

MEDICAL EXAMINER

Of the United States Treasury Recommends Pe-ru-na.

Another Prominent Physician Uses and Endorses Pe-ru-na.

D. LLEWELLYN JORDAN, Medical Examiner of the U. S. Treasury Department, Graduate of Columbia College, and who served three years at West Point, has the following to say of Peru-na:

"Allow me to express my gratitude to you for the benefit derived from your wonderful remedy. One short month has brought forth a vast change and I now consider myself a well man after months of suffering. Fellow sufferers, Peru-na will cure you."

Dr. Llewellyn Jordan, Medical Examiner United States Treasury.

A constantly increasing number of physicians prescribe Peru-na in their practice. It has proven its merits so thoroughly that even the doctors have overcome their prejudice against so-called patent medicines and recommended it to their patients.

Peru-na occupies a unique position in medical science. It is the only internal systemic catarrh remedy known to the medical profession to-day. Catarrh, as everyone will admit, is the cause of one-half the diseases which afflict mankind. Catarrh and catarrhal diseases afflict one-half of the people of the United States.

Robert R. Roberts, M. D., Washington, D. C., writes:

"Through my own experience as well as that of many of my friends and acquaintances who have been cured of catarrh by the use of Peru-na, I can confidently recommend it to those suffering from such disorders, and have no hesitation in prescribing it to my patients."

If you do not derive prompt and satisfactory results from the use of Peru-na, write at once to Dr. Hartmann, giving a full statement of your case, and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartmann, President of The Hartman Sanitarium, Columbus, Ohio.

Every housekeeper should know that if they will buy Defiance Cold Water Starch for laundry use they will save not only time, but because each package contains 16 oz.—one full pound—while all other Cold Water Starches are put up in ½-pound packages, and the price is the same, 10 cents.

It is unusual that a single institution in a city of 8,000 people will overshadow in importance every other interest, but such is the case with the American School of Osteopathy, and A. T. Still Infirmary at Kirksville, Mo.

A stranger in Kirksville is immediately impressed with the idea that the town is sustained by this institution, in fact, Kirksville has been made what it is to-day by Dr. Still and his famous School and Infirmary. It is the largest patronized and endowed institution of its kind in the United States.

Dr. Still's school enrolls over 700 students yearly and each student is required to attend four terms of five months each before completing the course of study. There are over 2,000 graduates and they are practicing in every state and territory of the Union.

Dr. O. S. Wood cures Rupture by a new process, in a few weeks, without loss of time or inconvenience. Rectal diseases cured without the knife. Send for circular. O. S. Wood, M. D., 521 N. Y. Life Bldg., Omaha.

You never lose any of your sorrow by shedding your looks. IMPERIAL HERNIA CURE. Dr. O. S. Wood cures Rupture by a new process, in a few weeks, without loss of time or inconvenience.

When Your Grocer Says he does not have Defiance Starch, you may be sure he is afraid to keep it until his stock of 12 oz. packages are sold. Defiance Starch is not only better than any other Cold Water Starch, but contains 16 oz. to the package and sells for same money as 12 oz. brands.

It doesn't take any grit to grumble. ALWAYS CALL FOR A CIGAR BY ITS NAME. "CREMO" MEANS MORE THAN ANY OTHER NAME.

It's no use bragging of your ancestors unless they would feel like returning the compliment. Important to Mothers. Examine carefully every bottle of CASTORIA, a safe and sure remedy for infants and children, and see that it bears the signature of J. C. Watson.

Save your souls for your enemies. Be cheerful when surrounded by the home circle. TO CURE A COLD IN ONE DAY. Take Laxative Bromo Quinine Tablets. All Druggists Sell. Sample mailed FREE.

MEXICAN Mustang Liniment cures Cuts, Burns, Bruises. INCUBATORS. The OLD TURKEY incubator is made by Johnson, the incubator man, who made 100,000 of them inventing the OLD TURKEY.

Flattery makes no friends. Every child has a little, and every man has a little, and every woman has a little, of that little thing called "catarrh."

When the Worm Turned. Here was the modern mania for "beautiful things." She went in strong. For the Chinese gown. And statics without wings.

