

EX-MAYOR CRUMBO RECOMMENDS PE-RU-NA.

"My Endorsement of Pe-ru-na is Based on Its Merits."
—Ed. Crumbo.

ED. CRUMBO, Ex-Mayor of New Albany, Ind., writes from 511 E. Oak street:

"My endorsement of Peruna is based on its merits.

"If a man is sick he looks anxiously for something which will cure him, and Peruna will do the work.

"I know that it will cure catarrh of the head or stomach, indigestion, headache and any weary or sick feeling.

"It is bound to help anyone, if used according to directions.

"I also know dozens of men who speak in the highest terms of Peruna and have yet to hear of anyone being disappointed in it."

Mr. Crumbo, in a later letter, dated Aug. 25, 1904, says:

"My health is good, at present, but if I should have to take any more medicine I will fall back on Peruna."

Spoons of Early Days.
All the earliest spoons have pear-shaped bowls. It was not until the latter part of the seventeenth century that they began to elongate toward the egg-shaped spoon of the present time. Up to the seventeenth century all spoons were large and closely resembled the soup spoon which has been in use for the last five or six years, the bowl being very deep.

Cure for Bad Temper.
The best way to cure bad temper is first to convince yourself that you are not really being wronged. Once you have gotten in tune with the world and feel quite certain that the universe is better ordered than you could order it, you will cease expecting to reform the rest of your fellow-men and thus be saved lots of disappointment.

Conquer Disagreeables.
If there is a requirement to success in your business for which you have an antipathy, conquer it, or it will be the rock on which your ship will founder. Overcome the idea that certain things are disagreeable, in order that your life may contain no disagreeable duties. Bend before the wind, that you be not broken.

Too Many "Burns Relics."
Scotland is becoming alarmed at the increase in the number of "Burns relics." Chairs enough are now known to have furnished a dozen Burns cottages. Even the well known habits of the poet will not account for the arrays of Burns cups and mugs that are scattered around the world.

Appearances and Animation.
We are products of things we see and hear and think. Our appearance is able to increase our own animation provided our appearance brightens those before us, and we forget ourselves in admiring their brightness.—Earl M. Pratt in "Short Talks."

Idleness is Unhappiness.
The will of Mr. Val Princep, R. A., contained a passage in which he expresses the opinion that a man with nothing to do is necessarily dissatisfied and consequently unhappy.

Beware of Ointments for Catarrh that Contain Mercury.
Mercury will surely destroy the sense of smell and completely derange the whole system when carried through the mucous surfaces. Such articles should never be used except on prescription from a reliable physician, as the damage they will do is ten fold to the good you can possibly derive from them. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, O., contains no mercury, and is taken internally, acting directly upon the blood and mucous surfaces of the system. It is the only Catarrh Cure on record that will cure Catarrh of the Head, Throat, Lungs, and Bladder, and is sold by Druggists. Price, 75c per bottle. Take Hall's Family Pills for constipation.

If you have to pay the piper, be sure you get the dance.

Important to Mothers.
Examine carefully every bottle of CASTORIA, a safe and sure remedy for infants and children, and see that it bears the Signature of *Dr. J. C. Watson*. In Use For Over 30 Years. The Kind You Have Always Bought.

REFLECTIONS OF A BACHELOR.

While a girl is learning about love she can teach a man more than he ever knew.

The only kind of advice that is ever taken is the rich relation's, and only when he is there to see you do it.

A good cure for insomnia is to have some babies in the house; then you'll want to sleep, but they won't let you.

If women were different clothes they might be a lot more sensible, but they wouldn't be a millionth part as nice.

When a man happens to make his bank balance agree with the cashier's he goes out and begins to brag how he almost took honors in mathematics when he was in college.—New York Press.

Fight Tobacco Evil.

Principal Thomas of the Burlington (Vt.) High School, and his teachers, finding that 40 per cent of the boys used tobacco habitually, and desiring to reduce the practice, have agreed that no pupil who uses tobacco can hold a school office or be a member of any organization, including athletic and social clubs.

