Nicotine in Tobacco.

A scientist writes: "The essential quality for which tobacco is smoked or chewed lies not really in the leaves themselves, but is contained in thousands of hollow-knobbed hairs which cover their surface. The vital nicotine is garnered in these pearlike balls, but as it is impossible to shave off these hairs, and would be a scarcely commendable achievement if it could be undertaken, it becomes necessary to preserve the whole foliage for commercial purposes."

SORES ON HANDS.

Suffered for a Long Time Without Relief-Doctor Was Afraid to Touch Them-Cured by Cuticura.

"For a long time I suffered with sores on the hands which were itching, painful and disagreeable. I had three doctors, and derived no benefit from any of them. One doctor said he was afraid to touch my hands, so you must know how bad they were; another said I never could be cured; and the third said the sores were caused by the dipping of my hands in the water in the dye-house where work. I saw in the papers about the wonderful cures of the Cuticura Remedies and procured some of the Cuticura Soap and Cuticura Cintment. In three days after the application of the Cuticura Ointment my hands began to peel and were better. The soreness disappeared, and they are now smooth and clean, and I am still working in the dye-house. Mrs. A. E. Maurer, 2340 State St., Chicago, Ill.,

THIEVING SQUIRREL DRIVEN OFF

Robins Successfully Defend Nest Against Marauder.

A pair of robins proved too much manner. The secret was out when of the redbreasts had built their nest.

His little eyes glistening and his whole manner that of a thief, he her mate saw him and flew down from their upper perch. They were on Mr. Squirrel in an instant, and the fur flew when their beaks got into action. The retreat of the squirrel was quickly effected. The watchers were amused. Then a second time the robber advanced, and was so successful as to get one of the eggs in his paws before the birds came to the rescue.

The squirrel was nonplussed, as he couldn't back down with the egg with the birds pecking him, and he was loath to relinquish his hard-won prize. His hesitation was fatal, though, as the birds, with a concerted rush, fairly shoved him out of the nest, and the obins followed him so quickly and furiously that the egg was dropped and smashed on the ground. The squirrel then gave up his purloining expedition.-Philadelphia Record.

The University of Notre Dame, it appears, has some features that can not be duplicated in any other school. It is one of the old, well-established colleges, with settled traditions reaching back sixty-four years, with a distinguished staff of professors and excellent library and laboratory equipment. Its discipline is of the paternal kind-strong without being oppressive; and as it embraces in its scope the grammar school, high school and college work, its appeal is as broad as it is potent. Perhaps the most remarkable feature of the famous Indiana University, however, is the fact that it has arrived at its present marvelous development absolutely without endowment. An announcement of the courses provided at Notre Dame appears on another page.

The official staff consisted of "masters of the house of metals," or assayers, scribes and secretaries, to make inventories of the output of the mines.

Veterans Rapidly Passing Away. Veterans of the civil war are dying now at the rate of 100 a day, according to records of the United States pension office. The monthly reports for several months past have shown the death rate among the old soldiers to be in the neighborhood of 3,000 a month. Pension office officials who have watched the figures closely and know the tendency of the death rate are of the opinion that the number of civil war pensioners has reached the maximum and that hereafter each succeeding month will show a de-

> Writer's Cynical Justification of Mean Piece of Work.

A certain gifted writer of whom it was once said that he wouldn't recognize his wife if he met her on the not so long ago, and it was printed in a popular magazine. His friends and author moved recognized the story as an exact and recent transcript from the life of the writer, involving a very beautiful young woman, also well known in the same set. One man, coming across the author, took him to task for it.

"What in the world did you write up that affair with Miss Blank for?"

The author looked at him unmoved and with the same exquisite calm and clearness that characterized his work,