He Understood Mules

On a street corner in the northwest section of the city last Saturday forenoon quite a large crowd had collected. It had formed a ring, or rather, a square, about some object in the center, two sides having congregated on each side of the curb, while the others made a rather thin line on the other side of the square. The on-lookers to whatever was going on did not seem in the least excited, but there was every indication of much interest in the situation.

"Drunken women fighting," said one of two young women who were passing near by. "It's most disgraceful, and those people placidly looking on. If they were men they'd stop it," she said to her companion. "It's degrading."

An old gentleman in the same locality was explaining to another one that a man had been stricken with an epileptic fit. "Poor fellow," he said; "and no one knows what to do for him."

It was evident that the gathering was an inactive one, and the reporter whose duty it is to investigate everything hastened to the scene and found out that a stout, well-proportioned mule had slipped on the pavement and was apparently well satisfied with his recumbent situation. The fact was that he resented every well-meant attempt to hoist him from his contact with mother earth, while his disgruntled driver, a colored boy about 20 years old, was actually sobbing with anger and vexation of spirit. All sorts of suggestions were hurled at him, but nobody seemed to want to help him in his distress. There was danger in it. The mule was wild-eyed and vicious, and used both fore-legs as a battery to keep folks away from him, until at last the driver sat down on the shafts of the cart, which had been drawn away from the animal, and indulged in long, bitter thought.

Just then an old colored man, wearing an old-fashioned blue army overcoat and a red worsted comforter about his neck, stepped into the open space, walked bravely up to the now quiet quadruped and took hold of both of his ears. He seemed to whisper to the beast, but whatever he did acted like magic. The mule got upon his feet, permitted himself to be hitched again to his cart, and the crowd went away.

"You seem to know how to deal with mules," said the reporter to the old fellow. "Deed I does, sub," was the reply. I know all about mules and they does me. 'Fore Gawd, boss, I wasn't brought up in old Missouri for nothing. Yass'r, muels and me is kinfolks, sho's you bo'n. En I think dat job's wuff ten cents. Don't you, boss?"

The crowd had melted away, and as there was no one else by to respond to this palpable hint the reporter did so. And thus the chapter ended.—Washington Star.

Thorough Work of Japs

One of the most unique and interesting features of the Japanese plan of campaign is the importance of the tasks assigned to the doctors. Maj. Louis Livingstone Seamon of the United States army says in his recently published book: "The medical officer is omnipresent. You will find him in countless places where in an American or British army he has no place. He is as much at the front as in the rear. He is with the screen of the scouts with his microscope and chemicals, testing and labeling wells so that the army to follow shall drink no contaminated water. When the scouts reach a town he immediately institutes a thorough examination of its sanitary condition and if contagion or infection is found he quarantines and places a guard around the dangerous district. Notices are posted so that the approaching column is warned and no soldiers are billeted where danger exists. Microscopic blood tests are made in all fever cases and bacteriological experts, fully equipped, form part of the staff of every divisional headquarters.

"The medical officer also accompanies foraging parties and, with the commissariat officers, samples the various foods, fruits and vegetables sold by the natives along the line of march, long before the arrival of the army. If the food is tainted or the fruit is over-ripe or the water requires boiling, notice is posted to that effect, and such is the respect and discipline of every soldier, from the commanding officer to the file in the ranks, that obedience to his orders is absolute. The medical officer is also found in camp lecturing the man on sanitation and the hundred and one details of personal hygiene—how to cook and to eat and when not to drink or to bathe—even to the paring and cleansing of the finger nails to prevent danger from bacteria.

"Long before the outbreak of hostilities he was with the advance agents of the army, testing provisions that were being collected for the troops that were to follow. As a consequence of these precautions he is not found treating thousands of cases of intestinal diseases and other contagion and fevers that follow improper subsistence and neglected sanitation—diseases that have brought many campaigns to disastrous terminations."

