NEW PARTY CALLED

SENATOR DIXON ISSUES DOCUMENT FIXING CONVENTION.

TO ASSEMBLE IN CHICAGO

Nominees for President and Vice President Will Be Placed Before the People August 5th.

New York—A call to the people of the United States who are in sympathy with the "national progressive movement" to send delegates to a national convention to open in Chicago August 5 was given out Sunday by United States Senator Dixon of Montana, the colonel's manager. The call is signed by members of the committee chosen at a meeting held in Chicago, and also bore signatures of Roosevelt followers in forty states.

"The territories have no place in a national convention and will not be considered," declared Senator Dixon in commenting upon the signatures.

"As for the missing eight states, the most of them probably will send delegates, although they have not taken part in the call. Maine, for instance, postponed any definite action because there is now a strong fight on in the primaries, with the sympathy running in favor of the progressive movement. Delaware, North Carolina, Arkansas and Nevada probably will take part in the convention. Mississippi and South Carolina may possibly be unrepresented.

"The call lays no rules as to the methods of choosing delegates, since each state will be expected to select its delegates by its own paraphernalia. The representation will be cut down to just one-half of the previous convention. This was deemed advisable since this convention is to be notably a deliberative body and will certainly be composed of a class of men altogether different from those who usually attend conventions.

"In all probability the convention will adopt the name 'national progressives' for the new party, but I cannot say definitely what will be done. Thus far no issues have been authoritatively stated and of course the platform itself will have to be decided upon by the delegates."

The text of the call is: "To the people of the United States: Without regard to past differences, who, through repeated betrayals realize that today the power of the crooked political bosses and of the privileged classes behind them is so strong in the two old party organizations that no helpful movement in the real interest of our country can come out of either.

"Who believe that the time has come for a national progressive movement—a nation wide movement—non-sectional lines, so that the people may be served in sincerity and truth by an organization, unfettered by obligation to conflicting interests.

"Who believe in the right and capacity of the people to rule themselves and effectively to control all the agencies of their government, and who hold that only through social and industrial justice, thus secured, can honest property find permanent protection.

"To all in accord with views here set forth a call is hereby issued by the provisional committee under the resolution of the mass meeting held in Chicago on June 22 last to each state to send a number of delegates to the convention at Chicago on the fifth day of August, 1912, for the purpose of nominating candidates to be supported for the positions of president and vice president of the United States."

MORE HOSPITALS ARE NEEDED

Situation Improved, but Further Work is Needed to Stamp Out Tuberculosis.

Only four states, Mississippi, Nevada, Utah and Wyoming, have no beds whatever in special hospitals or wards for consumptives. Eight years ago when the National Association for the Study and Prevention of Tuberculosis was organized, there were 26 states in which no hospital or sanatorium provision for consumptives existed, and the entire number of beds in the United States was only 10,000.

"While these figures would indicate a remarkable growth in anti-tuberculosis activity," says Dr. Livingston Farrand, executive secretary of the National association, in commenting on the subject, "there are still practically ten indigent consumptives for every one of the 30,000 beds, including those for pay patients. In other words, we have from 250,000 to 300,000 consumptives in this country too poor to provide hospital care for themselves. If tuberculosis is ever going to be stamped out in the United States, more hospital provision for these foci of infection must be provided."

SKIN ERUPTION ON CHEEK
Kingsley, Mich.—"Last May my thirteen-month-old baby had a sore come on her cheek. It started in four or five small pimples and in two or three hours' time spread to the size of a silver dollar. It spread to her eye. Then water would run from the pimples and wherever that touched it caused more sores until nearly all one cheek and up her nostrils were one solid sore. She was very fretful. She certainly was a terrible looking child, and nothing seemed to be of any use.

"Then I got some Cuticura Soap and Cuticura Ointment. She tried to rub off everything we put on so that we would sit and hold her hands for two hours at a time, trying to give the medicine a chance to help her, but after I washed it with Cuticura Soap and then put on the Cuticura Ointment they seemed to soothe her and she did not try to rub them off. It was only a few days before her face was all healed up, and there has been no return of the trouble since. We thought that baby's face would surely be scarred, but it is
