## **ERRORS OF MANAGERS**

Often Turn Down Players Who Later Become Stars.

Ward Miller, Secured by Cubs for \$300, Now Held at \$10,000 by Montreal Club-Hitting Above .300 Mark.

Some of the men who buy and sell ball players certainly do have some bad half hours. What would you think if you had purchased a ball player for \$300, had sold him for \$1,500 and then wanted him back and was asked \$7,000 and several players? Wouldn't you feel like swearing?

A couple of years ago a fellow named Ward Miller became the property of the Chicago team-was drafted from a small minor league and cost \$300. Manager Chance looked him over and figured he wasn't quite right, He asked for a waiver, and the Pirates refused to allow him to go. That was in the days when you had to sell a man for whom you asked waiversno pulling back. Miller went to the Pirates, Clarke looked him over. After a while he decided Miller wouldn't do. and the latter went to Cincinnati on a trade that made Blaine Durbin, the former Cub pitcher, a Pirate.

Clark Griffith looked over Miller and backed the judgment of Chance and Clarke. He figured Miller would not do in the majors, and he went to the Eastern league. Well, this year Miller struck his stride. He is hitting over 300 for the Montreal club and running the bases like a wild man George Huff, the Cub scout, went to look him over. Huff wired President Murphy that Miller could be secured for \$7,000 and two players.

"Stick around until tomorrow; may be they will come down," was Mur phy's answer by wire to his scout. The next day the Cub president received an answer. It read like this: "Price has gone up-now they want \$10,000." and the telegram was signed Huff "Catch the first train or they'll boost the price to \$20,000," were the instructions of President Murphy. Don't you suppose the Cub magnate feels like bottling himself when he thinks of the time when he had this fellow at a cost of \$300?

And these same baseball men will give you a warm time if you attempt to convince them that O'Toole, the St. Paul pitcher, cost Barney Dreyfuss \$22,500 in real money. Here's one that President Comiskey of the Sox tells on Joe Cantillon. Joe, it will be remembered, was formerly the manager of the Washington team in the American league and then went to Minneapolis to boss that team.

"Joe had heard that somebody had offered Lennon \$12,000 for O'Toole," said President Comiskey. "So the next time that oJe saw Lennon he opened on him: 'I understand that you have been offered \$12,000 for O'Toole,' said Joe. 'Yes,' was Lennon's reply. 'Well, I guess I'm the biggest fool of all, mitted in New York the Reds are aft- said Joe. 'In the first place I didn't know there was anybody in baseball Jack Coombs says the life of the so crazy as to offer that much money for any ball player. And, in the next place. I would have sworn there was nobody in baseball crazy enough to have turned down such an offer, once

Which shows you that the fans were not the only ones to gasp at the price. Even practical baseball men had a difficult time believing that any magnate would separate himself from that amount of money for a ball player.

#### GREAT FUTURE FOR HARMON form that made him the sensation of

Manager Bresnahan Predicts Twirler Will Be Baseball's Greatest Pitcher Next Season

Roger Bresnahan of St. Louis predicts Harmon will be baseball's greatest twirler next year. "One of" would sound a little better, since Ford, of the Yankees; Johnson, of the Nation-

als; Alexander, of the Phillies; Mathewson, of the Giants; Adams and Camnitz, of the Pirates, and a host of other box stars, are still in the field for pitching honors, and O'Toole is

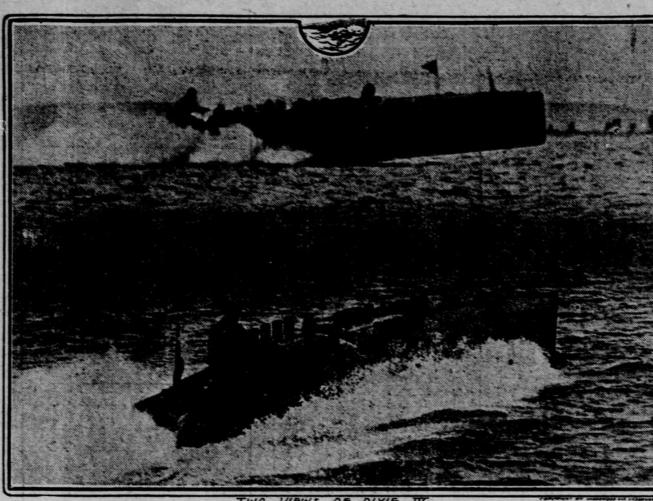

Woman Baseball Scout.

Washington is the first city to come across with a woman baseball scout. She lives in Lowell, Mass., and has written several letters to McAleer concerning ball players in the vicinity of where she lives, and Mac sends Mike Kahoe, the old Red catcher, up to see them work. He lost one man. She recommended Wolfgang, whom only Hans Wagner and they read col- the St. Louis Browns grabbed. Mc-Aleer is thinking of sending her out Doolan, but there's a chap who is on the road.

meandered toward the front door.

A little girl, trembling with excitement at the novel scenes about her, was standing in his way. He haited and said curiously: Cicotte is Consistent. Ed Cicotte is pitching more co sistent ball than any other flinger on Patsy Donovan's staff. The Fre man wants to show that John Irving Taylor would have made a great mistake by trading him to the White Sox.

# CAUSE OF TOOTHACHE WAR ON GROUND SQUIRRELS

High Tension Electrical Currents the wireless process, he asserts. Responsible for Suffering.

Physicians Have Traced Many Other Allments to Electricity-Increasing Use Causes Much Apprehension.

