THOSE SUMMER ROMANCES

led Awakening of Man Who Asked the Girl of His Dreams" for Her Hand.

The dark wood had become ross and sweet. A new dawn had entered toto Harkaway's vision, and it was all golden, says Harper's Weekly. Mabel, as they paced the sands on that wonderful moonlight night, had yielded to his passionate entreaties, in which he had voiced all the aspirations of his ardent nature and had spoken a soft yes to his ques-

"Yes, Harold," she had murmured, with a shy glance at the moon-"yes,

dear, I will be your wife." For a long while Harkaway was si-Sent. He feared to brenk the spell of one, beginning early in the spring and the moment with ordinary buman speech. So far and away beyond his gust. This was not always the case, real expectations had ber answer been that it was difficult for him for the time being to realize that it was not jul cultivation which has been made all a dream, and who could tell but profitable by the ever-increasing dethat the sound of his own voice would mand for the product. awaken him to a lonely reality? Thus Until recent years the wild or field

dear, I will be your wife."

kindly cloud obscured the moon for a second, as though to hide her blushes. "Tomorrow I shall go to New York,"

he cried, his heart elate. "What is your father's address, sweetheart?" "Father?" she repeated. "Oh-fa-

ther's address why, it is steen-hundred and two Wall street. What do you want daddy's address for, dear?" "I am going to ask him to smile upon our-" he began.

"Oh, no, Harold," she remonstrated "I wouldn't do that. Dad's very busy, and we never bother him with little things."

"Little things?" he cried.

"Yes, dear. They annoy him very much, indeed," she replied. "I don't think I'm engaged to a single man now who's been to see popper-it makes him so mad when the fall comes and I break it off."

Motor Omnibus Useful in War.

The great army maneuvers this year will, as usual, possess many new and interesting departures affecting modern warfare. Among other innovations it is this year anticipated that motor omnibuses will play a very great part in the maneuvers.

Each motor omnibus will be provided with room for 50 soldiers, and possess a speed of about 25 kilometers an hour. This experiment was tried autumn in Germany, and was found to work spendidly, the men being conveyed to the desired positions far quicker than if they had marched on sot, in addition to reaching their destination much fresher and readier

for the work before them. This year when a long march is taking place it is intended to use the motor buses in conjunction with foot marches. The bones will convey a portion of the troops ahead, drop them at a certain point, whence they will continue their murch refreshed with the rest and the drive, and the buses will return to the main body for another load of soldlers, who will in turn be conveyed to the now advance

The Flags of France. From the time of Henry IV. 1889 to 1794, a white fish was the standard of the French monarchy. It consisted of a white field bearing three fleurs dedie in gold. This was the fing of Prance at the time of the conquest of Canada by the British. In 1794, during the Revolution, the tri-color of three vertical divisions, blue, red, and white, was adopted. This was also the standard of the empire under the two Napoleons, but it was powdered with golden bees and on the center stripe was the engle of the empire. The tri-color is the fing of the republie at the present time.

Students Find Relics 700 Years Old. Skeletons and skulls of centuries ago are being exhumed near the oths of the Topango and Temescal canyons in California by geological students from Stanford university For years tides have been washing away an occasional relic of former life on this coast, but the Stanford stuats have followed the lead and dug further back from the shore. The rch has also been rewarded by the andry and warfare. The explorers believe the remains are about 700 rears old.

"Has that murtle worried your dos

"No," replied the man who likes animals. "On the contrary, I think he has improved in both health and dissition since it become more diffi wit for my wife and daughters to ed him candy and salads."

Literary Note. What is the moral of William de Morgan's novels?" "Don't write fiction till you're old enough to know how."

A Good Guesser. Ten can't guess what sister said et you just before you came in Higheollar," said little Johnnie. "I haven't an idea in the world,

That's it. You guessed it the very

Well I can't martly say.

BERRY CROP IS SHORT | supply is large enough, but few people care to travel any great distance to obtain raspberries as they do blue

Cultivated Product and Bad Seasons Reduce Supply

Demand Also Increases Faster Than Supply-This Answer Applies Particularly to Strawberries -Culture Found Profitable.

Bangor, Me.-Years ago during the summer season everybody in Bangor and eastern Maine had plenty of raspberries and blueberries at low prices. Now the berries are scarce and costly, and people are wondering why. There are undoubtedly many ex-

planations and probably all of them would be true enough, but the real cause of it all is that the demand for perries has increased much faster than the supply. This answer applies in a general way to all berries but is particularly true of strawberries.

The strawberry season is a long lasting until nearly the first of Aupowever, and the great length of season has been brought about by care-

they walked on for a brief period, and strawberries were the only ones to be then summoning his courage to his found in the market in large quanti- less than a month's time, provided he ties, and even then the demand was is prepared to spend some money. Blueberries have been bad descent was indicated rather cultivated without trouble-in fact the quaintly by one airman of experionly trouble comes from the rapid ence, who contends that "you can spread of the bushes after they have smash up a machine apparently quite once been planted, and those who badly, and yet the repair will not be have taken any pains with blackberry more than \$500. An awkward land- and went mussel fishing. He found a cultivation realize that they are even ing, causing the breaking of a skid more profitable to raise than strawber- or several wooden stays, will not cost has sold for \$350. It is the third large ries and just as easy to market.

With raspberries and blueberries the natural supply of wild berries has been depended upon, and this changes from year to year, the demand being entirely dependent upon the supply and the price being made by the

pickers. Raspberries have to be picked one at a time, and it is a smart picker who can pick twenty quarts per day. if the supply be large and the berries plentiful, and these, at an average give the picker from two to three dollars per day. But the supply of raspberries does not increase. It seems to none too soon. decrease. Sheep are kept in the pastures where the berries used to grow, and that spoils the "patch." Then supply has fallen off rapidly in the last few years.

