

THE OLD FOLKS AT HOME

Are Never Without Pe-ru-na in the Home for Catarrhal Diseases.

Under date of January 10, 1897, Dr. Hartman received the following letter:

"My wife has been a sufferer from a complication of diseases for the past twenty-five years. Her case has baffled the skill of some of the most noted physicians. One of her worst troubles was chronic constipation of several years' standing. She was also passing through that most critical period in the life of a woman—change of life.

"In June, 1895, I wrote to you about her case. You advised a course of Peruna and Manalin, which we at once commenced, and have to say it completely cured her.

"About the same time I wrote you about my own case of catarrh, which had been of twenty-five years' standing. At times I was almost past going. I commenced to use Peruna according to your instructions and continued its use for about a year, and it has completely cured me. Your remedies do all that you claim for them, and even more."—John O. Atkinson.

In a letter dated January 1, 1900, Mr. Atkinson says, after five years' experience with Peruna:

"I will ever continue to speak a good word for Peruna. I am still cured of catarrh."—John O. Atkinson, Independence, Mo., Box 272.

Mrs. Alla Schwandt, Sanborn, Minn., writes:

"I have been troubled with rheumatism and catarrh for twenty-five years. Could not sleep day or night. After having used Peruna I can sleep and nothing bothers me now. If I ever am afflicted with any kind of sickness Peruna will be the medicine I shall use. My son was cured of catarrh of the larynx by Peruna."—Mrs. Alla Schwandt.

Why Old People are Especially Liable to Systemic Catarrh.

When old age comes on, catarrhal diseases come also. Systemic catarrh is almost universal in old people. This explains why Peruna has become so indispensable to old people. Peruna is their safeguard. Peruna is the only remedy yet devised that entirely meets these cases. Nothing but an effective systemic remedy can cure them.

A reward of \$10,000 has been deposited in the Market Exchange Bank, Columbus, Ohio, as a guarantee that the above testimonials are genuine; that we hold in our possession authentic letters certifying to the same. During many years' advertising we have never used, in part or in whole, a single spurious testimonial. Every one of our testimonials are genuine and in the words of the one whose name is appended.

Ask your Druggist for a free Peruna Almanac for 1905.

Every housekeeper should know that if they will buy Defiance Cold Water Starch for laundry use they will save not only time, because it never sticks to the iron, but because each package contains 16 oz.—one full pound—while all other Cold Water Starches are put up in 3/4-pound packages, and the price is the same, 10 cents. Then again because Defiance Starch is free from all injurious chemicals. If your grocer tries to sell you a 12-oz. package it is because he has a stock on hand which he wishes to dispose of before he puts in Defiance. He knows that Defiance Starch has printed on every package in large letters and figures "16 oz." Demand Defiance and save much time and money and the annoyance of the iron sticking. Defiance never sticks.

To Make Eyes Darker.
Going to bed early will make the eyes deeper in hue. The woman who wants her light brown eyes to appear black will go to bed an hour sooner. She will sleep facing a dark curtain and will waken gradually in the morning.

Effect of Color on Plants.
Put a growing plant under red glass and it shoots up very tall and spindly. Green glass causes a similar effect, but not quite so strongly marked. Blue glass, on the other hand, seems to dwarf vegetable growth.

THE PERUNA ALMANAC
IN 8,000,000 HOMES.
The Peruna Lucky Day Almanac has become a fixture in over eight million homes. It can be obtained from all druggists free. Be sure to inquire early. The 1905 Almanac is already published, and the supply will soon be exhausted. Do not put it off. Get one to-day.

FLOCKING INTO CANADA.

Immigration From Dakota and Adjoining States—Major Edwards, United States Consul General at Montreal, Describes the Movement as Due to Scarcity of Land.

Montreal, Nov. 15.—Major Allison Edwards, United States Consul General, who returned to-day from a visit to his home at Fargo, North Dakota, said in an interview: "The proper way to describe the manner in which the people of North Dakota are coming over into Western Canada is to say they are coming over in droves. Among the people there did not seem to be any thought of there being a boundary line at all. It is simply a question," added the major, "of there not being any more land in North Dakota and the surrounding States, and the people are flocking to Canada to get good farms. Naturally the number that will come over will increase all the time, and I may say the people you are getting are the best people in the west. They are well supplied with money and are well acquainted with the conditions under which they will have to work." The agents of the Canadian Government are prepared to give the fullest information regarding homestead and other lands.

Put Blame on Printers.
One of Browning's remarks is characteristic. He once said to Dr. Knight "that all the unintelligibility of 'Sordello' is due to the printers. They would change my punctuation and not print my commas, semicolons, dashes and brackets."

World's Great Men.
Great men are the fire pillars in this dark pilgrimage of mankind; they stand as everlasting witnesses of what has been, prophetic tokens of what may still be, the revealed, embodied possibilities of human nature.—Carlyle.

ARMORED CRUISER TENNESSEE LAUNCHED AT PHILADELPHIA

U.S.S. TENNESSEE as she will look when completed

The armored cruiser Tennessee was launched Dec. 3, at the yards of William Cramp & Sons, Philadelphia. The christening party included Gov. Frazier of Tennessee, and his staff, Mrs. Frazier and their daughter, Annie Keith Frazier, who was sponsor for the ship.

