How the Germs are Nurtured and the Disease is Spread. It would seem that people will never learn to be careful. The recent alarming spread of that dire epidemic, smallpox, throughout different sections of the country has been traced by physicians and sanitarians in many instances directly to the moldy and rotting layers of paper and paste which cover the walls of many houses. The practice of laying layer after layer of paper on a wall, using common creosote paste, is especially calculated to create homes for disease germs. People could not do more to effect such a result if they tried. The rotting vegetable matter affords caves from which are ready to dart forth the infection at every opportunity. There is no excuse for this practice, as walls and ceilings can be coated with a pure, clean and sanitary material like Alabastine, for instance, at no greater expense. Alabastine is a rock-base cement, which incorporates itself with the wall or ceiling. It is easily applied, comes ready to mix with cold water, requires no washing or scraping before renewing or retinting, is beautiful, long-lasting and safe.

My Hair Was Turning Gray

"I wish to testify to the merits of Ayer's Hair Vigor. My hair was falling out and turning gray very fast. But your Hair Vigor stopped the falling of the hair and restored it to its natural color."—Mrs. E. Z. Benomne, Cohoes, N.Y., April 21, 1899.

You Look Old

It's impossible for you not to, with the color of seventy years in your hair! Perhaps you are seventy, and you like your gray hair. And perhaps not! Dark hair for youth and vigor; gray hair for old age and decline. If you will use Ayer's Hair Vigor, in less than a month there won't be a gray hair in your head. It keeps the scalp free from dandruff, stops falling of the hair, and makes it grow thick and long. Price 25¢ a bottle. All druggists.

Write the Doctor

If you do not obtain all the benefits you desire from the use of the Vigor, write the Doctor at once. He will tell you just what to do, and will send you the book on the Hair and Scalp if you request it. Address: Dr. J. C. Ayer, Lowell, Mass.

As to the value of conversions, God alone can judge.—Goethe.

Use Magnetic Starch—it has no equal. Though "The Biography of a Grizzly" and "The Autobiography of a Quack" have their course in the Century, Dr. Weir Mitchell and Ernest Seton-Thompson are both contributors to the March number of that magazine. Mr. Seton-Thompson begins a study of "The National Zoo at Washington," in which he shows wild animals to be as interesting in captivity as in their natural state of freedom. His text is, of course, fully illustrated. Dr. Mitchell, in "Dr. North and His Friends," presents the opening chapters of the most important serial he has written since "Hugh Wynne." It is a novel embodying the results of a long life of observation, reflection and experience.

It has been observed that artesian wells have a daily period of ebb and flow, as well as the ocean tides, only the process is reversed. The time of greatest flow of an artesian well is the period of low tide in the ocean.

6,434 Letters a Day. The John A. Salzer Seed Company, LaCrosse, Wis., received 6,434 orders last Monday, which is a monster day, but they expect to double this number by the middle of March. The firm is having a great trade in its specialties—potatoes, speltz, Bronus Inermis, rape, Big Four oats, Three-Eared corn and earliest vegetables. There is a wonderful demand for onions, cabbage, peas and bean seed this year. Early Bird radish and Lightning cabbage, the earliest of this kind in the wide world, are having a tremendous sale.

Who are injured by the use of coffee. Recently there has been placed in all the grocery stores a new preparation called GRAIN-O, made of pure grains, that takes the place of coffee. The most delicate stomach receives it without distress, and but few can tell it from coffee. It does not cost over one-fourth as much. Children may drink it with great benefit. 15 cents and 25 cents per package. Try it. Ask for GRAIN-O.

Where Water is Not Needed. Among the distinguished officials who will represent this country at the Paris-exposition next May, is Prof. Elwood Mead, the State Engineer of Wyoming and an irrigation expert of the Department of Agriculture, relates the Saturday Evening Post. He was speaking at a meeting upon a local water improvement, and after expatiating on the benefits which would be derived by the farmer, miner, and even the manufacturer, he said, "And this extra supply of water is absolutely necessary to our dairymen." Before he could begin the next sentence a townsman called out: "Stop right there. They give us too much of it already."