Prussian Universities.

The cost to the Prussian government of its ten universities a year is nearly \$4,000,000.

The Government of Canada

Gives absolutely FREE to every settler one hundred and sixty acres of land in Western Canada.

Land adjoining this can be purchased from railway and land companies at from \$5 to \$10 per acre.

On this land this year has been produced upwards of twenty-five bushels of wheat to the acre.

It is also the best of grazing land for mixed farming it has no superior on the continent.

Splendid climate, low taxes, railways convenient, schools and churches close at hand.

Write for "Twentieth Century Canada" and low railway rates to Superintendent of Immigration, Ottawa, Canada; or to authorized Canadian Government Agent—W. V. Bennett, 801 New York Life Building, Omaha, Nebraska. (Mention this paper)

AGRICULTURE

The Growing of Missouri Corn.
How to grow Missouri corn was the subject of a day's discussion at the Farmers' convention in Columbia, Mo., recently. H. J. Waters, dean of the Agricultural College, opened the discussion. Keep plant food on the farm, he urged. Move mangers, stop the prodigious waste, adopt systematic rotation. An elastic rotation is best, but systematic, rut-like rotation is better than the present Missouri plan of no rotation. At least one year in four use clover, and as little timothy as possible. Barnyard manure is the best fertilizer. Commercial fertilizers can only be used with profit in Missouri upon thin or worn-out land, not upon black prairie land. The fertilizers should have liberal quantity of potash and cheap phosphorus. Little difference has been shown by experiments between spring and fall plowing. Much unnecessary work is done in husking corn. The thickness of planting should vary with the richness of land. Suckers depend on various conditions. Experiments have shown for every 100 plants, stalks in a hill, 8 suckers; 3 in a hill, 25 suckers; 2 in a hill, 76 suckers, and 1 in a hill, 195 suckers. Some varieties of corn have more suckers than others. Dent has the least. Tillage is for two purposes: First, to keep down weeds; second, to conserve moisture. If land is properly prepared there is no need to stir the soil for root-growth. Shallow tillage does not kill the weeds.

Dr. Waters' address brought out considerable discussion. Mr. Laughlin thought the man a criminal who destroyed plant food on his farm. Joseph E. Wing of Ohio said the manure spreader was a more useful vehicle on the farm than the carriage. "If no blackbirds follow along the furrow I know something's wrong. If my boy can not get enough fishing worms in a half day to go fishing I know more humus is needed in the land."

George H. Sly of Rockport had for his subject "How Can the Farmer Secure Good Seed?" Mr. Sly emphasized the importance of good seed as a factor for increasing the corn yield. There are two ways, he said, of securing good seed. One is by maintaining a seed plot and the other is by selecting eight or ten ears of corn, to be planted in a square field, preferably on the east or southeast side. If you haven't good seed, said Mr. Sly, go to your neighbor and get some. Let new varieties alone. "The problem will be solved," he concluded, "by the establishment of corn breeding farms throughout the state."

Experience in Threshing.
My experience in threshing has not been varied. It has been the same thing over and over again and that has been very expensive to the farmers in this part of the state. In as much as the machines do not save the grain, I have lived in this ring seven years. We have had five different machines in that time and there has been no choice. We have employed two-men machines and they did no better work than the old hand fed which we used two years. The machines thresh the grain all right, but do not separate it from the straw, and enough oats go into the straw stack to doubly pay the threshing bill. Such work does not pay very well. Some of the farmers say the oats are in the stack, they are light, and so forth, but I would rather have them all taken out of the straw. Then I can do as I choose with them. I would prefer feeding them rather than have them wasted in the straw and rot in the chaff, which they generally do.

All the inventors in the country are wracking their brains to get a three-kernel drop to a planter. There are but very few threshing machines exhibited at fairs, and where there are they attract very little attention, for the fact that they fail to present the vital point to the farmers, that of saving or separating the grain from the straw. Perhaps there are machines that will do that. There is that same machine will blow lots of the oats into the stack. Any old cylinder and concave will do the shelling all right, but it is the taking care of the oats and getting them out of the separator before the fan blows them into the stack to be wasted. I would like to hear from others on this subject.—J. C. Mahoney, Kane Co., Ill.