Up to almost the moment when the big warship started down the ways, a drizzle of sleet and rain fell continuously, but during the actual launching the sun shone through the clouds; the sky again becoming overcast shortly after the ship took the water.

Miss Frazier carried a huge bouquet of American Beauty roses to which was attached a bottle of champagne, and as the vessel was about to take its initial dip she struck the prow two resounding blows, at the same time pronouncing the baptismal words in a clear voice.

Immediately after the launch luncheon was served in the mould loft. The Tennessee was completed five months ahead of the contract time.

Gov. Frazier's party included Mrs. Frazier, Senator and Mrs. E. W. Carver.

The recognition of the value of a new idea, in regard to a business plan, is leading employers to encourage criticisms and suggestions from employees in respect to the details of the business, thus utilizing their microscopic view rather than depending solely on the bird's-eye view which is taken by the manager, says Success. A friendly feeling results from this attitude, and the employe takes a deeper interest in his work, developing his own capacity and helping the business. To see his idea carried out by his superiors puts new life into him and adds new enthusiasm to his efforts. He will work harder to develop another point, and so win this approbation, than he would for any other compensation.

Miss Annie K. Frazier, who christened the battleship Tennessee, is the daughter of the governor of Tennessee and is noted for her beauty.

Science Aiding Agriculture.
The achievements of college professors in showing an industry of modest standing but fundamental importance how to enhance its production have reached monumental results. An Iowa professor, by inducing the farmers to make a scientific selection of seed and teaching them a more careful preparation of the ground, enlarged the corn crop of that state by about 100,000,000 bushels. A Maine professor is showing how, by selection in breeding, hens can be induced to lay twice as many eggs as the ordinary fowls. Cornell professors are enlarging the old lesson on the increase of milk from cows. A Minnesota teacher has developed a handy and improved breed of wheat. A Nebraska in the same line has outlined a plan of cultivation that will secure crops on semiarid land without irrigation.—Pittsburg Dispatch.

Celluloid a Menace.
The unrestricted sale of articles made of celluloid, which is practically gun cotton, for any purpose whereby such article is liable to come into contact with fire, should on no account be allowed, says the Lancet. We believe there are other dangerous substances related to gun cotton which go under other names and which are also used for similar purposes and should be likewise banned. It may be that the inflammability of celluloid is sometimes somewhat counteracted by admixture with substances with an opposite tendency, but the difficulty is to distinguish the combustible from the incombustible. At all events some warning should be inscribed on the articles made therewith, and they should be marked "highly inflammable," or with some other equally premonitory and protecting device.

University Men in Legislature.
The Wisconsin legislature that convenes next January will have among its members ten men who hold degrees from the University of Wisconsin. Graduates of the university, while not preponderating in membership in the legislature, will have considerable influence in formulating laws. Of the ten members the senate has five and the assembly the same number. This means that 5 per cent of the senate and 5 per cent of the assembly are graduates of the University of Wisconsin.

Fireflies as Jewels.
Two or three fireflies placed in the center of a room will shed a soft light all over it. They are very common in Havana, Brazil, Venezuela and Mexico. In these countries at night the natives affix the little creatures to their shoes and thus obtain light to see the road and frighten away the snakes. Mexican women use them as jewels. They tie them in little gauze bags and put them in their hair or on their clothing.—Liverpool (Eng.) Mercury.

Aged and Enthusiastic Hunter.
Dr. Stephen Call of Ingalls, Okla., is about 80 years old, but he spends his winters in the woods coon-hunting. His friends declare he is the oldest and greatest coon hunter alive. About the "time that coons are ripest" the old doctor arranges his spring wagon, loads it up with grub, gets his bounds together and pulls for the tall timber in the creek country. He often goes out alone for a hunt in the fall and does not return until the following spring.—Chicago Chronicle.

Morgan Protects His Photos.
Following the lead of John D. Rockefeller, J. P. Morgan has had a photo of his most recent portrait in oil copyrighted so that the newspapers throughout the country will not be able to print it. So far as is known Mr. Rockefeller and Mr. Morgan are the only two American men of the sterner sex who object to having their pictures reproduced in the papers. There are any number of society women who forbid the photographers to give pictures for publication and some of them have had their photos copyrighted.

Does Away With Spectacles.
English Physician Has New Treatment for Failing Sight.
Optimists believe that Dr. Stephen Smith, surgeon of the eye department of Battersea Park hospital, Nottingham, England, has discovered a new treatment of the eye which will practically abolish spectacles. It is styled "manipulation of the eye" and is gentle and gradual, occupying a few minutes daily, causing no pain and having no injurious effect of any sort. Some cases are cured in a week, and in all cases improvement is rapid.

Thirty patients who had been obliged to wear spectacles for a long time have so far been treated by Dr. Smith and, with a single exception, all have discarded glasses and can now read, at either long or short distances, as well as people who have never needed assistance.

The cures of myopia, hypermetropia and astigmatism are said to be permanent.—Philadelphia Telegraph.

