

Salzer's Home Builder Corn.
So named because 50 acres produced so heavily that its proceeds built a lovely home. See Salzer's catalogue. Yielded in 1908 in Indiana 157 bu., Ohio 190 bu., Wisconsin 95 bu., and in Michigan 220 bu. per acre. You can beat this record in 1909.

WHAT DO YOU THINK OF THESE YIELDS PER ACRE?
150 bu. Seedless Parley per acre.
140 bu. Salzer's New National Oats per acre.
80 bu. Salzer's Speltz and Macaroni Wheat.
1,000 bu. Pedigree Potatoes per acre.
20 tons of rich Billion Dollar Grass Hay.
25,000 lbs. Victoria Rape for sheep per acre.
140,000 lbs. Teosinte, the fodder wonder.
14,000 lbs. Salzer's Superior Fodder Corn—rich, juicy, fodder, per acre.
Now such yields you can have, Mr. Farmer, in 1909, if you will plant Salzer's seeds.

JUST SEND THIS NOTICE AND 10c in stamps to John A. Salzer Seed Co., La Crosse, Wis., and receive their great catalogue and lots of farm seed samples.
(C. N. U.)

The guide look to hell is not a primer on the way to heaven.
The more ways a man thinks over to get a girl to let him kiss her the surer he is to find that the best way is just to go and do it.—New York Press.

A Genuine Hair Grower.
A doctor-chemist in the Altemheim Medical Dispensary, 1170 Foso building, Cincinnati, Ohio, has discovered what proves to be a positive hair grower. This will be welcome news to the thousands afflicted with bald heads as well as those whose hair is scanty and falling out. The announcement of the doctor-chemist in another column of this paper explains more fully what this new discovery for the hair can do. A trial package can be had free by enclosing a 2-cent stamp to Altemheim Medical Dispensary 1170 Foso building, Cincinnati, Ohio.

The Great Homestead Lands of WESTERN CANADA are the Star Attractions for 1904.

Good crops, delightful climate, splendid soil, excellent water, and fine scenery. Write for the nearest authorized Canadian Government Agent for land in the West. **CHESEBROUGH MANUFACTURING CO.** 17 State Street, New York City.

Put Up in Collapsible Tubes.

A substitute for and superior to Menthol or any other ointment. It will not blister the most delicate skin. The pain relieving and soothing qualities of this ointment are wonderful. It will stop the itching of all eczema and relieve the most obstinate cases. It is recommended by all the best and most eminent medical authorities. It is a natural remedy for pain in the chest and all other ailments. It is a natural remedy for all ailments.

BEGGS' CHERRY COUGH
SUGAR COUGH CURE FOR COLDS.

HOW THEY GO
Cigar Dealer—(nods sadly)—
"I've lost another steady customer for my imported cigars."
Friend—"Who?"
"Wilkins."
"Dead?"
"No; gone off on a wedding tour."
"He'll come back."
"Yes, and then he'll begin smoking twelfs."

MRS. COL. GRESHAM Was Given Up BY THE DOCTORS. Pe-ru-na Saved Her Life.

(It was catarrh of the lungs so common in the winter months.)

MRS. COL. E. J. GRESHAM
Miss Jennie Driscoll, 870 Putnam Ave., Brooklyn, N. Y., writes: "If people knew how efficacious Pe-ru-na was in the cure of catarrh, they would not hesitate to try it. I have all the faith in the world in it as it cured me, and I have never known of a case when the person was not cured in a short time."—Jennie Driscoll.

Mrs. Col. E. J. Gresham, Treasurer Daughters of the Confederacy and President Herndon Village Improvement Society, writes the following letter from Herndon, Fairfax Co., Va.:

The Peruna Medicine Co., Columbus, Ohio:

Gentlemen— I cannot speak too highly of the value of Peruna. I believe that I owe my life to its wonderful merits. I suffered with catarrh of the head and lungs in its worst form, until the doctors fairly gave me up, and I despaired of ever getting well again.

"I noticed your advertisement and the splendid testimonials given by the people who had been cured by Peruna, and determined to try a bottle. I felt but little better, but used a second and third bottle and kept on improving slowly.

"It took six bottles to cure me, but they were worth a King's ransom to me. I talk Peruna to all my friends and am a true believer in its worth."—Mrs. Col. E. J. Gresham.

