Time Is the Test.

There is a heap of difference be tween relief and cure. Any one with an aching back may find relief in numerous remedies, but do these remedies cure? The aches and pains of kidney ills, the weary, wornout condition, nervous attacks, too frequent urination, retention of the urine and many other indications of kidney and bladder disorders can be cured. Will the cure last? There is a ringing answer in the test of time and you have it here in the following statement:

Mr. Geo. Foot, a retired farmer, re-siding at No. 415 Addison street, Elgin, III., says:

"I just as emphatically endorse Doan's Kidney Pills to-day as I did in the fall of 1897 when I began taking this remedy, and followed up the treatment until it cured me of backache and other irregularities due to either weakened or over-excited kidneys. I am only too pleased to endorse a preparation which is just as represented." A free trial of Doan's Kidney Pills sent on application. Address Foster-Milburn Co., Buffalo, N. Y. For sale by all druggists. Price 50 cents per box.

A Concientions Thief.

Fourteen years ago Frank Lash, of Farmersburg, Ind., had a ring stolen from his room in his boarding house. A few days since he received a letter from a person unknown to him stating that he had stolen the ring and that his conscience had since troubled him to such an extent that he wished

Mock Oysters of Green Corn A pint of grated corn, a cup of flour, one egg, two ounces of butter, three pepper to taste. Mix well and drop from a spoon in oblong cakes-to look farming community. as much like oysters as possible-into Serve on a platter and garnish with parsley. These may also be made of canned corn by pressing it through a colander with a potato masher to separate the hulls from it.

Fried Sweetbreads.

Parboil and when cold dip them in beaten egg and cracker crumbs, sprinkle salt over them and fry in hot fat. Take one tablespoonful of this fat, and then stir into it one tablespoonful of flour, then set the pan back a little and add gradually one cupful of milk, stir until smooth. Season with salt and pepper, a little very finely chopped celery and cook about two minutes. Pour over the sweetbreads.

Creamed Fish.

Pick cold cooked fish to pleces and remove all the bones. Make a cream sauce with two tablespoonfuls of butter and flour, two cups of milk and a dash of cayenne and one-half a teaspoonful of salt. Butter a pudding dish, put in a layer of fish, a layer of sauce, and continue until the dish is full. Spread crumbs and bits of butter on top, and bake twenty minutes in a hot oven.

Boiled Icing.

One cup of granulated sugar, five tablespoonfuls of boiling water, the white of one, egg beaten to a stiff froth. Put the sugar and water over the fire and boil until it threads from the John J. Glessner, Richard F. Howe, spoon; then turn it into the beaten egg. beat briskly for a few minutes, flavor with vanilla, lemon or almond, according to the cake. While the cake is still warm, sprinkle with flour and sprend the leing on with a broad knife.

Crab Criquettes,

the very first battle in which Molly had Take the meat of boiled hard-shell ralis, about one pound, and gently cress out the juice; add one tablespoon ful of fine crumbs one-half a teaspoon ful of sait, one-half a saitspoonful of pepper, the yolks of two eggs and a fort and Sergt. Hays turned away from very little water. Form into croquettes, coll in crumbs, then in eggs, and then in crumbs again, and fry in hot fat. for his life, his wife all ready to follow.

Tomato Beef.

Sprinkle small pieces of beef cut from the remains of a roast, with salt, popper and flour. Put a layer of meat of canned tomatoes or sliced fresh tomato. Make the top laver of buttered grains.

A SWALLOW'- FI LD

It has often been stated that 60 miles an hour was the utmost rate at which a swallow could fly. Recent epxeriments between Compeigne and Antwerp proves that a swallow in a hurry can cover 12812 miels in an hour.

A Benefit to Farmers

The benefits that will undoubtedly result to farmers from the recent incorporation of the International Harvester Company which took over the business of the five leading harvester tablespoonfuls of milk, and salt and manufacturers have probably not been considered by a large portion of the

The economical necessity of a consollhot butter fry brown on both sides. dation of the interests of manufacturers and those of their farmer customers must be apparent to any one who understands the present situation. The increased and increasing cost of material, manufacturing and sellingthe latter in consequence of extreme and bitter competition between manutheir several selling facturers and agents-has made the business unprof-Itable.

> The two alternatives left for the manufacturers were either the increasing of the prices of machines or the reduction of the cost of manufacture and sales. The latter could only be accomplished by concentrating the business in one company.

> As can readily be seen, the forming of the new company was not a stock jobbing operation but a centering of mutual interests. There is no watered stock; the capitalization is conservative and represented by actual and tangible assets. There is no stock offered to the public, it having all been subscribed and paid for by the manufacturers and their associates.

The management of the International Harvester Company is in the hands of well-known, experienced men.

The officers are: President, H. McCormick; Chairman Executive Committee, Charles Deering; Chairman Finance Committee, George W. Perkins; Vice Presidents, Harold F. Mc-Cormick, James Deering, Wm. H. Jones and John J. Glessner; Secretary and Treasurer, Richard F. Howe. The members of the Board of Directors are as follows: Cyrus Bentley, William Deering, Charles Deering, James Deering, Eldridge M. Fowler, E. H. Gary, Abram M. Hyatt, William H. Jones, Cyrus H. McCormick, Harold F. Mc-Cormick, George W. Perkins, Norman B. Ream, Leslie N. Ward, Paul D. Cravath.

The International Harvester Company owns five of the largest harvester plants in existence, The Champion, Deering, McCormick, Milwaukee and Plano-plants that have been produc-

ing nearly or quite 20 per cent of the harvesting machines of the world. It also owns timber and coal lands, blast furnaces and a steel plant; it has a new factory in the process of construction in Canada,

It is believed that the cost of producing grain, grass and corn barvesting machines will be so reduced that the present low prices can be continued, and that consequently the results cannot be otherwise than beneficial to the farmer. To maintain the present prices of these machines means to continue and increase the development of in a baking dish, over it put a layer the agriculture of the world, for no one cause has contributed or can contribute matoes. battle of Monmouth, but she had fol- clining years and where she died,

RECLAIMING OUR DESERTS.

They Are Gradually Yielding to the

Encroachments of Civilization. The desert still maintains its fastnesses in the West. There are some spots better entitled to the name than others, but each year these fastnesses are shrinking before the advance of human enterprise, as the water might rise over the land, leaving the high and difficult places to the last. So these islands are scatteed through several States and Territories, mostly in Arizona, New Mexico, California, Nevada, Utah and Oregon, in the great valley lying between the main ridge of the Rocky Mountains, on the east, and the Cascades, Sierra Nevada and the coast range, on the west.

Chief among them are the Mojave Desert, in southeastern California, a territory as large as Switzerland; the Colorado and Gila deserts of southwestern Arizona and southern California; the marvelous painted desert of northeastern Arizona; and the Great Salt Lake desert of Utah. Opening northward from the Mojave desert lies Death valley, perhaps the most desolate and forbidding spot in America, though comparatively small in extent. Yet there are few places, even in these desert strongholds, that are wholly without life of one sort or another, and a large proportion of them could be reclaimed if water were available. Even as it is, not one can bar human activity; railroads have been built directly across three of the worst of them; mines are being opened and find at that wonderful fire sale? oil wells driven; land is being remany mining camps and an extensive cept the feet are burned off. borax industry.

In all the West, look as you will, ert more pitifully forlorn, more desert | clothes line.