Value of New Ideas.
The recognition of the value of a new idea, in regard to a business plan, is leading employers to encourage criticisms and suggestions from employees in respect to the details of the business, thus utilizing their microscopic view rather than depending solely on the bird's-eye view which is taken by the manager, says Success. A friendly feeling results from this attitude, and the employe takes a deeper interest in his work, developing his own capacity and helping the business. To see his idea carried out by his superiors puts new life into him and adds new enthusiasm to his efforts. Mystery of Lost Pins.
It is calculated that only 1 per cent of the pins manufactured are worn out or broken. The other 99 per cent are lost, but what becomes of them, where they go, and who gets them, or why some of them are not afterwards discovered and again put to use are mysteries.

COMPLETELY RESTORED.
Mrs. P. Brunzel, wife of P. Brunzel, stock dealer, residence 3111 Grand avenue, Everett, Wash., says: "For fifteen years I suffered with terrible pain in my back. I did not know what it was to enjoy a night's rest, and arose in the morning feeling tired and unrefreshed. My suffering sometimes was simply indescribable. When I finished the first box of Doan's Kidney Pills I felt like a different woman. I continued until I had taken five boxes. Climate of California Desert.

The climate of the California desert in midwinter is the finest to be found in the world, bar none. The air is balmy, the days warm and the nights cool enough for comfortable sleep. Mosquitoes, fleas and other insect pests are unknown (save by the Indians and half breeds, whose society it is not necessary to cultivate), while flies are absolutely a minus quantity on the desert.

Description of Persian Sheep.

A traveler, giving an account of the Persian sheep in 1798, says: "The tails frequently weighed eight or ten pounds, and they have six or eight horns, some of which stood out horizontally and caused a great deal of bloodshed when the rams engaged with one another. Both the wool and flesh of these sheep were greatly valued."

Largest Sun Dial.

There is a large promontory in the Egean sea, known as Hayon Horoo, which extends 3,000 feet above the level of the water. As the sun swines around the shadow of this mountain touches one by one a circle of islands separated by regular intervals, which act as hour marks. It is the largest sun dial in the world.

Mixed Relationship.

A man brought up at St. Albans as an incorrigible rogue was proved to have married his aunt. His children are, therefore, his first cousins and he is his own uncle. His grandmother and his mother-in-law are the same person. Apparently the judge sympathized with him, for he was discharged.

Much Waste of Coal.

A square foot of uncovered pipe, filled with steam at 100 pound pressure, will radiate and dissipate in a year the heat put into 3,716 pounds of steam by the economic combustion of 238 pounds of coal. Thus ten square feet of bare pipe corresponds approximately to the waste of two tons of coal per annum.

Canton the Paris of China.

Canton is the Paris of the far East, the fashion center of that picturesque country of lilies and tea. All the aristocratic Celestials, in whatever part of the world they may be, still watch that center with eager interest for the decrees put forth every year by that capricious authority of southern China.

Another Argument for Good Roads.

"Mabel," said Mrs. Subbubs, sternly, "when that young man was leaving you at the gate last evening I heard several sounds like kisses." "Indeed!" replied the girl. "Oh, I know! What you heard was the noise he made pulling his feet out of the mud as he walked down the path."

The letters of Miss Merkle, whose picture is printed above, and Miss Claussen, prove beyond question that thousands of cases of inflammation of the ovaries and womb are annually cured by the use of Lydia E. Pinkham's Vegetable Compound.

"DEAR MRS. PINKHAM:—Gradual loss of strength and nerve force told me something was radically wrong with me. I had severe shooting pains throughout the pelvic organs, cramps and extreme irritation compelled me to seek medical advice. The doctor said that I had ovarian trouble and ulceration, and advised an operation. I strongly objected to this and decided to try Lydia E. Pinkham's Vegetable Compound. I soon found that my judgment was correct, and that all the good things said about this medicine were true, and day by day I felt less pain and increased appetite. The ulceration soon healed, and the other complications disappeared and in eleven weeks I was once more strong and vigorous and perfectly well.

"My heartiest thanks are sent to you for the great good you have done me."—Sincerely yours, Miss MARGARET MERKLEY, 275 Third St., Milwaukee, Wis.

Miss Claussen Saved from a Surgical Operation.

"DEAR MRS. PINKHAM:—It seems to me that all the endorsements that I have read of the value of Lydia E. Pinkham's Compound do not express one-half of the virtue the great medicine really possesses. I know that it saved my life and I want to give the credit where it belongs. I suffered with ovarian trouble for five years, had three operations and spent hundreds of dollars on doctors and medicines but this did not cure me after all.

"However, what doctors and medicines failed to do, Lydia E. Pinkham's Vegetable Compound did. Twenty bottles restored me to perfect health and I feel sure that had I known of its value before, and let the doctors alone, I would have been spared all the pain and expense that fruitless operations cost me. If the women who are suffering, and the doctors do not help them, will try Lydia E. Pinkham's Vegetable Compound, they will not be disappointed with the results."—Miss CLARA M. CLAUSSEN, 1307 Penn St., Kansas City, Mo.