A PLAIN TALK On a Plain Subject in Plain Language.

The coming winter will cause at least one-half of the women to have catarrh, colds, coughs, pneumonia or consumption. Thousands of women will lose their lives and tens of thousands will acquire some chronic ailment from which they will never recover.

Unless you take the necessary precautions, the chances are that you, who read this, will be one of the unfortunate ones. Little or no risk need be run if Peruna is kept in the house and at the first appearance of any symptom of catarrh taken as directed on the bottle.

Peruna is a safeguard, a preventive, a specific, is a cure for all cases of catarrh, acute and chronic, coughs, colds, consumption, etc.

If you do not receive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case, and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, Ohio.

Little Bob knew her.—Little Willie—"Who is that lady over there?"
Little Bob—"Ho! That ain't no lady; she's my sister!"—Manchester Chronicle.

FITS Formerly called St. Vitus' Dance. No fit or nervousness after the first day's use of Dr. King's Great Peppermint Cure. Sold for 25c per bottle and 50c per dozen. DR. H. H. KLINE, Ltd., 331 Arch St., Philadelphia, Pa.

A GOLD-LOVING WORM.
Melanochytraeus solifugus is as irregular earthworm lately noticed on Mt. St. Elias, Alaska. By night it swarms on the snow of the Malaspina glacier, but when the sun shines it burrows to a depth of 18 inches or more under the surface.

"Have you been eating oranges?"
"No. Why?" "I see the skin all over you."

Science AND INVENTION

A "dying ground" of elephants, a resort where these animals go to die, was an interesting discovery by Major Powell-Cotton in eastern Equatorial Africa.

A sand worm of the northern and western coasts of France seems to have a sense of time. It is known as "convoluta," and M. Behn states that it makes green spots on the sand at low tide and disappears as the tide rises, and continued this course during fourteen days in an aquarium.

Flowers out of the natural season are usually obtained by keeping the young plants in cold, dry houses, and forcing them later by heat and moisture. It is possible to give young buds premature development by exposing them to ether, and A. Mammone claims that such development is not only more rapid but more regular and complete.

A curious investigation by Alfred Binet of the Laboratory of the Sorbonne has revealed differences in the handwriting of the sexes. Numerous characteristics are traced—such as carelessness in the writing of women and firmness and simplicity in that of men—and an expert graphologist has been able to give the sex of the writers of 141 addresses out of 180. The writing of old men resembles that of women.

The latest addition to American ornamental stones reported by Dr. George F. Kunz has received the name of California. It was first found about ninety miles from Yreka, Cal., where it outcrops for two hundred feet as a hard green stone of varying shades, and taking a high polish. The material, at first supposed to be jade, proved on analysis to be a massive variety of vesuvianite. Fine slabs five feet square and two feet thick have been found, and the supply seems to be large. Similar massive vesuvianite exists elsewhere in California and in Europe.

The Department of Agriculture is in favor of the climate of Porto Rico is favorable for the cultivation of what has sometimes been called the finest of tropical fruits, the mango. But although mangoes abound in the island, they are seedling trees, and the fruit is inferior to that of the famous Bombay mango, which is a grafted tree. It is believed that the mangoes could be grown in abundance in Porto Rico by importing the best grafts, and that the industry can be developed into an important one as soon as the excellence of the fruit becomes known in the United States.

The Japanese have attracted so much attention and admiration by their remarkable progress in the ideas and practices of western civilization, as well as by their native genius in art, that the results of an investigation of the brain weight of the Japanese people as compared with Europeans must interest everybody. For ten years Prof. Tazuchi of Tokyo University has been studying the brains of his fellow countrymen. He shows that with adults the brain weight compares favorably with that of Europeans of similar stature, and may even be slightly superior. There is one striking difference, however, in the fact that the Japanese brain grows more slowly during infancy and early youth than is the case with Europeans. In Japan, as everywhere else, there is found a positive relation between brain weight and stature, that is, the larger brains, generally speaking, go with the larger bodies.