A Good-Sized Manure Spreader.
After five years' experience with a manure spreader I think this machine one of the most profitable machines on the farm. Within a radius of five miles of me there are ten or twelve machines and they are increasing in number here every year. One man with a spreader can haul out more manure and spread it better than two men with a wagon can after following the old style of spreading manure. The manure that works best is, of course, rotted manure, but it is a good plan to mix the different kinds of manure, as it spreads more easily and better both for the team and man. A considerable amount of litter in manure does not increase the difficulty of handling it unless the manure has been heated up or burned up largely. Then unless it is well shaken it will come off in flakes once in a while, but will not make much trouble if properly handled. The weight of my machine is about 1,700 pounds. I use two horses and would not think of getting a smaller machine, nor would I recommend any man to get a small one. A. R. Williams.

Washington County, N. Y.

Fecundity of Swine.
The fecundity of swine is one of the principal factors that makes them valuable as meat producing animals. The fact that a healthy sow will produce from six to twelve pigs at one farrowing makes her one of the chief money-makers on the farm. The other fact that she will bear two litters a year if allowed to do so makes her still more valuable, from the standpoint of possibilities.

HORTICULTURE

The Windflower or Anemone.
It will be only a short time before little "Annie Money," as one we called it, will be showing her sweet spring face in sunny wild spots. Do you know her when you see her? She is very likely to be the first flower you pick this year for it is her winsome face which usually helps the birds to tell you that spring has come. Is there a prettier flower in the whole wide world than the first Mayflower? This is probably the name which many of the children give to the anemone; perhaps others call it the windflower, and perhaps still others have seen it spelled anemomy instead of anemone. They are all of them right. The word anemone is a Greek word meaning wind, so we have formed the habit of calling it windflower. This is really the family name for the flower, just as your family name may be Smith or Jones. The anemone family is a big one, for in it there are eighty-five members each with a name of their own to distinguish them from the rest of the family. Some of the members of the family are very tiny and modest indeed looking quite unlike their larger and sometimes more handsome brothers and sisters. But as a family they are very modest and shy and do not flaunt their colors. If you find them it is because they are so very sweet that you will make a search for them. Every one of the eighty-five are hardy perennials. That is they grow easily and live on from year to year without replanting.

Having One's Own Garden.
One of the best plays in the world is to have a small piece of ground for your very own to use as a garden. It is very much like reading a fairy story to watch Mother Nature at work, changing little brown and black seeds, some of them no bigger than a pin's head, into beautiful bright green plants. Only it is ever and ever so much better than any fairy story, because it is really true.

The best way to plan your garden is to divide it into several plots and plant whatever you wish in each plot. If you are not sure just how to go to work, mother or father who have become quite familiar with Nature's ways, will help you just a little until you understand how. Then after the seeds are planted keep your bright eyes open and see how many of Nature's secrets you can discover all for yourself. She has hosts and hosts of them and some are very hard to find out. But you may discover many things which will help you to do better gardening next year. Luther Burbank is spending his life in studying Nature's secrets and in turning them to good use.

Dwarf Apple Trees.
Dwarf apple trees have never been very popular in this country, though they have been now and then boomed by the men putting them on the market. The reasons why they have not been more popular are chiefly that they are not long lived and frequently are not great bearers. There is a place however for the dwarf apple tree and that is principally on the farm where the standard varieties have but just been set out and will not come into bearing for many years. A few dwarf trees should give good satisfaction, as they should come into bearing some years before the standard.

Spraying Pays.
If there is one thing that has been demonstrated on the farm devoted to the growing of tree fruits it is that it pays to spray the trees. There are some fruit growers who still regard this as an innovation, but it has been practiced so long that it has been scientifically demonstrated.