Oddities of South Africa

"Though the days of the long treks over trackless wastes of South Africa are past, life in this country still has little diversities peculiar to itself," writes a correspondent. "For instance, a farmer named Long was recently troubled by a leopard that had been destroying his cattle. The natives surrounded it one day in the long grass and sent for the white man to kill it. While searching for the brute in the tangle of vegetation Mr. Long came across him sooner than he expected and the leopard got the jump on him. There was a fierce struggle and the white man was a good deal torn up. One of his negroes got in a lucky shot and killed the leopard just before the latter got at the man's throat.

"Odd things happen in the mines, too, once in a while. A miner named Wonacott recently passed through a most exciting experience at Dutoitspan. He had charged four boreholes with dynamite in the usual way and then endeavored to signal to the engine-driver, but failed to establish communication. He concluded, however, that everything was all right, and he lit the charges, expecting to be hauled up in the bucket. His second signal not being answered, he began to climb the rope in a hurry to get away from the dynamite. He was too slow and the concussion of the discharge knocked him off. He fell into the bucket, where he remained until all the charges had exploded. He was only slightly hurt.

"And there was a curious incident near Harding recently. A native was riding along a pathway at sunrise, when he saw the head and arms of a man sticking out of the ground, the arms waving wildly in signal of distress. The fellow was imprisoned in an ant-bear hole and was half dead. When he was resuscitated he told how he had been coming back on foot from Johannesburg with some friends when he was taken ill. His friends thought he was going to die and stuck him in the ant-bear hole and deserted him. When he recovered he prosecuted his friends and they went to prison."

Loss in World's Sheep

Australia is the foremost pastoral country in the world. In normal seasons it grows one-third as much wool as all the rest of the world taken together; and it is practically the sole producer of the fine merino quality. And now that the long drought has reduced by half the flocks of ten or twelve years ago, Australians are about to experiment with cotton growing, so that they may clothe southern China to-morrow as to-day they clothe northern Europe and America.

During the seven years' drought which broke up last year the sheep died by millions for the want of food and water—yet the pastoralists hesitate about building irrigation works until they try first to make the government build them instead. And this is trifling with the greatest national industry. Of the grand total of not less than 500,000,000 sheep in the world, Australasia owned ten years ago practically 125,000,000. As these were nearly all merinos this country has a practical monopoly in the production of the finer qualities of wool. For two or three years past you have been wearing the fashionable coarse weaves of suitings and dress fabrics; but perhaps you have not asked yourselves why they were fashionable. The explanation is found, not in the fickle fancy of Parisian dandies and dress-makers, but in the terrible reality of the great Australian drought. That drought, by lessening the supply of merino wool, would have multiplied the price of all fine fabrics had the "fashion" remained steadfast. But in self-protection the woollen mills promptly switched the fashion to rougher cloths. It will be some years yet before the sheep stations here are fully restocked and the supply of merino wools restored. At present there are in Australia proper only a little over 50,000,000 sheep, in comparison with over 100,000,000 a decade ago.—Booklovers' Magazine.

When the Worm Turned

That steak was served On an anti-microbe plate! And still he never said a word, But let her navigate.

She took down all the draperies and painted all the walls, Until the rooms Resembled tombs And whitewashed the stables; Then she declared that hygiene prescribed the proper "rest"; She bought "twin" beds And turned their heads. Exactly "nor-nor-west." And still her lord and master Hadn't courage to protest.

But then at last she hit upon a bigger, brighter fad; She was elite, So up-to-date. The new idea she had. She moved the beds out on the porch, to sleep in open air; 'Twas bitter cold— She thought he would not care; But when she saw him there, That "sterilized" white daisy place had everything she ate, She "ruled" on her bed.

Her husband was a business man, on "just plain comfort" bent; He furnished the "smun," And let her run The place, without dissent; Great stacks of "best brass" she bought, and sticks of soaped punk; In his secret soul Each kitchen bowl He classified as "junk." Although he never told her so, He didn't have the spunk!

And then the "Sanitation" craze possessed her for a while; She routed germs In medical terms; She thought he would not care; But when she "sterilized" the whole darn place and did everything she ate, She "ruled" on her bed.

Testing the Richness of Milk.