Turbines.
The idea of the steam turbine is quite simple, and is similar to that of the water turbine or impulse wheel. The practical difficulty which has prevented the development of good steam turbines lies in the high velocity which steam can impart to itself in expansion, and the difficulty in efficiently transferring this motion to the wheel at speeds practicable for construction or practical use. Steam expanding from one hundred and fifty pounds gauge pressure a square inch into the atmosphere is capable of imparting to itself a speed of nearly three thousand feet second, and if it is expended from one hundred and fifty pounds gauge pressure into twenty-eight inch vacuum, it can attain a velocity of four thousand feet a second. The spouting velocity of water discharged from a nozzle from one hundred foot head is eighty feet a second, which shows the radical difference in the condition to be met in steam and hydraulic turbines.

FAST BECOMING EXTINCT.
Bald Eagles Being Sacrificed to the Milliners of the Country.

"Our white-headed or bald eagle is becoming rarer every year, for our national bird is being sacrificed to milliners. Before long that may be its only habitat," said an attendant at the zoo to a Washington Star man.

"When on some wild coast we see one of these birds rise from a cliff and begin to circle upward, then his mate, larger even than himself, and finally two full-sized brown-headed birds of the year follow their parents, the sight is worth waiting many years or going a long distance to see. We follow them with our eyes until they become tiny notes, then just the trace of one comes to our straining sight, and—they vanish and are lost from view.

"In Washington, however, we may see the "cousinship" gallop of the bald eagle, watch its nest-building and observe the domestic economy of this bird—the male on guard and the female brooding her white eggs. The first year in which the eagles nested in the zoological park the female showed great inexperience in her housekeeping. In the large flying cage where they spend the winter in company with crows and magpies they collected a quantity of sticks and grass around a small hollow in the ground, and after lining the cavity with moss the nest was considered finished.

"Both birds took part in its construction, and from the continual chucking and screaming, are presumed to have thoroughly enjoyed their work. Eagles often nest in trees, and these birds placed the nesting material round the roots of several saplings, the stems of which, protruding through the sticks and moss, looked not unlike the top branches of a tall tree. Naturally the next thing to be thought of was eggs, but this pair of birds had original ideas and intended, for a time, at least, merely to play at housekeeping. A solidized stone was brought in the talons of the female from another part of the

and placed in the nest and the work of hatching began. The male and female sat on the nest on alternate days and the bird not so engaged was always perched on a log near by on guard. The following year two eggs were laid, bluish-white in color and about three inches in length.

"The temperature of these birds undergoes a complete change at the time of the nesting season. At other times they are easily caught in a net and are not difficult to overpower, seizing every opportunity of making their escape. But when they begin to plan for their nest one cannot approach within twenty feet without being attacked by one or both eagles. When they rush forward, one on each side, and strike with beak and uplifted feet, it is no easy matter to escape unharmed, as I found when trying to photograph them, their talons reaching the skin every time clothing or shoes affording little or no protection."

HIS BESETTING SIN
How Eph Was Cleared of the Charge of Dancing.

Ephraim was a man of importance being an elder in the Baptist church and much given to exhortation, prayer and song, says Lippincott's Magazine. His cabin was the scene of many a "revival," and the powerful prayers offered by Ephraim on these occasions were the wonder and admiration of the colored population.

With all his religious ardor, however, there were times when the pleasures of the world appealed strongly to him. Seeing him approach one morning with downcast eyes and an air of general dejection, Colonel Snead accosted him thus:

"Hello, Eph! You look as if you were going to your own funeral. What's the matter?"

"Well, kunnel, I feels bad, suh," replied Eph; "de 'casion am a serious one, suh. You know de young folks done hab a party at Niek Finney's in nder night, an' as I's been a'wra'stled in pray'r fer de salvation ob Niek's soul for a pow'ful long time, I don't thought I'd 'cept der invitation an' go, an' maybe I mont drap a word or two, dat would teck his heart. But dey was mighty bettle chance for talker Niek 'bout ligion, fer dat niggal will dance whenever he heah a fiddle. Well, suh, I went, an' now dey claim as how I was a-dancin', an' I's ter be tried to-day an' put outen de church."

"Well, Eph, that's pretty hard luck but they ought to know that an elder of your standing would not indulge in anything so worldly as dancing," replied the colonel with a twinkle in his eye, well knowing that Eph's besetting sin was not tripping the light fantastic.

"I hopes so, kunnel, I hopes so," rejoined Eph in a tone of utter despair as he trudged on toward the town.

Late the same afternoon Colonel Snead heard a voice singing lustily "De gwine ter jine de band," and recognizing Eph, he asked:

"How did the trial go, Eph?"

