Mondell Homestead Lands

We are receiving thousands of inquiries about the 320 acre free homestead lands available for settlers under the Mondell Act. These lands are located in eastern Colorado and in Wyoming along the Burlington. The great advantage of this new homestead law is that the settler is permitted to take up free, 320 acres instead of 160 acres, the larger tract being required under the new dry farming methods; north-eastern Wyoming has from 16 to 21 inches of moisture, and has produced some of the finest crops of grain ever seen in the west.

I personally conduct excursions on the first and third Tuesdays of each month to these lands. Write me for special descriptive folders, literature, etc.

IRRIGATED LANDS IN THE BIG HORN BASIN.

These government irrigated lands are being fast taken up by settlers who realize the coming value of the Big Horn Basin lands in view of the railroad development in central Wyoming.

The United States Land and Irrigation Commission at Chicago, Nov. 20 to Dec. 4, will be of vital interest to the farmer.