Take Off the Mulch.
The mulch that has been covering the strawberry plants throughout the winter should be removed as early in the spring as it is safe to do so. If it remains on too long the vines are very likely to be injured. Strawberry plants begin to grow very early in the spring.

Birches as Ornamentals.
Birch trees make good ornamentals for use in the lawn in front of the farm-house. The weeping varieties of birches are especially beautiful. After they have begun to grow they should be trimmed up to the shape desired. Some of them are permitted to branch too low.

Horticultural Notes.
The soil water that can be used by plants is only in the form of a film. Only varieties of trees you know something about.

Mulching of land should be more generally practiced. Close attention to weeds will keep the plants growing.

Where Weeds Are Bad.
How to keep down weeds anywhere is a problem hard to solve. In our corn fields this question is a live one. My advice to farmers is to plow the ground thoroughly the first time. The morning glory proves to be a bad weed in this locality, especially on some farms. Stamp weeds or Butterprints, as they are sometimes called, are about the worst weeds we have in this locality. We find that the state law on weeds is a dead letter. Perhaps if the law was enforced it would be all right.—O. C. Hartzell, Mason County, Ill.

Clean Cattle.
Some men keep their cows and horses clean, but neglect to do anything to help the cattle keep clean. Perhaps we have not the same reason for keeping beef cattle clean that we have for keeping dairy cows and horses clean, but certainly there is enough to be said in favor of keeping any kind of stock clean. Looks count for something, and any man that has pride in his farm and his live stock will keep them clean even if he can not see the money side of the question.

Riveting with Machine.
In riveting with pneumatic hammers two men and one heater averaged 500 rivets in ten hours, whereas by hand 250 rivets is a good day's work for three men and one heater. The cost for each, according to the Engineering Mining Journal, was 1-62 cents by pneumatic hammer, and 3-65 cents by hand.

In a Pinch, Use ALLEN'S FOOT-EASE.
A powder. It cures painful, smarting, nervous feet and ingrowing nails. It's the greatest comfort discovery of the age. Makes new shoes easy. A certain cure for sweating feet. Sold by all druggists, 25c. Trial package, FREE. Address A. S. Olmsted, Le Roy, N. Y.

Wealth in Old Hotel Structure.
In altering an old hotel in New York city it has been found that the beams, floor boards and woodwork are of solid mahogany. The structure would prove a perfect mine of wealth if it could be razed, but the owner refuses to allow this to be done under any circumstances.

Worth Knowing
—that Alcock's are the original and only genuine porous plasters; all other so-called porous plasters are imitations.

Victoria Cross.
The Victoria Cross was instituted fifty years ago, Jan. 29. Since then only 520 persons have received it, 517 of them soldiers or sailors and three of them civilians who were acting in a military capacity when they did "in the face of the enemy" the gallant deed which won them the cross.

Mrs. Winslow's Soothing Syrup.
For children teething, softens the gums, reduces inflammation, allays pain, cures colic, 25c a bottle.

Church Trumpet.
At Braybrooke church, England, is still to be seen a monster trumpet, sixty-six inches long, which was used in the early part of the last century to summon the people to church instead of church bells. It was also formerly used by the choir leader during service.

Lewis' Single Binder straight 5c cigar.
Made of extra quality tobacco. Your dealer or Lewis' Factory, Peoria, Ill.

Sixty of Rembrandt's original etched copper plates have been discovered by Mr. Victor Thomas at Valenciennes, and they are believed to have been lost for a century. They are to be distributed among collections in Paris, Brussels and Amsterdam.

FITS permanently cured. No fits or nervousness after first day's use. No loss of strength. No cost. Send for FREE 25-cent trial bottle and treatise. DR. H. B. KLINE, Ltd., 20, Arch Street, Philadelphia, Pa.

Bahama Island Vegetation.
The plants of the Bahama islands have been found by Dr. W. C. Coker to embrace 550 species, including twenty useful fruits, twenty-five cultivated fruits and ten ornamental trees.

