CASTELLAR ON THE MESSAGE IT IS NOT UNFAVORABLE TO SPAIN.

The Spanish Statesman Thinks the Preto Arrest the Impatience of the Jingoists in This Country and That Nothing Will

MADRID, Dec. 14.-Senor Emilio Cas tellar, the noted Spanish republican leader, gives the following statement of his opinion of that part of President Cleveland's message which refers to the Cuban question: "I do not consider the President's message unfavorable to Spain, because the attitude of Mr. Cleveland reminds me of that of General Grant in 1873, only that Mr. Cleveland reads harder lectures to the insurgents and the jingo elements in the United States. His silence on Cuban independence and his opposition to recognition of belligerency shows really honest, correct, statesmanlike conduct. So does his official disposition toward Spain. I persist in believing that the more reasonable, the far sighted element of the American peo-ple, the old Puritan stock, will give us fair play. I approve the temporizing attitude of Mr. Cleveland in the first part of his message. I consider his re ply to the party resolution of the American congress last winter as a damper for the insurgents. In the lat ter part of the message undoubtedly there are unpalatable declarations, against which all patriotic Spaniards protest-for instance, what he says about the sale of Cuba, the inaccurate statements concerning the situation in the colony and the condect of our forces and generals. But we must distinguish in the latter part of the message between the purely hypothetical surmises as to what America would deem herself justified in doing if the Spain were impotent to crush spain were impotent to crush the insurrection promptly, and the friendly advice and suggestions vol-' unteered by Mr. Cleveland when he recommends and even offers to cooperate in obliging the Cubans to we ourselves offered them a large installment of in the law which the Cortes passed last year. We must be practical and understand that this part of the message is calculated merely to arrest the impatience of the public in the United States and to check once for all any European power attempting to interfere with the pol-itics of the new world. Mr. Cleveland thus gains time and allows us to expect that he will remain friendly to the end of his term of office." LIBERTY, MO., VIGILANTES.

## GOV. SMITH IMPUGNED.

Ex-Clerk Redding Makes Sensational Statements About the Home Manager.

WASHINGTON, Dec. 14 .- William F. Redding, an inmate of the Hampton, Va., Soldiers' home, who was the clerk of Governor Smith of the Leavenworth home from 1889 to 1892, appeared today before the House committee investigating the Leavenworth home and testified that he drew the contract with the Leslie Keeley institute, by which cures of the morphine and alco-hol habits were to be administered to the inmates. By the terms of the con-tract, \$10 was to be charged for the cure of the morphine habit and \$8 for the alcohol habit.

Redding swore that on one occasion Governor Smith told him, when it was suggested that the temperance societics should give him a medal for his activity in pushing the Keeley cure, that he did not want a medal, what he wanted was "the \$1,000." This was when negotiations with the institute were pending. He also testified that lovernor Smith raised the sum charged to inmates for the administration of the cure to \$20, although the contract price was \$8. He said that Governor Smith took the cure himself, and that subsequently he (Redding) saw Smith under the influence of liquor. He testified that Governor Smith frequently went to Excelsior Springs and remained for several days.

Redding testified to various minor incidents tending to show Governor Smith's arbitrary and oppressive treat-ment of the inmates. He attributed his removal from a position he held at the Northwestern home to Governor Smith's influence. He was the only witness to-day.

# **DEATHFOR TRAIN ROBBERS**

**Governor Stone Speaks in Most Positive** Terms of the Crime.

JEFFERSON CITY, Mo., Dec. 14 .-- Governor Stone this afternoon offered a reward of \$100 each for the arrest and conviction of the persons connected with the attempted train robbery on the Iron Mountain road in St. Louis Wednesday night, and \$200 for each of the robbers who might be sentenced to death.

The governor said of train robbery: "In 1895 a law was enacted by the legislature of this state making train robbing a capital offense. I heartily endorsed the enactment of this law. Train robbing is a crime which greatly endangers human life, as it is accom panied by circumstances of risk and danger and is perpetrated by armed and desperate men. It is usually accompanied by actual violence done those in charge of trains accept autonomy or home rule, which and express cars. But in addition to the foregoing it is a crime which brings a state into public disrepute greater than that of any other crime in the calendar of which I have knowledge. Its frequent occurrence will do incalculable harm to the state. It is a crime that should be broken up, and I confess disappointment and impatience that juries do not deal with criminals of this class with the utmost severity. The execution of a few of these highwaymen—a punishment always richly deserved—would, in my judgment, put an end to this descrip-tion of crime in this state.

## SILVER SENATORS NOT WITH THE GOLDITES.

ARE AWAY TO STAY.

They are Out of the Republican Fold for Keeps-Mr. Dubois Resigns His Position of Caucus Secretary and Steering Committee Member-Non-Bolting Silver Men all in the Conference.

## No Caucus for Bolters.

WASHINGTON, Dec. 9.-When the determination was reached to hold a Republican caucus to-day it was not decided whether to invite the silver Republican senators who bolted the St. Louis platform and ticket to attend the caucus, and many conferences were held. Mr. Chandler of New Hampshire was particularly active in recommending that the bolters be notified of the caucus-practically an invitation to attend. Senator Quay took the same view and it was finally concluded that notice should be sent to them as before.

