MY PRICES ARE REASONABLE AND PROMPT

ATTENTION GIVEN TO ALL CUSTOMERS.

WE TAKE

Off Our Hats

To OUR FRIENDS and CUSTOMERS But to OUR COMPETITORS

NEVER!

This is because we always have the best goods the market produces. We always have the latest and most up-to-date, and we never burn our fingers and your pocket books with experiments.

For the benefit of our old customers and those new ones whom we

hope to make, we are going to publish a series of statements regarding the Litchfield Manure Spreader. These communications will occup this space each week, and we hope to make them interesting as well as useful.

The Litchfield Manure Spreader did not "happen" into existence as same machines do, neither was it designed and put on the market in a careless, hurried manuer. This machine is the product of one of the oldest foctories in Iowa. Its existence today is due to the wonderful care and large amount of expense and attention given to its

These spreaders are built for busines. They combine the essential qualities of light draft, ease of operation, simplicity in construction, and last, but perhaps most important of all, practically indestructi-

bleness.

Many entirly new and strictly original features have been embodied in this machine. We claim for it every point of advantage found in any other machine. Besides this, we can show you more than a dozen important points that are vitally essential and that can be found in no other spreader on the market.

These are claims it is true, but the best evidence that we know what we are talking about is the machine itself. Come and see it. It will be worth your time, and some day you will tell us we did you a favor when wesold it to you.

You can see the machine in our warehouse and we will show it to you on your farm, if you say the word. Buying a Manure Spreader is not spending money, it is investing it. Next week we will tell you about the "only one lever on this machine." Watch this space next week.

T. M. REED.
