Will Mason, Gus Lorentz, Bob Starr, and Bob Mathew returned last Wednesday evening from their hunting trip up at Pony Lake. While none of the boys had any venture in the middle of the lake as the hunting party preceding them, yet it is said to be a fact that it was so cold that each concluded that they were veritable discoverers of the North Pole and we may expect all to go on the lecture platform and exploit their discoveries as a Peery and Dr. Cook. So far none of them have got thawed out sufficiently to relate their experiences.

A brilliant light, similar to that of the flash of an arc light, flashed for the fraction of a second across the southwestern sky last Thursday evening about 8:15 o'clock. It left behind it a trail of meteoric dust which was extra large and uncommon. As scientists have no record of such a meteor it is thought to be a stray one which happened to get within the atmosphere of the earth and after traveling several hundreds of miles burned out.

Lee Brothers will deliver your meat. Phone your orders.

Secretary W. R. Mellor of the state board of agriculture is planning a campaign to advertise the crop yields of the state for 1913. A number of "stories" have been sent to eastern newspapers, heralding widespread ruin and destruction. As a matter of fact the true reports are extremely creditable to Nebraska's resources. So glaring have been some of the reports that a number of advertising agencies had planned to cancel the Nebraska appropriations.

**"THE QUITTER"**

The rendition of the great society drama, "The Quitter" at the Daddow opera house in this city, Thursday evening, gave to our lovers of good drama one of the very best plays on the American stage today. "The Quitter" is one of the most intensely dramatic, requiring strongest emotional work, with, quiet, deep, intense veins of pathos, and requiring first-class acting in every line. The star of the constellation was L. H. Gerard, a Nebraska boy, born in Platte county, this state in 1886, nephew of the editor of the Monroe Looking Glass, and from boyhood evidenced splendid dramatic talent, and today stands among the leading young dramatists of the west. To those who were present, no words of ours could add emphasis to the encomiums heard in his favor. We do not see in what way his superb acting could be improved upon. The leading lady, Miss Sanger, is also recognized as a most clever, emotional actress, and ably seconded his good work, while all the cast was composed of artists in their line. To those who are in love with the barn-storming, pistol shooting, whoop and hurrah rough-and-ready rattle-brained plays, "The Quitter" would not appeal in the least, but to those who love high-class dramatic art, with quiet, deep, emotional effect, the play above is a pleasant, happy change from most of the "stuff" the play-going people of the smaller towns have to endure, or stay away from the theater.

**The 1913 Rye Crop**

Nebraska farmers devoted 159,817 acres to rye in 1913, according to the figures compiled by the state board of agriculture. The average yield per acre was 19.57 bushels and the total crop is estimated at 3,128,433. The market value, computing the yield at 60 cents a bushel, is \$1,877,138.16
