the valleys of Mexico; in the basin of the Mississippi and on the western slopes of the Rocky mountains. Horses, too, must have been numerous in this country previous to the appearance of man, researches having brought to light their fossilized remains mixed up with pottery and the stone arms of cave dwellers. How is it, then, that the equine race,

represented in America by kinds of fossils considerably more numerous than in Europe, came for a time to vanish from this country to reappear thousands of centuries later with the Spanish conquest? For but a ceutry after Cortez there were already in existence herds of wild horses in the regions of the mata and the prairies of the far west
