and the same year he married Sarah Houston Fleming of Chattanooga. He entered the practice of law in New York in 1892, and since 1901 has been interested chiefly in tunnel construction there. He is president of the Hudson & Manhattan Railroad company.

**Lindley M. Garrison.**  
The selection of Lindley M. Garrison, vice-chancellor of New Jersey, to be secretary of war is in line with President Wilson's idea that the holder of that position should be a man of unusual executive ability. He is a close friend of Mr. Wilson. Mr. Garrison was born in Camden, N. J., November 28, 1864. He is a son of Rev. Joseph F. Garrison, an Episcopal

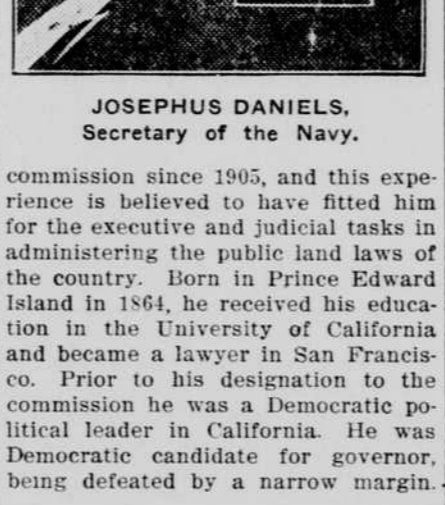

congressman from the Tenth district of Texas and was re-elected to the Sixty-third congress. He was born in San Marcos, Tex., in 1863, was educated at the Agricultural and Mechanical College of Texas, Baylor university and the University of Texas, and was admitted to the bar in 1884. He was assistant city attorney of Austin for several years before going to congress. Mrs. Burleson was Miss Adele Steiner of Austin.

Born in Prince Edward Island in 1864, he received his education in the University of California and became a lawyer in San Francisco. Prior to his designation to the commission he was a Democratic political leader in California. He was Democratic candidate for governor, being defeated by a narrow margin.

**CONSORT PICKED BY ROYALTY**  
Somewhat Summary Method of Mating as It is Done in the Kingdom of Siam.

Kings of Siam apparently do not believe in the wisdom of allowing single women to drift unattached about the country. In certain districts after a girl has reached an age where her securing for herself a husband is considered doubtful, she becomes a "daughter of the king." That is, the king takes upon himself the task of settling her suitably in life. His process is quite simple, and to the point. He proceeds to the Siamese penitentiary and looks over the various prisoners. There is a law in Siam that any prisoner can obtain his release by marrying one of this class of girls, and, naturally enough, any prisoner whom the king picks out is not likely to be backward about consenting to the ceremony. Nor does it make any difference if he is married, for the men of that country are not restricted to one wife. As far as can be learned, there is no allowance made for the inclination of the girl in question. She has fallen in her mission in life as far as she herself is concerned, and she must abide by the decision of the king.

**Cream Corn Soup.**  
Heat a quart of milk in a mush boiler, as milk scorches easily; press a small can of corn through a strainer to remove hulls. If the corn does not go through the strainer well, pour the milk into it; this will help to secure the pulp of the corn. Add a lump of butter the size of a walnut and pepper and salt to suit the taste. Beat the white of one egg to a stiff froth and stir into the soup lightly a few minutes before serving.

**Martyr in Love.**  
The nerviest youth we ever heard of was the one who proposed ten times to the same girl, and came to be turned down the tenth time. "Dear boy," explained the girl patiently, "I like you, but I shall never marry a bachelor. I have always said that if I ever wed, it should be to a widower." "All right," came back our young friend, cheerfully. "I'll qualify if you'll tell me which of your girl friends you'd like to have me marry first!"

The Baking Powder Question Solved

Italy's Fight Against Malaria.  
Reports from American consular officers in Genoa and Leghorn, prepared in response to inquiries from the United States as to the market in Italy for a remedy for malaria, show that the prevalence of malaria in that kingdom has steadily declined in recent years, mainly due, it is stated, to the energetic measures of the Italian government. Quinine prepared at the state military pharmacy at Turin is said by Consul General James A. Smith to be on sale at all government tobacco shops at 4 cents a gram and is distributed gratis to poor patients. Consul Frank Deedmer writes that in 1911 the number of deaths in Italy caused by malaria was estimated at 2,500 in a total population of over 33,000,000.—Daily Consular and Trade Reports.

**Superfluous Labor Counts.**  
The men who have achieved success are the men who have worked, read, thought more than was absolutely necessary, who have not been content with knowledge sufficient for the present need, but who have sought additional knowledge and stored it away for the emergency reserve.
