In looking over the house recently constructed by George Zimmerman we find that he has built for a home in this city an up-to-date dwelling. It is of a very good size with six very nicely arranged rooms and a porch the entire length on the south and extending a considerable distance on the west. The sitting room is lighted on the south and west with two large double windows set with plate glass. The well is on the kitchen porch on the south and everything about the house is arranged equally as handy. He has also built a fine barn and has a city property that anyone might feel proud to own. We went, one day this week to see the new residence of Mr. A. M. Bennett and found that gentleman very busy putting on lath and getting ready for the plasterers. His house is a two story frame and very conveniently arranged, both up stairs and down. The dining room, with a bay window looking to the west, is 12x24 in size. The hall way is of good size and from it is a door to the right into the parlor. It also contains a flight of winding stairs to the upper story which contains three large bed rooms with a splendid view to the north, south and west. The view in the west is overlooking every part of the city and directly through the main street of the town. This room, Mr. Bennett has chosen as his own. Each bed room has commodious closets. The house presents a pretty appearance on the outside but the inside is even more beautiful because of the convenience it affords in each department.