Danger from Damp Linen. Damp linen is sufficient to account for frequent colds, consumption and premature death of a whole family. Rheumatism, when produced from damp linen, develops into a form which is generally incurable. All body linen, shortly before putting on, should be made dry by a good fire. Those who have experienced no signal evidence of the mischief of damp linen are apt to be careless on the subject; but the carelessness will inevitably entail its punishment, which is likely to accumulate insidiously until it is too late.

WHAT SOUTH AFRICANS EAT.

The Peculiar Diet of the Native Savages—Ants and Mice. German missionary who has just returned from South Africa recently delivered a lecture before the Berlin Geographical society, in which he brought forward the following particulars concerning the peculiar diet of the native savages of the Transvaal, especially as noticed among the Basutos, the tribe which is now threatening to take up arms against the British, says the Philadelphia Record. One of their most characteristic hunts is the mouse hunt. Twenty to thirty Basutos gather together; they march off carrying strips of nets made by them for this purpose and, accompanied by a large number of dogs, about whose bodies different sized bells are bound. The dogs make a big sweep round the countryside, while the Basutos attach their various strips of nets into one long semicircular barrier, the lower part of which is pinned to the ground. Then, crouching upon the ground and holding their sticks ready, they wait the coming of the mice. These, frightened by the bells dangling from the dogs, gradually draw nearer and nearer to the net, along which they are at last found running in a vain effort to discover an opening through which they may escape. When the number of these victims is sufficiently great a shrill cry is emitted by the chief, the net is pushed forward all along the line, and the struggling creatures caught in the meshes of the net are unmercifully whipped to death by the jubilant savages. Monkeys, constitute one of their favorite tid-bits, which are all the more appreciated as they are not so readily caught. Snakes are simply killed with blows from a switch and are generally in high favor. According to the missionary their popularity is well deserved. He himself took part in a meal in which snakes formed the chief attraction and found that this animal could be favorably compared with a prime eel. Most popular of all delicacies, however, are the caterpillars. It is not unusual to learn of a quarrel which has broken out among the natives for the possession. The most favorable time for catching them is the early morning and late evening hours, when their wings are heavy with dew and they are unable to see clearly. The children of the mission, numbering about 400, have organized a locust hunt, succeeded one day in capturing no less than 160 pounds of these insects, which were consumed with the greatest avidity before the day had passed. At certain times of the year the great white-winged ants leave the earth, and it is then that a most zealous competition arises between the Kafir children and the chickens of the dorp for the possession of the prized morsels. It is at such times that the Kafir youngsters may be seen running about with their mouths stuffed full of ants, and, if the chaff has been especially successful with both fists also full of these succulent dainties.

Why She Loved Him So. The memoirs of Jules Massenet bring up an incident of his courtship told by Coquelin. It seems that when Liszt, Scambati and Massenet were studying together in Rome they all became fascinated with the daughter of an aristocratic Frenchman. The trio spent their spare time composing and playing themes to the object of their affections. One evening the young woman showed marked favor to Massenet, and he proposed to her, after having asked her father's consent. He followed her to Paris in a few days, where he was accepted by her and the marriage soon took place. One day Massenet said to his bride before a party of friends: "My dear, do you remember the day you first showed me that you preferred me to Scambati and Liszt?" "Yes," "Well, do you know, besides proving to me that you loved me, it also gave me great joy to know that you believed I played so well, even excelling the others?" "Oh, but it wasn't that," answered his wife quickly. "It was because you played so badly that my love went out to you." It is said that the great composer never referred to the incident again.—Philadelphia Saturday Evening Post.

Color of the Eyes. It is not generally known that the eyes of infants are always blue, and that they do not begin to assume their permanent color until the sixth or eighth week. There is, therefore, truth as well as poetry in the statement that babies look about them in "blue-eyed wonder." The wonder may be left to poets and philosophers, but the blue is always a practical fact. It is not uncommon to see different colors in the eyes of the same person, and even in the same eye half of the iris is sometimes brown and the other half blue. There is a popular notion that dark eyes are stronger than light ones. There is no truth in this except so far as they are better protected against excessive light. Hence light eyes prevail among northern nations and dark eyes among the races who live in the glare of a tropical sun.