In the large raspberry fields the ain's rarest stamp.

ing them, difficulty of transporting because of the perishable nature of the berries, and the fact of the season coming so close to that of the blue. berries.

To Save Wild Flowers. Vienna.-To prevent the devastation of the beautiful valleys among the mountains near Vienna, the city council has forbidden the sale in the streets of the rarer wild flowers, such as the wood anemone, wild cyclamen, price of from 12 to 15 cents, would all kinds of gentian, narcissus, iris. orchids, lilies and hart's tongue fern. The order, citizens say, has come

IN THE PUBLIC EYE

MOISSANT, THE MAN-BIRD

John Moissant, the young Chicagoan who startled the world by his flight across the Dover channel with a passenger on his way from Paris to London, has been a "soldier of fortune" from his early youth. Moissant was born of Spanish parents and is an architect. He suddenly came into prominence when he unexpectedly flew from Etampes to the Issy military ground, passing over the Eiffel tower.

Moissant is thirty-five years old and is of slight build. He is seemingly very jovial in temperament. He first visited Paris some months ago and became interested in the study of aviation. He had two machines built after his own designs and found the subject so fascinating that he determined to become a practical airman.

The Moissant brothers, George, Alfred and John, and two sisters, for many years had interests valued at several hundred thousand dollars in Salvador. In 1907 George and Alfred Moissant were arrested and imprisoned on charges of aiding and abetting the revolutionists. John was actively implicated in the movement against President Figueroa, and handled a rapid-fire gun for the Nicaraguans. When the revolutionists were repulsed John Moissant fled to Nicaragua. His brothers later were released, but their property was attached by the government as a bond to prevent their escape from the country.

When Moissant was sojourning in Honduras a tramp steamer loaded with a cargo valued around \$100,000 was cast ashore and abandoned. In a small dugout and in the teeth of a gale Moissant made his way alone to the vessel and took possession. In the morning, when the wind had abated the captain with some of the crew and an agent of the line rowed out to the vessel, which had withstood the fury of the waves, but which was held fast on a bar in the harbor. A shot from Moissant's revolver halted them. After some warm discussion the captain had to row back to shore to inform the American consul that Moissant had seized the ship and her cargo as salvage. During the night another storm came up and finished the work of wrecking the vessel. The American consul found Moissant lashed to the topmost rigging, only a few feet above the water.

HEADS KNIGHTS OF PYTHIAS

George M. Hanson, recently installed as supreme chancellor of the Knights of Pythias, hails from Maine. Mr. Hanson suggests physical and intellectual strength. Erect, broad shouldered, strong, capable of enduring vigorous and prolonged labor, and equally capable of mental activity and strain, he combines the essential qualities of a forceful and successful chief executive.

By profession a lawyer, he has been one of the leaders of the bar of his state. He has taken part in public affairs and held public office. In the city of Calais, in which he lives, he has been twice elected mayor. He was appointed collector of customs by President Cleveland, and by Governor Cobb of Maine a member of the commissionfor the revision and codification of the tax laws of that state.

In the order of Knights of Pythias he has attained the highest honor which that organization can confer. He became a knight in 1883, and though a member of other organizations and secret societies, has given of his time and talent chiefly to this organization since that time. He was the second chancellor commander of his home lodge. As soon as he was eligible he became a member of the grand lodge of Maine, and its grand chancellor in 1893. In 1897 he was elected supreme representative and re-elected in 1901 and 1905. In the supreme lodge Mr. Hanson has been a forceful figure, for ten years a member of and for eight years chairman of the judiciary committee, that being the ranking committee of the supreme lodge.

IN THE HOUSE OF GOVERNORS

William George Jordan has been appointed secretary of the house of governors. His selection by the governors is a recognition of his services as the founder of this unique institution, which is likely to become ultimately an official feature of the government. Mr. Jordan proposed the idea several years ago. It was immediately adopted by President Roosevelt and a conference of governors was called at Washington to consider the conservation of national resources. The results of the conference were so important that the governors on their own initiative called a meeting to discuss plans for greater uniformity in state legislation. At that conference it was decided to make the house of governors a permanent institution and a resolution was passed offering a vote of thanks to Mr. Jordan for his

part in the foundation and promotion of the third house. William George Jordan is a widely known editor and publicist. Some years ago he gave up editorial work to devote his time to writing. He has written largely on psychological and political topics. Mr. Jordan is the only member of the house who is not a governor.

NEW YORK'S ACTING MAYOR

Greater far than the governorship of many states, perhaps than any of them, is the mayorship of New York, which has lately been filled by a young man of only thirty-John Purroy Mitchell, who became the acting chief executive of the metropolis upon the disability of Mr. Gaynor. He is undoubtedly the youngest chief executive any great American city has ever had and it shows the great American capacity for government when so young a man can step into a seat of power so great, of honor so high and responsihilities so vast.

Within an hour after Mayor Gaynor had been struck down by an assassin's bullet it is safe to say that at least half the men in New York who give any attention to public affairs and their management had thought of John Purroy Mitchell, the young president of the board of aldermen, who, under the charter, would succeed to the first office of the city if the mayor's wound should result

Mr. Mitchell was twenty-eight years old, and had been practising law on his own account for five years, when the making of his public record began. It was to the family to study law, and young Mitchell had determined on that before he went to college. Consequently when he came to the elective courses in his junior year he turned aside from the distinctive sindles of the arts and chose those which he believed would help him in his intercareer. He went in for political science, the science of government, pontical history, and that sort of thing.
