vets." is what the leading couturieres say when asked the question as to what will lead in the early winter at the center front, the waist invisstyles. And, furthermore, they add that when the gown is of cloth-and some of the new cloths are sheer and fine as chiffon-it simply must be trimmed with velvet. It must show inches wide, 3½ yards 27 inches wide miliar flat pouch-shape, the round pil. to tell you, Jackson, that your first ed his mother, rather anxiously. the imperative touch of velvet some or 2 yards 44 inches wide, with 76 low, bigger than ever; and nowadays pulling of rhubarb is quite a success "Why, where or how do you feel where or other, else it cannot hope to | yard of all-over lace for yoke and | they term the Victorian what used to | pass muster with the season's styles collar and % yard of silk for scarf be called the granny muff. among modish dressers.

Never was there a woman to whom velvet would or could prove unbecoming. She has only to study her style, her type, her complexion, decide upon girl, is assured.

The front panel is quite the newest thing in skirts. Most of the small hats are tricornes

or boat-shaped turbans. The crown is quite distinct from the

brim in the new turbans. Tulle is one of the latest trimming ideas and is used in great quantities. Coq de roche is most effective as a

relief note with gray-green and brown. Not for years has the separate wrap been such an important feature of dress. Ribbon of two contrasting shades is

very smart for trimming tailor hats. Lots of fire brown and spinach green will be exploited in panne velvet and

The plush coat, put away years ago, is to make its reappearance this win-

Aigreties are to be much worn and are of spangled and jetted tulle for turbans.

How to Fit a Sleeve.

The long shoulders of the moment sometimes give a lot of trouble to the amateur dressmak r. The correct way to fit them is to put the under part in first. Tack the full portion of the sleeves into small plaits and make them perfectly fit the size of the arm-

The effect is prettier if the plaits are loosened after the bolero is fitted. but if desired they can be left stitched for a few inches from the armhale. There are many devices for obtaining the long shoulder effect without actually cutting the long seam, which is so difficult. For example, embroidery and lace can be arranged so as to have the points running down over the top of the arm, and this will be found very effective.

Frozen Tapioca Custard. "Table Talk" gives this recipe for a

delicious dessert: Cook one cupful o fine tapioca in one quart of milk until it looks clear and quite thick. Stir often for the first ten minutes to prevent lumping. Beat together the whites of two and the yolks of three eggs until light, add one cupful of sugar and beat again. Turn this into the cooked tapioca and stir constantly until it thickens like custard, then take from the fire and set away, covered, until cold. Add two teaspoonsful of vanilla, turn into the previously this in thoroughly, finish the freezing, seams. more before serving.

For Those Inclined to Stoutness. The girl whose waist measure exceeds twenty-four inches will find that a girdle that is boned under the arms and droops to a decided point back and front decidedly decreases the apparent size of her waist. The long sloping line will afford grace and slenderness and the addition of a short sash in the back will prove wonderfully becoming.

Plants in Windows. The position of plants in a house depends altogether on whether you wish a symmetrically developed plant which will look well on yield pleasure from all points of view. or whether you wish your window to look most attractive from the outside. In the first case you will turn your plants occasionally. In the last you will leave them in the same position all the time.

One ardent lover of flowers has long windows in her parlor, almost to the floor. She gives them up entirely to her plants. In each window is a plant stand filled with various choice specigives peculiar grace to the whole and mens of different kinds. The plants get no direct sunshine, but siey have are equally correct. good light and the sun's rays fall on them diagonally a part of the day. are never turned. Of course they grow to flare freely at the lower. At the regulation stock. The lining is closed outside, but enough can be seen from inches, without flounce.

About Muffs. Muffs are a very important item in ibly at the left side on a line with the fashionable girl's winter outfit; and the new ones are just as quaint The quantity of material required and cid-timey as are the smart effects for the medium size is 414 yards 21 they accompany. There are the fa-

WHY ILLINOIS IS "SUCKER."

Preacher at Banquet Says That Na tives Believe Big Stories.

In modern Egypt, which is in the southern part of Illinois, some of the native men gave a banquet in hono There were many speeches in praise and panegyric of the chief guest. They were superlative to that degree which is the full tether of grammar. A young preacher present was moved thereby to get so far back as the com parative in a story. He said:

"A short time ago I attended a ban quet in Indiana at which were pres in turn the speakers of the occasion soared to the empyrean many times and swept the skies and gatherec stars in their glowing and extravagan The Texan was eloquent about the lurid concerning 'the dark and blood ground,' the Ohioan went wild on 'buckeyes,' and one was moved to sa! something for Illinois.

"'We of Illinois,' he said, 'frequently hear these beautiful boosts of other states, and we not only listen with bated breath and profound interest but believe it all implicitly. The rea son for this is that we are, individu is well known throughout the civiliz Jersey, simply suckers.'

