Washington, had reached the vestibule of each and had then descended wearily to the sidewalk. " This last appeal of the young book agent had a peculiar effect upon the guardian of the door. He seemed inclined to hear more. Invited inside, the young man told of the value of the book, not only from the standpoint of authenticity, but of the fact that its author was the closest personal and political friend of President Roosevelt. The agent became most eloquent, and the words flowed easily from his lips.

His listener seemed more and more pleased with what he said, and finally exclaimed:

Young man, I will take your book." "What's the name, please?" "Henry Cabot Lodge."-Detroit

#### Tribune. Manliness of a Little Man.

Several days ago I happened to board a car which was crowded. A little man, perhaps he was twelve years old, offered me his seat with a charming how and smile. He soon found a sent, but popped up when another woman entered, pulled off his cap, which was fringed with rags, and with such a jolly, wide smile, made room for the newcomer. Five times in as many minutes that smile broke as he gave his seat again and again, and soon everyone in the car was soulling in sympathy. No one thought whether his clothes were whole or ragged, but some one said: "I wish my boys enjoyed being gentlemanty as much as he does," and a fine-looking man remarked quite loudly to his heighbor: "That's the sort of manil-

neis that made our President." The boy heard this remark and coked around to see who was manly. It was so natural for him to smile and to be polite that he was not conscious of being remarkable.

One often hears the remark, "Why should a poor man stay in the city while there is a chance for him in the sountry?" One answer is that he knows what he can do in the ciry, while the country possibilities are unknown and untried. The experience of a mill operative who was out of work is suggestive. He appeared in the town one day peddling garden truck. and was met by one of his former fellow workers. The following conversation took place:

"Turned farmer, Brock?" queried the friend.

"Turning that way," was Brock's answer. "I'm working for a farmer, and trying to make more profit for These peas and string beans were to be given away for the picking. He had more'n he could use, you see But I offered to come into town with the wagon-load and peddle them. So we made up a load with the addition of some potatoes and apples. I shall take back a good bit of money, too.

"Last week it was cherries. buckster came along and offered + cents a quart for the lot-three bush els and a half we picked. I said I'd come into town and sell 'em for 10 cents a quart, and I did. They went like hot cakes. You see, the man I work for hadn't anybody to send into town to peddle things, and he'd sell or give away, as he could on the spot.

"The other day the butcher came to buy a fine veal calf. He offered \$5. Mr. Carter was going to take it, when I told him to wait a bit. I had a pa per in my pocket, and I pulled it out and read the market quotations on ealves. Well, the butcher paid \$6.50

for that calf." "Ain't you coming back to the mill when it starts up?" the friend asked. "Guess not. I like the farm," answered Brock. "I'm going to have a commission on the garden truck I sell, and I shall do better than in the mill. Somehow that hot, stuffy air ain't to my liking any more. My wife's got a really desirable?" chance to work in the house, and, we -we're going to have a farm of our own some time. No farm work is half so hard as work in the heat of the mill. Yes, I'm done with mill work." and he clucked merrily to the horse and drove away.-Youth's Compan-

Lovers of Venice Deplore Project to

Connect City with Mainland. Lovers of old Venice, the quaint and beautiful queen of the Adriatic, are deploring the project to connect the city with the mainland by a substantial causeway. Thus to link it will seem to the poetic-minded an outrage and to vulgarize her unlove story of glory and fame. Three years ago the Sindaco appointed a commission to investigate the matter, and this commission has handed in its report, or, rather five reports, for each of the five com missioners had a special duty to perform-Prof. Alessandro Betocchi was to inquire into the posible effect upon the lagune: Prof. Nazzani, hygienic results: Prof. Coen, effect on commerce; Prof. Boubee, cost of construction; and A man do the exception of the last, the commissloners rather beg the questions as signed to them, although Prof. Betocchi, Nazzani and Coen suggested a rebuilding of the old bridge so as to permit a freer flow of water than is now possible; the "laguna morta" would then cease to be stagnant, "malaria" would disappear, while if the bridges were to be broadened freer access could be had with the mainland.

As to Signor Rossi, with fine old Venetian cynicism, he neither deplores nor yet advocates the proposed innova-"So much of beauty has disap peared from the city," he says, "that the most monstrous modern thing might even be harmonized with the unthat remain. ## Deepest Hole in the World.

The deepest hole in the world is in Germany, near Leipzig. While boring for coal Captain Huyssen made some very valuable observations. He got down to a depth of 5,790 feet, and to do so cost him \$50,000, a record sum for a single experiment of which the main purpose was to add to scientific knowledge. The hole was less than half a foot in diameter at the surface and tapered off to the thickness of a man's finger. A costly diamond drill and to be used; the rods to which it was attached weighed twenty tons and could not be put together or taken to pleces in less than ten hours.