U. S. NAVY enlists young men and mechanics. Permanent Recruiting Station, Postoffice Building, Omaha, Neb. Sub-Stations, Burr Block, Lincoln, Neb., and Postoffice Building, Council Bluffs, Ia. Temporary Recruiting Station open at Sioux Falls, S. D., April 9th to 14th; Yankton, S. D., April 15th to 21st; Sioux City, Ia., April 23rd to 28th; Des Moines, Ia., April 30th to May 5th, inclusive. Opportunity for advancement and special mechanical training better than ever before. Pay \$15 to \$20 per month, besides allowances. Apprentice Seamen enlisted between 17 and 25 years are transferred to a Naval Training Station, others to a Navy Yard. Good openings for Machinists, Electricians, Copper-smiths, Musicians, Carpenter, Stenographers, Firemen, Bakers, etc. Call at or address any of the above Navy Recruiting Stations for full information as to pay and terms. Enlistments four years. Only citizens of the United States of good character are accepted.

Women Shylocks in London.
It appears that there are many female Shylocks in London. They are all old women, and, as usurers, are said to be much more grasping and merciless than their male colleagues.

Even the microbe may be a lady killer.

Women in Our Hospitals

Appalling Increases in the Number of Operations Performed Each Year—How Women May Avoid Them.

Going through the hospitals in our large cities one is surprised to find such a large proportion of the patients lying on those snow-white beds women and girls, who are either awaiting or recovering from serious operations.

Why should this be the case? Simply because they have neglected themselves. Female troubles are certainly on the increase among the women of this country—they creep upon them unawares, but every one of those patients in the hospital beds had plenty of warning in that bearing-down feeling, pain at left or right of the head, nervous exhaustion, pain in the small of the back, dizziness, flatulency, displacements of the organs or irregularities. All of these symptoms are indications of an unhealthy condition of the female organs, and if not heeded the penalty has to be paid by a dangerous operation. When these symptoms manifest themselves, do not drag along until you are obliged to go to the hospital and submit to an operation—remember that Lydia E. Pinkham's Vegetable Compound has saved thousands of women from surgical operations.

When women are troubled with irregular, suppressed or painful periods, weakness, displacement or ulceration of the organs, that bearing-down feeling, inflammation, backache, bloating (or flatulency), general debility, indigestion, and nervous prostration, or are beset with such symptoms as dizziness, lassitude, excitability, irritability, nervousness, sleeplessness, melancholy, "all-gone" and "want-to-be-left-alone" feelings they should remember there is one tried and true remedy.

Lydia E. Pinkham's Vegetable Compound Succeeds Where Others Fail.

The following letters cannot fail to bring hope to despairing women.

Miss Ruby Mushrush, of East Chicago, Ind., writes:

Dear Mrs. Pinkham:—I have been a great sufferer with irregular periods and female trouble, and about three months ago the doctor, after using the X-Ray on me, said I had an abscess and would have to have an operation. My mother wanted me to try Lydia E. Pinkham's Vegetable Compound as a last resort, and it not only saved me from an operation but made me entirely well.

Mrs. Alice Berryhill, of 313 Boyce Street, Chattanooga, Tenn., writes:

"Three years ago life looked dark to me. I had ulceration and inflammation of the female organs and was in a serious condition. My health was completely broken down and the doctor told me that if I was not operated upon I would die within six months. I told him I would have no operation but would try Lydia E. Pinkham's Vegetable Compound. He tried to influence me against it but I sent for the medicine that same day and began to use it faithfully. Within five days I felt relief but was not entirely cured until I used it for some time.

"Your medicine is certainly fine. I have induced several friends and neighbors to take it and I know more than a dozen who had female troubles and who to-day are as well and strong as I am from using your Vegetable Compound."

Lydia E. Pinkham's Vegetable Compound at once removes such troubles. Refuse to buy any other medicine, for you need the best.

Mrs. Pinkham, daughter-in-law of Lydia E. Pinkham, invites all sick women to write her for advice. Her advice and medicine have restored thousands to health. Address, Lynn, Mass.