This placed the burden of action on the silver Republicans. They conferred until late in the night to settle upon a line of policy, and when the caucus met Messrs. Teller, Dubois, Pettigrew, Mantle, Cannon and Squire were conspicuous by their absence. All of them except Mr. Teller were in the city and could have attended if they had been so disposed. Indeed some of them were in their committee rooms in the capitol while the caucus was in progress.

The following letter was sent by Senator Dubois to the caucus and was read soon after the meeting was called to order by Senator Sherman:

"I hereby resign my position as scr-retary of the cancus of Republican senators. I also resign my position as a member and secretary of the Republican advisory or 'steering' committee of the Senate.

The silver men had found it impossible to communicate with Mr. Teller, but all expressed confidence that if here he would not have gone into the conference.

If the bolting silverites were conspicuous by their absence, the silver men who remained within the party were, as a rule, exceptionally prompt in their attendance. Mr. Carter, who refused to accept the Dingley tariff bill and decined to walk out of the St. Louis convention, was the second man to enter the caucus chamber, and he was followed closely by Messrs. Wolcott, Mitchell, Shoup, Hansbrough, Cameron, Pritchard, Perkins and Clark, who heretofore had always voted for silver when the question was before the Senate.

## THE ACTION OF THE CAUCUS.

Mr. Dubois' resignation was received without a word of comment. "We have just closed up the ranks and marched on," said one of the participants, in referring to the incident after the close of the meeting.

Mr. Lodge moved the election of Mr. Wilson of Washington as secretary, while Mr. Shoup was placed on the steering committee, which was en-larged by the addition of the name of Mr. Hansbrough of North Dakota.

The Dingley tariff bill was referred to the steering committee with instructions to investigate as to the likelihood of getting it through and to devise a means to that end if possible. It was the prevailing opinion that the best policy demanded the passage of the bill if possible, but the opinion seemed to be quite as general that this was not within the range of possibility. Mr. Gear brought up the Pacific railroad question, as did Mr. Lodge the immigration bill. The former was referred to the steering committee, but after Mr. Lodge had explained the status of the immigration bill, the caucus desired to stand by that as a party measure and to press for its early onsideration. The cancus also decided for an international agreement on silver by agreeing to a resolution introduced by Mr. Wolcott for a special committee of five members of the caucus to recommend some plan looking to an international conference with the leading commercial nations of the world for the promotion of bimetallism.

## **RESOURCES OF ALABAMA.**

Recited in the Inaugural Address of Governor Johnston.

Governor Joseph F. Johnston was inaugurated governor of Alabama Dec. 1. Before taking the oath of office he delivered a long address, sounding the keynote of his administration, which is to promote the development of Alabama's resources and improve the condition of her people. Speaking of the resources of the state he said:

"With an area of but little more than fifty thousand square miles, there is no territory of like size in the known world so prolific in the variety of its resources; were a wall erected around our state, cutting off all access, we could produce within our borders everything necessary for the comfort or convenience of man. Great veins of iron ore and seams of coal put at our command almost boundless resources in fuel, iron, and steel. Splendid forests of yellow pine here stand ready to build homes for millions of people. Building stone and marble, fire clay, kaolin and lime exist in great abundance; walnut, maple, oak, cherry, ash and other hard woods await the hand of man for manufacture or the adornment of our homes. In the production of pig iron we take rank as the fourth state in the union; in iron ore, third; in coal we stand fifth; in the production of cotton, fourth, and in its manufacture, fourth. In lumber we are near the head of the list. It would be unjust should I fail to include in our minerals copper, lead, graphite, marl and gold; indeed, the only mineral that we seem to be without and to want most is silver. Leaving forest and mine and coming to our fields we find that they produce generously cotton, corn, wheat, rye, oats, tobacco, rice and the grasses and here is the home of the pear, the peach, the grape and all small fruits. Vegetables are grown with great success, and this industry is steadily developing. Our splendid rivers, the Alabama, Coosa, Tallapoosa, Warrior, Cahaba, Bigbee and the Tennessee, are the liquid arteries of the commonwealth, fed by innumerable creeks, all fruitful in power to convert our raw products into articles of merchandise. Over 3,000 miles of railroads traverse our state from north to south, and east to west, furnishing quick transportation to market for our products. When we come to our climate we find that the Giver of all good things has not stayed His hand, and that He has blessed us with opportunity to labor twelve months in the year without detriment to health or comfort. Indeed, we can scarcely appreciate the blessings we enjoy in this respect when compared with less favored regions, for even now we are seemingly unconscious that roses are blooming in our gardens, and the fragrant air is sweet with their perfume. · · With a profound gratitude to the God of our fathers, that our lots have been cast in this sunny land, let us beseech Him to send warmth and vitality and enduring growth into every field of endeavor, that will make us strong to accomplish the things that