Dairymen abroad have been experimenting for the purpose of determining which yield of milk, the morning or evening, is the richer of the two. The decision was in favor of the evening milk being the richer, both for butter and cheese making qualities. The milk of cows fed on ground feed in winter was richer than that produced by the same cows from grass in the summer.

Happiness in Poetry.

There are so many holy and tender emotions flying about in our inward world, which, like angels, can never assume the body of an outward act; so many rich and lovely flowers spring up which bear no seed, that it is a happiness poetry was invented, which receives into its limbers all these incorporeal spirits, and the perfume of all these flowers.—Jean Paul Richter.

Modern Surgical Methods.

The use of the needle and thread in closing wounds has come to be a fine art. In former days the surgeons were mere bunglers, and most wounds left hideous scars. But at the present day the manner in which arteries are ligatured, tendons spliced, intestines sutured and wounds closed is the foundation of success, no skilled use of the scalpel taking its place.

The Simple Life in Gotham.

After all, the simple life is widespread here. We do nothing but labor to get a few dollars to pay the officeholders. Political bosses do all our thinking for us, so we have no cares about that line, but simply work and sleep until it's time to go to the poor-house. Surely nothing could be simpler.—New York Telegram.

Magnetite in California.

Magnetite, which is used in the making of fire brick and other fireproof building materials, has been discovered in large quantities in Santa Clara and Stanislaus counties, California. They are the only known deposits in the United States. Hitherto America has imported magnetite from Greece and Syria.

Character Told by the Chin.

The chin is one of the most substantial parts of the face when it is normal, and by physiognomists is said to register unerringly certain characteristics, to tell on one for weal or woe." Others say that this is not so, for one may smile and yet be a villain, and the smile is what makes the facial characteristic.

New Material for Ship's Decks.

A substance called petrolignite is being adopted as a material for the decks of ships. It is prepared from sawdust, mixed with certain minerals, and formed into slabs, under high hydraulic pressure. Its valuable properties are that it is non-inflammable, and is not slippery when wet.

And Chain the Mat.

A Brooklyn minister of a pragmatic turn of mind has his front doorman chained to his house, and to inculcate the right spirit in the passersby has had the motto "Trust in God" worked in scarlet letters of large size in the middle of the mat.

Russian Bristles Best.

A first essential of a good hairbrush is that the bristles should really be bristles, not imitations, and that they should be of a good kind. Russian bristles are the best; they are obtained from the back of the wild boar.

ALL DONE OUT.

Veteran Joshua Heiler, of 706 South Walnut street, Urbana, Ill., says: "In the fall of 1899, after taking Doan's Kidney Pills I told the readers of this paper that they had relieved me of kidney trouble, disposed of a lame back with pain across my loins and beneath the shoulder blades. During the interval which has elapsed I have had occasion to resort to Doan's Kidney Pills when I noticed warnings of an attack. On each and every occasion the results obtained were just as satisfactory as my notice. I just as emphatically endorse the preparation to-day as I did over two years ago."

Foster-Milburn Co., Buffalo, N. Y., proprietors. For sale by all druggists, price 50 cents per box.

Women like to read about how to preserve their youth and beauty, even if they don't follow the rules laid down.—Philadelphia Bulletin.

Many who formerly smoked 10c cigars, now smoke Lewis' "Single Binder" straight 5c cigar. The best combination of the best tobaccos. Lewis' Factory, Peoria, Ill.

A woman keeps away from the eye-glass period as long as possible. Last year the Sure Hatch Incubator Co. of Clay Center, Neb., shipped 600 incubators to Germany and several thousand to Australia, South Africa and South America.

The angry man always lashes himself. SPINAL CURVATURE Can be Cured. Write or call at office for free information. Highest testimonials from prominent statesmen and physicians. Consult your Family Doctor. No braces or appliances used. Treated successfully by mail. 500 years' experience. The Blomquist Orthopedic Institute, 1012 N. 10th St., Minneapolis, Minn.

St. Jacobs Oil

For Soreness and Stiffness

The Old Monk Cure

When cold, hard labor or exercise, relaxes the stiffness and the soreness disappears. Price, 25c. and 50c.

