ing the low birth rate among Americans of American ancestry are partly me to the woodshed." indorsed by official deductions which appear in the reports of the last census. Volume II part II on population pre sents tables which indicate that the zens who have not been impressed with rate is considerably higher among persons of foreign parentage than it is among those of native parentage, and declares that "the changes in the age constitution of the native elements of the population are caused principally by a decrease in the fecundity of ma-Dr. Shrady, President Ellot, President | tive-born women of native extraction. These changes show a decline in the have too many children, even though proportion of children reported for the years of life, and the report adds measure to omissions and misstatements, to a slight decrease in the number of marriages for American women to a later period in life, all these causes are of inferior importance to the one first named. A summary is then given which shows "that from 1890 to 1900, there was an aggregate increase in the native white population of 10,615,988 or 23.1 per cent; but after excluding the children less than 10 years of age both of whose parents were of foreign birth, the numerical increase is reduced to, approximately, 7,379,192 and the percentage of increase to 16." The effect of the exclusion is particularly noticeable in the North Atlantic div. sion, where the change in percentages is from 20.0 to 9.5. In other parts of the country this change is: South Atlantic, 20.5 to 19.6; North Central, 21.1 to 12.8; South Central, 29.9 to 28,4 Western, 41.5 to 32.5. We quote the following on the subject from an article in the Nineteenth Centuhy: "As inte as 1840 the increase in the population by reproduction was 25.01, by immigra tion 4.66. By 1890 the first had dwin dled to 14.40 and the second had in creased to 10.46." During the latter part of the decade 1890-1900 there was decline of immigration, and as a result the census returns on population showed "a relatively smaller increase than the figures of any previous decade since the Declaration of Independence. Thus the fact of a low birth rate seem to be pretty well established. Why there is an aversion for large families

The assertion of Dr. Shrady concern

is another story. The Loud-Talking Telephone. A Frenchman has invented, recently what he calls the haut-parleur, or loud talking telephone. By its use, a spenk er's words are transmitted to the other end of the connection with all of their original force, and that, too while the speaker and the listener need not dis turb themselves to go to the telephone That is, a man may sit in his easy chair, puffing away at a cigar, or may even be in a room adjoining that containing the transmitter, and talk to another man at a distance, who may be conducting himself similarly, with as much case and distinctness though they were conversing face to
