossible to catch thieves.

An Economical Parson. "Br'er Williams, all thoo' de winter eason you wux preachin' red-hot sermonts on hell fire, en now dat de spring ome you nin't got a word ter say bout hell fire. How come?"