New York .- Wireless toothache, due to the high tension electrical currents produced in sending wireless messages, is the latest disease discovered by New York physicians, and it is said hundreds of wireless operators. professional and amateur, in this city and its neighborhood are suffering from it. Prediction is also made that the heavy currents discharged by the wireless telegraph will produce other nervous diseases among those who expose themselves too much to such phenomena. There perhaps are thousands of amateur wireless operators in New York city. Investigation discloses that many of them have had toothache since they began their wireless studies and experiments. What followed in the wake o' the current

A prominent European physician discovered the wireless toothache, and the bad effect of the high tension currents on the nerves of his patients. He predicts there will be a general increase of nervous ailments, due to that cause. That physician says the neurotic elements are affected so by the currents that a low grade neuritis ing to each patient's general physical condition, hygienic surroundings, ocafter day, must have a good constitution to withstand its effects. Weak receiving her friends who come to see persons even may suffer from aggra- the child. The baoy has received

When the European physician an-

nounced the discovery of wireless toothache he was scoffed at by other doctors, who had not studied the question as he had. The discovery, however, is being regarded seriously on both sides of the Atlantic, and skilled minds are seeking to discover what other ailments may be caused by such high tension currents being loose in the air.

It is recalled the X-ray affects the skin and tissues insidiously and often disastrously. Nor is it any secret that persons who are compelled to pass long periods in rooms where big dynamos are in operation frequently show neurotic tendencies. Physicians who away. use the ultra-violet, high tension and other forms of electricity in treatment | trapped by the federal employes, who often suffer neurotic affections. These are making every effort to prevent things indicate, it is suggested, that communication of the plague germ disease producing qualities 'urk in to the rats of the cities and towns electricity of which little is known as along the coast. When Jack got her to the front door, or marque, he met the balloon boy and

IT SAVES TIME AND TEMPER

Wise and Methodical Housewives Have a Cleaning Up Day About Once a Month.

A good plan followed by methodical ousewives is to set aside a day occasionally-say, once in four months or so-for a general clearance of oddnents and the putting straight of cupboards and wardrobes. One whole day passed in thus attending to details will result, later on, in the saving of valuable time and perhaps, of temper also. Apart from such important items as checking the contents of the linen supboard of kitchenware, etc., there are many things in the home that require regular attention.

On the "miscellaneous" day it is as well to lay down a dusting sheet in one particular room, which will serve as a receptacle for all rubbish intended to be thrown away.

· Writing desks will probably require considerable attention; old blotting paper should be consigned to the dustng sheet and replaced by fresh bloting paper; inkpots that have become clogged should be emptied, washed and refilled; pencils should be sharpened; old nibs thrown away and fresh mes substituted.

Another little task for the "miscelaneous" day is to collect together blunt knives and scissors and send hem to be sharpened. Music, too, nay be looked through and torn pieces set aside for mending later on.

Then again, if time permits, it is well to include in this occasional work the overhauling of traveling trunks. noting any repairs that may be necessary, seeing that straps are in their places and locks and keys in good orier, and polishing any leather trunks hat look dusty, and would be the beter for the application of nourishing

#### LEGS FOR TRUNK DEVISED

They Are Pivotally Attached to the Corners and Fold Along the Bottom.

An Illinois man's device for supporting steamer and other small trunks so that the owner does not have to break his back or get down on his knees to get into them should interest many people. This supporting device consists of four legs, each pivotally attached to a corner of the

trunk at the bottom. When not in use the legs fold up along the bottom line of the trunk and protect the corners When the receptacle is to be packed or unpacked or is to be used as a bureau in a two-by-four hotel room, the legs can be extended and locked into position, supporting the trunk about eight inches above the floor and making it much easier or access. In either the extended or the folded position the legs are so firmly locked that there is no danger of their collapsing, in the one instance, or being broken off, in the other.

Removing Grease.

If your kitchen table is spotted with grease, or if the dresser has dabs and spots of grease on it, you can clean the woodwork perfectly by scrubbing it vigorously with hot water to which a teaspoonful of whiting has been added.

Wipe thoroughly dry with a clear cloth and the wood will be as good as

dresser covered with white table oil cloth that can be washed after each meal. If you do use oil cloth provide vourself with thick mats of cardboard or asbestos on which to set hot plates or skillets, for heat will surely ruin any oil cloth with which it comes directly in contact.

Ragout of Vegetables.

Parboil one carrot, one turnip, two potatoes, two ears of corn, one cup lima beans, the same of peas, one onion and with them one pound of salt pork Slice all the above vegetables. Put into a saucepan with a cup of the soup before thickening: season well. Cut the corn from the cob and add with the peas and beans and a sliced tomato as soon as the rest are hot. Stew all together half an hour. Stir in a lump of butter rolled in flour. Stew five minutes and pour into a deep dish.

Sour Cream.

Sour milk and cream may be utilized in making cottage cheese, griddle cakes, etc. One-half cupful of thick sour cream added to a veal or beef loaf when mixing makes it very moist

and unusually good. Sour cream may also take the place of sweet milk in boiled dressings for salads and sandwich fillings. It is a splendid substitute for sweet milk when making chocolate or maple fudge for candy or cake filling.

Sour milk will clean silverware beautifully.

Starch Polish for Fine Linen.

To make a supply of starch polish to keep on hand for boil-starching

fine linens which require a gloss finish, melt together with gentle heat an ounce of white wax, two ounces of spermaceti; to melt them put them into an earthen jar and set in a pan of hot water placed on the back of the range. When well blended pour it into a mould and use a piece al the size of a hazel-nut, more or less, for the fine starched articles in an average washing.
