Mrs. Sarah Noble, a widow of Cincinnati, feeds 1,000 canaries in her luxurious home in that city. On one of her trips abroad many years ago she purchased and brought here the ancestors of these birds, at a cost of \$1,000. They live in seventy large cases. It costs Mrs. Noble \$65 a year to feed her birds, and the most expensive heating and ventilating arrangements obtainable are provided for them.

Overworked Smokestacks. Smokestacks are often much over worked in manufacturing plants. The number of flues turned into them is made so great, as the establishment grows, that deficient draft often interferes seriously with the usefulness of boileds. ### Woman's Trials.

The bitter trail in a woman's life is to be childless. Who can tell how hard the struggle may have been ere she learnt to resign herself to her lonely lot? The absence of this link to bind marital life together, the absence of this one pledge to mutual affection is a common disappointment. Many unfortunate couples become estranged thereby. Even if they do not drift apart, one may read the whole extent of their disappointment in the eyes of such a childless couple when they rest on the children of others. To them the largest family does not seem too numerous. largest family does not seem too numerous. In many cases of barrenness or child-lessness the obstacle to child-bearing is easily removed by the cure of weakness on the part of the woman. Dr. Pierce's Fa-vorite Prescription has been the means of restoring health and fruitfulness to many a barren woman, to the great joy of the household. In other, but rare cases, the household. In other, but rare cases, the obstruction to the bearing of children has been found to be of a surgical character, but easily removable by painless operative treatment at the Invalids' Hotel and Surgical Institute, Buffalo, N. Y., over which Dr. Pierce of the "Favorite Prescription" fame presides. In all cases where children are desired and are absent, an effort should be made to find out the real cause

In all the Various weaknesses, displace-In all the various weaknesses, displacements, prolapsus, inflammation and debilitating, catarrhal drains and in all cases of nervousness and debility, Dr. Pierce's Favorite Prescription is the most efficient remedy that can possibly be used. It has to its credit hundreds of thousands of cures—more in fact than any other remedy put up for sale through druggists, especially for woman's use. The ingredients of which the "Favorite Prescription" is composed have received the most positive endorsement from the leading medical writers on Materia Medica of all the several schools of practice. All the ingredients are printed in pilain English on the wrapper enclosing the bottle, so that any woman making use of this famous medicine may know exactly what she is taking. Dr. Pierce takes his patients into his full confidence, which he can afford to do as the formula after which the "Favorite Prescription" is made will bear the most careful examination. which the "Favorite Prescription" is made will bear the most careful examination

SPOILED LAWYER'S FINE PLEA.

Benton Overreached in Eager

ness to Make Point. During the first hearing of the famous Crocker will case in the supreme court, before Judge Lathrop and a jury, there were many interesting and amusing tilts between the eminent counsel engaged in the case -Robert M. Morse for the contestants of the will, and Col. Joseph H. Benton, Jr., for the executors.

Perhaps at no time during the hear ing, however, was there any better exhibition of wit than in the summing up of counsel before the jury. At one point Col. Benton was trying to impress upon the jury that the expression "old fool," alleged to have been used by one of the interested parties, might reasonably be construed as a term of endearment.

"For example," explained Col. Benton, "King Lear called his fond daughter, 'my dear pretty fool.' '

Here he waited a moment to let the point sink into the minds of the jury. Judge Lathrop, however, who had been listening with intense interest, leaned forward in his chair and dryly remarked:

"But, Mr. Benton, King Lear was

crazy, wasn't he?" "Well, your honor, that's a mooted question," was all that the confused attorney could reply, and even this was almost smothered by the mirthful outburst in the court room, which the opposing counsel, Mr. Morse, joined most heartily.

#### SENSE OF HEARING IN WHALES. Principal Guide for These Monsters of the Sea.

It seems perfectly evident that whales must hear when in the water. This inference is confirmed by the comparatively small development of the other sense organs. The eye, for instance, is very small, and can be of little use even at the comparatively small depths to which whales are now believed to descend.

Again, the sense of smell, judging from the rudimentary conditions of the olfactory organs, must be in abevance: and the whales have no sense organs comparable to the lateral line system of fishes. Consequently, it would seem that when below the surface of the water they must depend chiefly upon the sense of hearing Probably this sense is so highly developed as to enable the animals, in the midst of the vibrations made by the screw-like movements of the tail, or flukes, to distinguish the sound (or the vibrations) made by the impact of water against rocks, even in a dead calm, and, in the case of piscivorous species, to recognize by the pulse in the water the presence of a shoal of fish.

Failing this explanation, it is difficult to imagine how whales can find their way about in the semi-darkness and avoid collisions with rocks and rock-bound coasts.-London Field.
