"Dear Annie!" ejaculated George.

"Dear Annie!" replied the Earl with a sigh. "She is one of the daughters of God, I am not worthy to call her mine, but I have sat at her feet, and learned how to love, and how to forgive, and how to bear disappointment. Rear Admiral Rodgers, new commandant of the Brooklyn navy yard, is not at all pleased with the band that has been sent him from Washington. The leader and all the members are Italians and none of them knows a word of English. Exasperating errors are made during the marching exercises of the marines, while the playing at all times is very bad. The pay in the band service of the navy is so low that American musicians will not enlist, so most of the recruiting is done at European stations.

TALES OF PRECIOUS STONES.

Diamonds Were Not Known to Us Until the Discovery of India.

Not until India was discovered were diamonds known to the Western world. The Indians called rock crystal an "unripe diamond," and up to the eighteenth century India was supposed to be the only country where that precious stone could be found. Yet as far back as 500 B. C. a "didactic history" of precious stones was written, and in Pliny's time the supply must have been plentiful, as he wrote: "We drink out of a mass of gems and our drinking vessels are formed of emeralds."

It is difficult to determine whence all the gems came, as discoverers took care to leave no record. The nations which traded in them were afraid of their whereabouts being known, and even the most ancient merchants would not disclose any definite locale. "Diamon" was the name given to a youth who was turned into the hardest and most brilliant of substance to preserve him from "the ills that flesh is heir to." Amethyst was a beautiful nymph beloved by Bacchus, but saved from him by Diana, who changed Amethyst into a gem, whereupon Bacchus turned the sem into wine color and endowed the wearer with the gift of preservation from intoxication The pearl was thought to be a dewdrop the shell had opened to receive. Amber was said to be honey melted by the sun, dropped into the sea and congealed.
