The Roshynski case in which defendant was alleged to have disposed of mortgaged chattel property, was on for trial on the first afternoon concluding yesterday morning the jury bringing in a verdict for defendant, the evidence failing to find said defendant had sold property on mortgage record in this county, for the reason said property was not of record in Sherman county. Two divorces have been granted this term, Ellis vs. Ellis and Stickney vs. Stickney, while the DeWitt and Fellows divorce cases will probably be heard today. Occupation for Women.
Two women, maybe more, occupy novel positions in the business world in New York. These women are employed by a number of wholesale dress goods and millinery houses to entertain women buyers from out of town in the theater, and make the sojourners' stay in New York pleasant. The expense, of course, is charged to the houses employing them. The individual charges of these women entertainers usually are about one-fourth of the total expense.

IRRIGATED LANDS ASSERT THEIR VALUE

The irrigated areas in the Big Horn Basin and the Yellowstone Valley present at this time a wholesome example of the value of irrigation. On the Government irrigated homesteads in the vicinity of Balston, Powell and Garland, Wyo., and along the Yellowstone river near Hmly, Mont., there are magnificent crops of alfalfa, wheat, oats, potatoes, sugar beets, etc. An ample supply of water is furnished through the season by the Government. Along the Big Horn River, upon lands taken under the Carey Act, there are likewise extensive areas of profitable crops.

The Government irrigated homesteads under the new Reclamation act are now available for entry. These include some of the most valuable and easily irrigated lands in the Basin. They are surrounded by protecting and magnificent mountain ranges. Local and Government agents help you in every way to select your land, and they take a deep interest in the development of your farm.

The writer visited that locality the week of Aug. 6th to 12th and saw everywhere such excellent yields, such highly developed farms, canals full of water, fast growing towns, new land going under cultivation, as to warrant this statement, that there are not today, in the United States, better chances for successful farming and future homes than upon the irrigated lands of the above named regions.

Join our personally conducted excursions during the autumn and see for yourself what I am trying to make plain to you.