Mrs. L. C. Glover, Vice Pres. Milwaukee, Wis., Business Woman's Association, is another one of the million women who have been restored to health by using Lydia E. Pinkham's Vegetable Compound.

DEAR MRS. PINKHAM: I was married for several years and no children blessed my home. The doctor said I had a complication of female troubles and I could not have any children unless I could be cured. He tried to cure me, but after experimenting for several months, my husband became disgusted, and one night when we noticed a testimonial of a woman who had been cured of similar trouble through the use of Lydia E. Pinkham's Vegetable Compound, he went out and bought a bottle for me. I used your medicine for three and one-half months, improving steadily in health, and in twenty-two months a child came. I cannot fully express the joy and thankfulness that is in my heart. Our home is a different place now, as we have something to live for, and all the credit is due to Lydia E. Pinkham's Vegetable Compound. Yours very sincerely, Mrs. L. C. Glover, 614 Grove St., Milwaukee, Wis. Vice President, Milwaukee Business Woman's Ass'n.

Women should not fall to profit by the experience of these two women; just as surely as they were cured of the troubles enumerated in their letters, just so certainly will Lydia E. Pinkham's Vegetable Compound cure others who suffer from womb troubles, inflammation of the ovaries, kidney troubles, nervous excitability, and nervous prostration; remember that it is Lydia E. Pinkham's Vegetable Compound that is curing women, and don't allow any druggist to sell you anything else in its place.

An Indiana Lady Tells of a Wonderful Cure:—

DEAR MRS. PINKHAM: It is a pleasure for me to write and tell what your wonderful medicine has done for me. I was sick for three years with change of life, and my physician thought a cancerous condition of the womb. During these three years I suffered untold agony. "I cannot find words in which to express my bad feelings. I did not expect to ever see another well day. I read some of the testimonials recommending your medicine and decided to write to you and give your treatment a trial.

"Before I had taken half a bottle of Lydia E. Pinkham's Vegetable Compound, I began to sleep. I have taken now six bottles and am so well I can do all kinds of work."—Mrs. LIZZIE HINKLE, Salem, Ind.

If there is anything in your case about which you would like special advice, write freely to Mrs. Pinkham. She can surely help you, for no person in America can speak from a wider experience in treating female ills. Address is Lynn, Mass.; her advice is free and always helpful. \$5.00. If we cannot forth with produce the original letters and signatures of these testimonials, which will prove their absolute genuineness. Lydia E. Pinkham Med. Co., Lynn, Mass.

To the housewife who has not yet become acquainted with the new things of everyday use in the market and who is reasonably satisfied with the old, we would suggest that a trial of Defiance Cold Water Starch be made at once. Not alone because it is guaranteed by the manufacturers to be superior to any other brand, but because each 16 oz. package contains 16 oz. while all the other kinds contain but 12 oz. It is safe to say that the lady who once uses Defiance Starch will use no other. Quality and quantity must win.

Looking at sin leads to loving it. Try me just once and I am sure to come again. Defiance Starch.

DO YOU COUGH? DON'T DELAY TAKE KEMP'S BALSAM THE BEST COUGH CURE

It Cures Colds, Coughs, Sore Throat, Croup, Influenza, Whooping Cough, Bronchitis and Asthma. A certain cure for Consumption in its first stages, and a sure relief in advanced stages. Use at once. You will see the excellent effect after taking the first dose. Sold by dealers everywhere. Large bottles 25 cents and 50 cents.

THE LADY WHO IRONS

Knows how important it is to use a good starch. Defiance Starch is the best starch made. It doesn't stick to the iron. It gives a beautiful soft glossy stiffness to the clothes. It will not blister or crack the goods. It sells for less, goes farther, does more. Ask the lady who irons. Defiance Starch at all grocers. 16 oz. for 10 cents.

THE DEFIANCE STARCH CO. OMAHA, NEB.

PUTNAM FALESS DYES

Saler more goods brighter and faster colors than any other dye. One 10c package colors silk, wool and cotton equally well and is guaranteed to give perfect results. Ask for or we will send post paid at 10c a package. Write for free booklet—How to Dye, Bleach and Clean. MONSIEUR DRYING CO., Undertakers, Missouri.