The above illustration shows one of the mammoth buildings occupied by the great Mail Order House of the John M. Smyth Company of Chicago. For one-third of a century this company has been in business. Beginning in a small way, they supplied their neighbors in the near-by towns, each year widening their field. They are now selling merchandise direct to the consumer at wholesale prices throughout the United States. Some years ago they began supplying their customers with an illustrated catalogue. As the business expanded they were obliged to increase the size of this catalogue, until today it exceeds 1,000 illustrated pages, quoting the lowest wholesale prices on everything to Eat, Wear and Use. By a superior process of color photography they illustrate many of their goods in natural colors, bringing out the rich color value of curtains, carpets, draperies and the latest designs in wall paper, etc., thus enabling the customer hundreds of miles distant to select goods at his own fireside, knowing by the description, illustration and price the class of goods he may expect. This feature of their business is becoming more and more popular each year, for it not only saves long and tiresome railroad journeys but is a great time saver. It leaves out the profit of the jobbing retailer, the expense of the expensive commercial traveler, the general agent, the sub-agent and thus eliminates from one to four profits, saving the amount for the consumer. In short, it is a great wholesale store brought to the home. The mammoth catalogue referred to is a 20th century dictionary of economy. The illustration below shows the recent building added to this great enterprise. The success of this Company seems incredible, considering the fact that they have advertised so little. Their spirit of

fairness and industry is the secret of this wonderful success. The quantity of goods they require in some lines enables them to handle train loads of merchandise secured at the lowest possible cost and freight rates. When goods in the rough are coming from the mills and factories in the East, the like steamers are pressed into service at a freight expense which is but little in advance of the iron ore rates. Their references are: Any bank or express company, or any man, woman or child in Chicago.

Sleep for Skin-Tortured Babies

In a Warm Bath with Cuticura SOAP

And a single anointing with CUTICURA, purest of emollients and greatest of skin cures. This is the purest, sweetest, most speedy, permanent, and economical treatment for torturing, disfiguring, itching, burning, bleeding, scaly, crusted, and pimply skin and scalp humors with loss of hair, of infants and children, and is sure to succeed when all other remedies fail.

Millions of Women Use Cuticura Soap

Exclusively for preserving, purifying, and beautifying the skin, for cleansing the scalp of crusts, scales, and dandruff, and the stopping of falling hair, for softening, whitening, and soothing red, rough, and sore hands, in the form of baths for annoying irritations, inflammations, and chafings, or too free or offensive perspiration, in the form of washes for alleviating weaknesses, and for many sensitive antiseptic purposes which readily suggest themselves to women, and especially mothers, and for all the purposes of the toilet, bath, and nursery. No amount of persuasion can induce those who have once used it to use any other, especially for preserving and purifying the skin, scalp, and hair of infants and children. Cuticura Soap combines delicate emollient properties derived from CUTICURA, the great skin cure, with the purest of cleansing ingredients and the most refreshing of flower odors. No other medicated or toilet soap ever compounded is to be compared with it for preserving, purifying, and beautifying the skin, scalp, hair, and hands. No other foreign or domestic toilet soap, however expensive, is to be compared with it for all the purposes of the toilet, bath, and nursery. Thus it combines in ONE SOAP at ONE PRICE, viz., TWENTY-FIVE CENTS, the best skin and complexion soap, the best toilet soap and best baby soap in the world.

Cuticura Complete External and Internal Treatment for Every Humor

consists of CUTICURA Soap (25¢), to cleanse the skin of crusts and scales and soften the thickened cuticle, CUTICURA OINTMENT (50¢), to instantly allay itching, inflammation, and irritation, and soothe and heal, and CUTICURA RESOLVENT (50¢), to cool and cleanse the blood.
