Take Hall's Family Pills for constipation.

A nervous, irritable mother, often on the verge of hysteries, is unfit to care for children; it ruins a child's disposition and reacts upon herself. The trouble between children and their mothers too often is due to the fact that the mother has some female weakness, and she is entirely unfit to bear the strain upon her nerves that governing children involves; it is impossible for her to do anything calmly.

The ills of women act like a firebrand upon the nerves, consequently ninetenths of the nervous prostration, nervous despondency. "the blues," sleeplessness, and nervous irritability of women arise from some derangement of the female organism.

Do you experience fits of depression with restlessness, alternating with extreme irritability? Are your spirits easily affected, so that one minute you laugh, and the next minute you choke you; all the senses perverted, morbidly sensitive to light and sound; pain in the ovaries, and especially work and conditions and especially and sound; pain in the ovaries, and especially work and the next minute you choke you; all the senses perverted, morbidly sensitive to light and sound; pain in the ovaries, and especially and sound; pain in the ovaries, and especially sensitive to light and sound; pain in the ovaries, and especially sensitive to light and sound; pain in the ovaries, and especially sensitive to light and sound; pain in the ovaries, and especially sensitive to light and sound; pain in the ovaries, and especially sensitive to light and sound; pain in the ovaries, and especially sensitive to light and sound; pain in the ovaries, and especially sensitive to light and sound; pain in the ovaries, and especially sensitive to light and sound; pain in the ovaries, and especially sensitive to light and sound; pain in the ovaries, and especially sensitive to light and sound; pain in the ovaries, and especially sensitive to light and sound; pain the sense perverted, morbidly sensitiv morbidly sensitive to light and sound;

Women should remember that Lydia 2,500 pores to the square inch. If pain in the ovaries, and especially between the shoulders; bearing down the medicine that holds the record for they would measure about five miles. pains; nervous dyspepsia, and almost continually cross and snappy?

If so, your nerves are in a shattered condition, and you are threatened with

Battles of To-day Fought at Greater Distances and With More Humane Weapons-Interesting facts of Some Great Conflicts.

In the annals of the American Academy Gen. T. H. Bliss, discussing the important elements in modern land combats, arrives at the conclusion that the tendency of modern warfare is to become less deadly. He gives a table of the principal battles fought from the beginning of the Seventh Years' War, in the eighteenth century, up to and including the battle of Mukden, in the twentieth. He summarizes the results as follows:

In the twelve principal battles of the Seven Years' War the average losses were-victors 14 per cent, defeated 10 per cent.

During the Napoleonic epoch an average of twenty-two battles gives victors 12 per cent loss, defeated 10 per cent.

# To make Cheap Gas-light for Country Homes

AKE a common Clay Pipe.
Put a simple "Acetylene" Gasburner on its

Bind the two in position with a tight-fitting piece Then fill the bowl of the pipe with fine-ground Cal-

Next tie a rag over head of the bowl to keep in the

Now put the pipe into a Glass of Water, as in picture.

There you have a complete Gasplant for 25 cents. Touch a match to the Burnerand you'll get a beautiful White Gas-Of course, this is only an experi-

ment, but it shows the wonderful sim-plicity of Acetylene Lighting. That very simplicity gave Acetylene

Light a setback, at first. It seemed so simple to turn Calcium Carbide into Gas-light that over 600 different kinds of "tanks" and "Acetylene Machines" were invented, patented, and marketed for the purpose, by about as many different

Well, the thing to be expected certainly happened!

About 530 of these "Acetylene Machines" had been invented and sold by people who knew more about Tinware than they did about Gas-making.

The "Calcium Carbide" was all right all the time, but 530 of the machines for turning it into Gas were

all wrong all the time.

So Acetylene Gas "got a bad name," though it is clear enough now that it never deserved it at any time.

It was like selling Wood Stoves to burn Hard Coal in, and then blaming the Coal for not burning.

Lots of things happened to grieve the Owners of these 530 makes of alleged "Acetylene Machines." But very few accidents occurred from them even in the days of rank experiment and dense ignorance, ng, "Generator" Makers.

Of course, a gun will go off unexpectedly, now and then, if the trigger be pulled by a person who "didn't know it was loaded." But, that's no fault of the Ammunition—is it?
Well, finally the Insurance Companies got after
these 530 odd makes of "Acetylene Machines" that

wouldn't Acetylate, and the Insurance Board made an investigation of all Generators that were submitted to Then, out of the 600 odd "Machines" patented, only about 70 were "permitted" by the Insurance Board

Oh, what a howl was there!
By "permitted" I mean that the Insurance Board
was willing that any building should be Insured, with-

out extra charge, which used any one of these 70 Acetylene Generators it had found safe, and effective, just as it permitted houses to be piped for City Gas, or wired for Electricity, under proper conditions.

Now, the Insurance Companies ought to know whether or not these 70 different makes of Acetylene Generators were absolutely Safe to use. Because, they have to pay the bills, if Fire or Ex-plosion occurs, from any one of the Acetylene Gener-

ators they authorize. And, here's a proof of their good judgment.

Though there are now Two Million people using Acetylene Light in America, there have only been four Fires from it in one year, against 8865 Fires from Kerosene and Gasoline.

There have also been 4691 Fires from Electricity, 1707 Fires from City Gas, and 520 Fires from Candles. Besides these there have been 26 Fires from the Sun's rays, But,—only four Fires from Acetylene.

That shows how careful the Insurance Board was in its examination of Acetylene Generators, and in 'permitting" only the 70 makes that were above suspicion, out of the 600 experiments that were once on

Well,-the boom in Acetylene Lighting made lower prices possible on the material it is derived from, viz., Calcium Carbide, a material that looks like Granite but acts like Magic.

Today, Acetylene Light is a full third cheaper than Kerosene Light, or Gasoline Light, per Candle Power. It is not more than half the price of Electric Light, nor three-fourths that of City Gas.

If I can't prove these statements to your full satis-faction my name is not "Acetylene Jones." But Acetylene is more than the safest and cheapest Light of the year 1905.
It is also the Whitest Light—the nearest to natural

Sunlight in health-giving Blue and Violet rays, and because of this, with its freedom from flicker, it is the easiest of all Artificial Light on the Eyes.

It is so much like real Sunlight that it has made plants grow 24 hours per day in dark cellars where no ray of Sunlight could reach them. It made them grow

twice as fast as similar plants that had only the Sun-light of day-time, viz., half the time. That was proven by Cornell University in a three-months' experiment made this very year.

Now, I've saved up for the last a point more important to you than all the others about Acetylene

It consumes only one-fourth as much of the vital Oxygen from the Air of Living rooms or bed-rooms, as either Kerosene or City Gas-Light consumes.

That's a fremendous difference in a lifetime, mark you—three-fourths of a difference.

Because,-Oxygen is Life. And every bit of Oxygen stolen from the lungs of Women, Children and Men, through Lighting, is a loss that can never be made good again.

A 24 Candle-Power Acetylene Light costs you only

two-hiths of a cent per hour.

That's about \$5.85 per year, if burned every night in the year for four steady hours. A Kerosene Lamp of equal capacity would cost you third more, viz.: three-fifths of a cent per hour for

Kerosene alone, or \$8.75 per year.

That's exclusive of broken lamp chimneys, new wicks, and the everlasting drudgery and danger of cleaning, filling and trimming daily.

I want to prove these figures to you, Reader, if you

are a house-owner or storekeeper. Tell me how many rooms you've got and I'll tell you what it will cost to light them with brilliant, beautiful,

Sanitary, eye-saving Acetylene. Write me today for my Free Book about "Sunlight Just address me here as—
