BACK FROM GERMANY.

Mrs. Ohme stopped in the city until taking. Tuesday, the guest of Mr. and Mrs. Oliver Dubry. Mr. Ohme made this office a friendly call last Saturday and stated that his trip across the water was indeed a pleasat one. He says that there is not much improvement made in the method of farming in the old country from that of fifty years ago. But a wonderful change has taken place in point of manufacturing industries, especially sugar factories, which have sprung up all over the country, and the principal occupation of the farmer there is to grow sugar beets for the market. On almost every farm, which of course, is emall in acerage, is located an immense stone building used for storage of all kinds of feed and also for all kinds of stock raised on the farm. Hogs and cattle that are being raised and fed for the market are not permitted to see the light of day from the time they are born until ready tor the market. Ground in that country is to valuable to leave even space enough to build a hog pen outside the building and all animals are raised practically in a dungen with but very little if any ventilation. Mr. Ohme explained that in many places it was even necessary to light a match to feed the hogs, and the cooped up pen in which the hogs were kept issued a very odious smell. And yet, says Mr. Ohme to his old friends, after explaining the methods of raising stock in this country. "You Germans will condemn the A merican pork and beef." We under-