"We at this table to-right," the th age of seventy-three. young preacher concluded, "believe al that has been said of our distinguish ed guest, as is becoming to true 'Suckers.' "

Not Even Then.

A Yorkville police court lawyer de fended a policeman at the police trials before Deputy Commissioner Linds ley. The patrolman was charged with it, be happy without it. striking a roundsman with his night

"Why didn't you arrest him?" asked the lawyer.

"I don't arrest in such cases," re plied the roundsman. "In all cases order the offender to the station nouse."

"But a weapon was used in th case," persisted the lawyer. "The made it a felonious assault."

"Yes, sir." "Suppose that this defendant had drawn his revolver and shot you dead

"Nothing," answered the rourds then '-New York Sun.

DANGER IN SMOKING

Abnormal Heat in the Mouth a Menace to Health-Even Lungs and Stomach May Be Affected, Especially in the Hot Weather.

"Speaking of the smoking habit, do

THE WEED.

you know I have made what seems to me to be an important discovery and I was reminded of it just now by a remark some fellow made in connection with the heat of the smoke we suck into our mouths through a pipestem or the end of a cigar," said a user of the weed to a New Orleans Times-Democrat. "Few persons who smoke have failed to comment on the fact that smoking is often very painful on account of the heat in the summer months, and not a few smokers of my acquaintance cut down the quantity of cigars or cigarettes smoked during this season of the year. Many men of a peculiarly sensitive placing the candles, she was about to medicine before he dies it will give temperament will redden in the face tained in a cigar. Of course, the reaches the mouth, cooled in the process of sifting through the cigar or the pipe stem. But each draw increases the amount of heat in the cigar or pipe stem. That's why cigars often burn the fingers a bit when there is yet a good smoke left.

"But all this is said by the way of

leading up to the point I want to

make. Smoking nearly always makes us thirsty. Drinking beer is a good thing for the extravagant smoker in the summer months. It acts as a sort of counter-irritant. The heat in the mouth and throat, which is one of the immediate and direct results of smoking, is a menace, in my judgment, to the health of the man who smokes too much. If the heat should be confined to the mouth and throat it would be bad enough. Even then it would seriously interfere with digestion and produce other bad results, probably injuring the teeth and gums. But it does not stop here. At least I am con vinced it has not, in my own case. Some part of the heat gets into the stomach and lungs. It is not necessary that we should swallow the smoke in order to bring about this result. The air we breathe becomes heated in passing through the mouth and on into the lungs; that is, it is heated to a point above the normal and of course anything that is in the

"It is just these little influences, they are a grand medicine." resulting in almost inappreciable abnormalities, that are the most dangerous to the human system, because we are less apt to shy around them. We rotice and dodge the big dangers. We encourage and invite the small ones. With the cause removed there can be It is just so with the matter of heat which comes from the cigar or the does injure the human system I am thoroughly convinced. Of course, I do not mean to say that all men are in- ed in waltzing for six hours and threefluenced as I am, even among those quarters without a moment's rest; who use tobacco quite as extravagant. While a Berlin man waltzed for sixly. Many men are, no doubt. There teen consecutive hours, from 9 a. m. can be no question, at any rate, about to 1 o'clock the next morning. my own case and it may not be amiss to mention the rather singular fact

that my stomach has been more affected by the heat than my lungs."

Dangerous Gifts.

To possess a sprig of edelweiss is considered by Swiss maidens a proof of the devotion of their lovers. The reason is that the plant is said to grow only at the snow-line, and in generally inaccessible places. Recently several lives have been lost in the Alpine districts. And yet this plant rethe Alpine snow-line in which to grow and flourish. It is a hardy plant of the daisy or composite order, and though delicate and fragile, blooms in poor soil, especially liking rocks exposed to the full mid-day sun. In any London garden it could flourish, spreading out its downy leaves and stem and its pretty bloom surrounded by white velvety leaves. But so great was the desire to possess it that in several of the Swiss cantons there are strict laws against plucking it, and some of the Alpine clubs have a series of fines for those who transgress. But the difficulty of procuring it only makes some people more determined to obtain it; hence disastrous results.

Practice What You Preach. Have you any plan or notion __As to how this world should run? Have you made a great commotion Showing how it may be done? Do you live as you've directed
In the good things that you teach?
And (to questions you're subjected)
Do you practice what you preach?

It is laudable, I'm sure, If you've any worthy plan That, in time, may help secure Future happiness for man. But if you belie your teaching (Please believe it, I beseech) You would better give up preaching Till you practice what you preach

Many things are advocated That will keep the world from sin;
If you feel quite agitated
O'er the subject, then begin To explain the situation To your friends, and unto each Be a living illustration
That you practice what you preach.
—Benjamin B. Keech, in Leslie's Weekly.

New Breakfast Food.
