GOSSIP. FREE SILVER RESOLUTION.

Senator Chandler Introduces a Bimetallie Resolution in the Senate.

WASHINGTON, Feb. 4. - The feature of the senate yesterday was the very spirited debate on the conference report on the immigration bill. Mr. Gibson of Maryland opposed the report, and Mr. Lodge defended it. After two hours' struggle the report went over and the Nicaragua canal bill was taken up, Mr. Vilas continuing his remarks. Mr. Teller, of Colorado, also entered the debate in opposition to the measure.

Early in the day Mr. Chandler introduced a resolution, the full text of which follows:

"That it is the sense of the Senate that the United States Senate should not permanently acquiesce in the single gold standard, and that the efforts of the government in all its branches should be steadily directed to secure and maintain the use of silver as well as gold as standard money, with the free coinage of both under a system of bimetallism, to be established through international agreement, with such safeguards of legislation as will insure the parity of value of metals at a fixed ratio, fernish a sufficient volume of metallic money and give immunity to the world of trade from violent fluctuations of exchange.

The bill was passed pensioning the surviving members of Gray's battalion of Arkansas volunteers.

Among the bills presented was one by Mr. Mills. Democrat, of Texas to nerease the pensions of the survivors of the war of 1812 to 830 a month.

ABOUT RAILROAD TRAVEL.

What It Cost to Carry Passengers on

Western Roads. There is a surprising amount of misinformation among the people regarding the cost of carrying passengers on railroad trains and to this dition as a public mind is doubtless due much of the sentiment in favor of lower rates, which is finding expression through bills for sweeping re ductions in the legislature of many of the western states this winter.

Mr. P. S. Eustis, General Passenger Agent of the C., B. & Q. R. R., in argument before the house committee of the Missouri legislature last week on the two cent bill gave some valuable and surprising information about the passenger business in the west. statements were based upon the reports of the Inter-state Commerce Commission and the Railroad and Warehouse Commission of Missouri and are therefore beyond question.

Mr. Eustis showed in the first place that the volume of passenger traffic on railroads is dependent upon the density and wealth of population in the territory through which it runs, and then compared the population of Missouri and the traffic resulting from it with the same figures in other states, thus clearly illustrating the theory of his point.

The following table showing the relative population and rates is interesting in this connection:

Population reven \$ 977.00 2075.00 Illinois 68 Ohlo New York122 New England200 4513.00 4422.00

Mr. Eustis made the statement that while the named rate in most of the western states was three cents per mile, the actual amount received is considerably less than that sum. This is due to the fact that the railroad having a long line between two points cannot charge more than the fixed by a road having a shorter line. and to excursion rates demanded by the people, all of which reduce the

average rate materially. But the most surprising assertion made by Mr. Eustis was that the western roads, with possibly one or two individual exceptions, carry passengers at an actual loss. The St. Louis, Keokuk & Northwestern was cited as Mr. Eustis produced a an instance. Mr. Eustis produced a statement of the expense on that road to show that the cost per passenger per mile exceeded three cents, the legal

The report of the Inter-state Commerce Commission referring to the railroads of Illinois, Iowa, Wisconsin, Minnesota and that part of the Dakotas and Missouri lying east of the Missouri river shows that it cost the railreads two and three one-thousandths cents per mile to carry passengers exclusive of any charge for taxes, rents, interest on mortgages and other items of the kind. Mr. Eustis declared that a two cent flat rate in Missouri would reduce the average to one and three quarters cents if not lower.

It was shown that lower rates do not largely increase traffic and instances were cited where reductions from four cents and three and one-half cents to three cents per mile did not result in increased travel.

Answering the question as to whether or not rates in Europe were not lower than in this country, Mr. Eustis showed that while the third class rate on some European lines is lower, the second class rates, which are paid by the great traveling public, are higher than American rates. The conveniences of second and third class travel in Europe are not to be compared with those of America in point of comfort and convenience.

She Beat Her Hosband.

Among the carious results of the recent battle of the ballots one of the most interesting from many points of view is the election of Mattie Hugher Cannon to the state senate of Utah by an immense plurality over her opponent, Angus M. Cannon, who, alas for the future peace and quiet of the Cannon household, is the husband of the senatoress-elect. The advent of Mrs. Cannon into the Utah state senate may. however, exercise a perturbing influence over a wider circle than that which circumscribes the domestic realm of Mr. Canton.

The prospect of the election of women to the higher legislative assemblies has filled some apparently unprejudiced observers with alarm because of the paralyzing effect which it is feared their presence may have upon debates. The relations which nature and usage have established between man and woman would make rudeness impossible. Men would be restrained from saying what they might have to say in the manner to which they are accustomed among themselves. It would be difficult for a male debator to say fully is fully if the utterer of the remarks open to such criticism should happen to be a woman. Debate would cease to be an engine for the elucidation of fundamental truths and would become a mere series of decorous and inconclusive declamations.
