ton. In 1879 he went to Dakota, invested largely in lands and became a prosperous farmer. Then he entered politics and was a power in the Democratic party. Twice he was the candidate for Governor. In 1893 he was elected to the United States Senate Then came echoes of a scandal. He was accused of irregularities in his connection with the Citizens' National Bank, the amount involved being \$64,-000, and Senator Hoar offered a reso lution for an investigation, but none was ever made and Senator Roach served his term. Since 1899 he had lived in New York, where he was prest dent of the Cuban Asphalt and OD Company.

WHERE GEMS CAME FROM.

Mystery Surrounds Original Reposi tories of Many Precious Stones.

The natives of India, up , the be ginning of the eighteen century, referred to rock crystal as an "urips diamond." At that time India was thought to be the only land which profuced that precious stone. It was not therefore, until the discovery of In lia that the diamond was known to us Yet as far back as 500 B. C. a "ditac tic history" of precious stones was written, and in Pliny's time the supply must have been plentiful, as he wrote, "We drink out of a mass of gems, and our drinking vessels are formed of emeralds." We are also told that Ne ro aided his weak sight by spectacles nade of emeralds.

But it is very difficult to determine hence all the gems came, as discover ers took care to leave no record. The nations who traded in them were known, and even the most ancient merchants would not disclose any defilite locale. All sorts of myths have (coordingly sprung up concerning the origin of gems. "Diamond" was the same given to a youth who was turned into the hardest and most brilliant of substances to preserve him from "the Ils that flesh is heir to." Amethyst was a beautiful nymph beloved by Bacthus, but saved from him by Diana, who changed Amethyst into a gem, whereupon Bacchus turned the gem nto wine color and endowed the wearer with the gift of preservation from
