INQUIRY SAID TO SHOW PACK-ERS CONTROL 55 PERCENT.

Secretary Houston Learns of Alleged Attempt to Buy Up Short Crop of Potatees.

Washington.-A new phase of the ecst of living problem has been brought to the attention of the Department of Agriculture. T. P. Gill. secretary of the Irish Board of Agriculture, told Secetary Houston that speculators in the large cities of the United States were actively buying up this year's short American potato crop and planning to hold out for high prices, counting upon the existthat the measure will find a place on ing quarantine against potatoes from sent to the house appropriations com- the ballot at the state election next | many foreign countries to aid them

> Conference Held. Secretary Houston and the federal borticulture board held a conference after Mr. Gill's statement, but no action was announced. Representative McKellar of Tennessee, author of a pending bill to prohibit the keeping of products in cold storage for more than ninety days, was in conference with Department of Jüstice officials over the department's investigation of the storage of eggs, poultry and dairy products. It is said that a preliminary inquiry has revealed the fact that 55 per cent of the present egg supply held in storage is in the hands of the great meat packers of the country.

Letters and telegrams poured in from all parts of the country, from individuals, associations of various kinds and from business men, praising the department's effort to break high food prices by proceedings against the alleged combination of cold storage dealers.

Housewives who say they have felt the oppressive hand of high prices in many ways wrote telling of their individual experiences and heads of organizations, which have taken an active part in trying to reduce the living cost, expressed eagerness to tell what they knew. Many of the letters contained accusations against the packers of Chicago and charged them with responsibility for cold storage prices. Others blamed the middle-

Chamberlain Causes Mild Sensation Washington.-Senator Chamberlain of Oregon caused a mild sensation at a luncheon attended by all the Latin-American diplomats in Washington by announcing that he would vote for "Justice to Colombia from the United States," if he ever had an opportunity to cast a deciding vote in the controversy between this country and the South American country brought about by the separation from Panama. As soon as Senator Charaberiain sat down, Ambassador Da Gama of Brazil, dean of the Latin-American corps, suggested that the party break up, and in silence this

Ammunition Seized.

New York.-Ten thousand rounds of rifle and revolver ammunition were seized by customs inspectors aboard the steamer Seminole, lying at its pier here. The Seminole is to sail for Haiti and San Domingo. The confiscated ammunition was hidden in many different parts of the vessel. The Seminole's officers said they did not know of its presence

Anti-Snuff Law Valid. Bismark, N. D.-The North Dukota law prohibiting the sale of snuff, paseed at the last session of the legislature is constitutional. The state supreme court has so decided.

> Condensed Form to Our Readers.

Commissioner Harmon's office one day last week was the scene of deadly carnage, and a fight for life that became more and more exciting and tragic as the contest waged, and the slaughter continued. It was a battle of organisms and they tussled among themselves with great vigor in sweet potatoes, which were captured last week in a food inspection trip to the store of a provision company at South Qmaha. The potatoes were alive with the little 'unknowns," and imagfied through a microscope at 550 diameters the little bodies were watched in their conflict by many interested spectators. According to statements made by the head of the department, the provision company was ordered by an inspector a fortnight ago to take the goods off sale at once. During a recent trip to South Omaha the canned goods were found to be on sale at reduced prices. The official bought three cans of sweet potatoes and an equal number of cans of sardines. The spuds were full of the organisms, while the small fish were so stale that when the cans were opened the department's employes held their noses when attempting to get portions detached for further inspection with the micrscope. As soon as the state chemist's report on the goods is available Commissioner Harman will likely take the matter up in a legal way with the company.

State Bank Deposits Increase.

Deposits of state banks have in creased \$13.269.812.64 in the past year. and loans in the same period have A Sandy Road After Grading Before reached a mark \$9,533,425.28 higher than they were in October, 1912, according to the state banking board report just issued. The number of banks reporting is 714, with deposits of \$91. 794,086.44, and an average reserve of 25 per cent. Since August 26, 1913 loans have increased \$3,199,122.66, deposits have decreased \$2,400.140.39 and there are four new banks reporting Notes and bills rediscounted and bills payable have increased \$307,049.44. and the reserve has increased 5 per cent. The number of banks has increased forty in the year. Depositors numbered in the last report are 296,

EXPENSE SHOULD BE DIVIDED

Railroads Should Share With Farmer Cost of Building and Proper Maintenance of Roads.

(By HOWARD H. GROSS.) In a large sense the building of a road should be a local matter; that is, no community should have good roads forced upon them, and the building of the roads should not begin until the majority of the people living in a community want to undertake it. Let the voters of the township or the county press the button that puts the machinery in action.

It also would be well to remember that the roads are public property and belong to everyone. The farmers ought not to pay all the taxes for building and maintaining the roads they are the feeders for the railway lines. It is all important to the railways that the highways shall be kept

in condition so the delivery of freight will be equalized. There is no reason why the railroads should not be taxed to help build the county roads. The same may be said of the manufacturer and the city merchant who are doing business with the farmers; their interests are bound up in his interests. If one suffers, both suffer. The United States is a great big family, and what we need is family prosperity; those things done that make for the best good of all concerned. There is nothing that contributes more to this than good highways. They enrich country life and make the farm home more pleasant. It would be hard to conceive of a more delightful existence than to live upon a good farm with all modern conveniences-light, heating and sanitation-located upon a wellyear, the trip being made spe with comfort.

Investigation shows that at least four-fifths of the traffic on the highways passes over about one-fourth of the road mileage; that certain roads have heavy traffic. These are the ones that need the first attention and (English and German words) and recishould be permanently improved. We pes for dainty dishes. All 3 sent free. find the same thing in our railway sys Adv. tems. Take the trunk lines. Here is a great city where trains are moving every thirty minutes, and with an enormous traffic and wear. These roads must have beavy rails, well hallasted and carefully maintained while a pionemer road has a single track with light rails and hallast-it is the

Same Road After Macadamizing

only one possible to build for the small traffic that will at first come to it, but as the traffic increases so the physical ondition of the road is corresponding improved to meet the requirements The highways in the central west do

not meet the needs of the people, but the neonle do not always realize this We are too apt to get along with what we have without looking to getting something better. One of the surpris-ing things about this whole road 400,000 large amount of splendid roads and the adjoining state few, if any, Indiana and Illinois are notable instances of this. Nearly 40 per cent. of the "Hoosier" highways are improved and most of these are splendid roads, while in Illinois the percentage is seven or eight per cent. Can anyone imagine a reason why the people of Indiana can afford good roads, while their neighbors in Illinois cannot? This is an' absurd situation.

Improper and antiquated methods of handling eggs in the United States results in losses that reach an estimated total of \$45,000,000 unnually. This is 17 per cent of the estimated total value of the entire crop. Practically all this less is borne by the

FOR THE BOYS TO REMEMBER

How to Rescue a Person From Broken Ice With the Least Risk to Oneself.

To rescue a person who has broken through the ice you should first tie a rope around your body and have the other end tied or held on shore. Then get a long board, or a ladder or limb of a tree, crawl out on this, or push it out, so that the person in the water may reach it. If nothing can be found on which you can support your weight, do not attempt to walk out toward the person to be rescued, but lie flat on your face and crawl out, as by doing this much less weight bears at any one point on the ice than in walking. If you yourself break through the ice remember that if you try to crawl up on the broken edse it will very likely break again with you. If rescuers are near it would be much Improvement With Crushed Stone in | better to support yourself on the edge Town of Delton, Sauk County, Mis of the ice and wait for them to come to you.-From "Boy Scouts of America.