"Dey clard me, kunnel, bress de Lawd! dey clard me."

"Cleared you, did they? that's good. Then you proved you'd not been dancing?" said the colonel.

"No, suh, kunnel, dey proved it on me all right, but dey 'lowed I was drunk an' didn't know what I was doin', so dey clard me, kunnel—bress de Lawd!"

THEY PAY THE FREIGHT.
Two old pals met on the street.
"I sit you in the liquor men's parade Tuesday," one of them said.
"Oh, y s."

"Now tell me about it. Who were those fellows in front on horses?"

"Thos 'r ' 'Why those were the ables lers."

"Well, who were those fellows in arrears?"

"Those fellows in pug hats, smoking the big, black cigars?"

"Yes."

"They were the distillers and brewers."

"Who were those fellows walking here with the white pug hats, white coats and gold-headed canes?"

"I ty wer- the retailers."

"Who were those fellows that brought up the rear?"

"F fellows with cauliflower noses and fringe on their pants—the crowd that I was with."

"Yes."

"Oh, they were the consumers."—The Delewarean.

An Insignificant Guest.—Mamm—"Did you attend the wedding?"
Cupd—"Yes, I was among the also present."—Brooklyn Life.

The people of Marou, Ga., do many things to show the world that it is a live town. A farmer there erected, in a cemetery, a conspicuous and expensive monument to himself. The residents bombarded the marble shaft with revolvers. The farmer then offered \$500 reward for the conviction of any one who had a hand in the disfigurement of his monument. The people burned him in effigy and offered \$1,000 to any one who could find out who they were.

Worry.
A Sure Starter for Ill Health.
Useless worrying in form of nervousness is indirectly the result (through the nervous of improper feeding). A furniture man of Memphis says:

"About a year ago, I was afflicted with nervous spells, would worry so over trivial things.

"I went to consult one of the best physicians in Memphis and he asked among many questions if I drank coffee.

"His advice was: 'Go to some provision store and get a box of Postum drink it in place of coffee and as you are confined to your bed to a great extent try and get out in the open air as much as possible.' I followed his instructions regarding the Postum.

"At that time my weight was 141 and I was taking all kinds of drugs and medicines to brace me up, but all failed; to-day I weigh 165 and all of my old troubles are gone, and all the credit is due to having followed this wise physician's advice and cut off the coffee and using Postum in its place.

"I now consider my health perfect I am willing to go before a notary public and testify that it was all due to my having used Postum in place of coffee." Name given by Postum Co. Battle Creek, Mich.

There's a reason for quitting the drug-drink coffee, and there's a reason for drinking Postum. Trial 10 days, proves them all.

Look in each package for a copy of the famous little book, "The Road to Well-being."

A Wish.—"I thinne—" Oh, I wost I had your voice!"
Tulcke—"No doubt you would enjoy using it."
Thinne—"No taint that, but I was thinking if it were mine I could stop it when I liked."—Boston Post.

FIBROID TUMORS CURED.

Mrs. Hayes' First Letter Appealing to Mrs. Pinkham for Help:
"DEAR MRS. PINKHAM:—I have been under Boston doctors' treatment for a long time without any relief. They tell me I have a fibroid tumor. I cannot sit down without great pain, and the soreness extends up my spine. I have bearing-down pains both back and front. My abdomen is swollen, and I have had bowing spells for three years. My appetite is not good. I cannot walk or be on my feet for any length of time.

"The symptoms of Fibroid Tumor given in your little book accurately describe my case, so I write to you for advice."—(Signed) Mrs. E. F. HAYES, 252 Dudley St. (Roxbury), Boston, Mass.

Mrs. Hayes' Second Letter:
"DEAR MRS. PINKHAM:—Sometime ago I wrote to you describing my symptoms and asked your advice. You replied, and I followed all your directions carefully, and to-day I am a well woman.

"The use of Lydia E. Pinkham's Vegetable Compound entirely expelled the tumor and strengthened my whole system. I can walk miles now.

"Lydia E. Pinkham's Vegetable Compound is worth five dollars a drop. I advise all women who are afflicted with tumors or female trouble of any kind to give it a faithful trial."—(Signed) Mrs. E. F. HAYES, 252 Dudley St. (Roxbury), Boston, Mass. \$2.00 for the first of above letters proving genuineness cannot be produced.

HOW THEY GO
