

FEELS LIKE A NEW WOMAN

As Lydia E. Pinkham's Vegetable Compound Dispelled Backache, Headaches and Dizziness.

Piqua, Ohio.—"I would be very ungrateful if I failed to give Lydia E. Pinkham's Vegetable Compound the praise it deserves, for I have taken it at different times and it always relieved me when other medicines failed, and when I hear a woman complain I always recommend it. Last winter I was attacked with a severe case of organic weakness. I had backache, pains in my hips and over my kidneys, headache, dizziness, lassitude, had no energy, limbs ached and I was always tired. I was hardly able to do my housework. I had taken Lydia E. Pinkham's Vegetable Compound on one other occasion, and it had helped me so I took it again and it has built me up, until now I feel like a new woman. You have my hearty consent to use my name and testimonial in any way and I hope it will benefit suffering women."—Mrs. OPRIA TURNER, 431 S. Wayne St., Piqua, Ohio.

Women who are suffering from those distressing ills peculiar to their sex should not doubt the ability of Lydia E. Pinkham's Vegetable Compound to restore their health. If you want special advice write to Lydia E. Pinkham Medical Co., (confidential) Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence.

The Wretchedness of Constipation

Can quickly be overcome by CARTER'S LITTLE LIVER PILLS. Purify vegetable—act surely and gently on the liver. Cure Constipation, Headache, Dizziness, Indigestion. They do their duty. SMALL PILL, SMALL DOSE, SMALL PRICE. Genuine must bear Signature.

Not at All Extraordinary. Several years ago a tourist fell over the rock from a height of about three hundred feet, near Europa Point, Gibraltar. He was killed, of course. The lieutenant in charge of the guard room, however, inserted in his guard report for the day that "nothing unusual had occurred."

For this he was "carpeted" before the town mayor, who asked for an explanation. "Well, sir," replied the young officer, a Scotchman, "if the poor man had been killed, it would have been a very extraordinary fact; but as the poor body was killed—why, sir, I thought it was an extraordinary or unusual." The plea was accepted.

Biggest Rubber Tree of All. What is believed to be the largest rubber tree in the world stands in the Brazilian territory of Acre, on the frontier of Bolivia. Its stem is 27 feet 17-18 inches in circumference at the base. For 120 days every year this colossal tree gives 25 pounds of rubber a day. At present prices this brings in \$1,200 a year, or a fair interest on about \$50,000, to its owners, a family of seven Seringueiros.

Nothing Short of Calamity. Holding a glass of clear honey in the right hand, father observed impressively: "It cost the little bees many a weary trip to fill this with sweetness from the flowers." Little Laura, who had been listening closely, exclaimed, with great earnestness: "Wouldn't it have been too bad if one of them had dropped the glass?"

Congratulations. Wilby—How is your wife, Billy? Wilby—She's holding her own. Wilby—Is it a boy or a girl?

Everybody has a lot to tell that you have no right to hear.

It is generally possible to get away with craft, but you can't bribe destiny.

35 BUSHEL PER ACRE was the yield of WHEAT. WESTERN CANADA FREE. Thousands of similar instances are related of the harvesters in Manitoba, Saskatchewan and Alberta. The crop of 1913 was an abundant one everywhere in Western Canada. Ask for descriptive literature and reduced travel rates. Apply to Superintendent of Immigration, Ottawa, Canada, or W. V. BENNETT, Bee Building, Omaha, Neb., Canadian Government Agent.

No More Rotten Fence Posts. Get your fence posts made with the best material. Treat your posts with Better Wood and you will have them last longer and you will not have to replace them. For full instructions, write to the inventor, AL. ALTHEIMER, Stationer, 1211 E. 12th St., Kansas City, Missouri.

TIMELY HINTS ABOUT HORSES AND MULES

A Fine Type of Draft Horse.

(By E. S. MILLER.) A hat is a great protection to a horse's brain in hot weather. They can be bought at any store for 25 cents.

Sore shoulders are caused by ill-fitting collars and nothing else.

A man who will work a horse with a sore shoulder and make no attempt to cure it or change the collar ought to be compelled to wear ill-fitting shoes that would raise a new crop of blisters every week.

If the horses are taken off dry feed, allowed to run to grass, and work hard on hot days, look out for colic.

Work teams ought to be allowed to run in the pasture at night. It is cruelty to confine them in hot stalls.

The horse that sweats freely is in good condition.

During heavy work in hot weather, horses ought to be watered between the regular resting periods.

It does not make much difference whether horses are watered before or after eating. It is largely a matter of habit, and experiments show that one time is about as good as another.

A horse that bolts his food cannot have perfect digestion, any more than a man who eats in the same way.

Five minutes vigorous work with a rough cloth on a horse's hide after a hard day's work, will do him a lot of good.

A team that works in the fields all week should never be put on the road Sundays or holidays.

A cool bran mash Saturday night is to a horse what mother's pie is to a boy.

Mule colts are easy to raise and they are as good as money in the bank, because always salable at fair prices.

Always use box stalls whenever practicable. A horse tied in a narrow stall is never quite comfortable and is in more or less danger of being cast.

A mule is no more prone to kick than a horse unless he is taught to do so by bad treatment.

Horses very often lose their eyesight through dust and hayseed falling into their eyes from the loft above.

If the horses must be kept in the barn during the hot weather, keep all the doors and windows wide open.

GOOD SUGGESTIONS FOR THE SHEEPFOLD

Mistake of Turning Animals Out on Young Grass and Stopping Grain Is Expensive.

If you find a lamb apparently dead from cold, scouse him in a pail of water as hot as the hand can bear it. If he does not revive before the water becomes cool, heat it again and he will likely come around. Wipe him dry, give him some hot milk and in an hour he will be as fit as ever.

Lifting or dragging a sheep by its wool is just as humane as dragging a child around by the hair of its head. The wise shepherd will treat his ewes with the creosote solution for stomach worms before turning them out to pasture.

Salt is medicine to a sheep, and it is cheap medicine at that.

With spring lambs bringing from \$7.50 to \$8.50 in the markets, who can say there is no profit in the business?

The mistake of turning sheep out on young grass and suddenly stopping the grain feed is nearly always very expensive. It is likely to set the sheep back several weeks.

It is a fact that sheep can be raised on the least expensive of foods and return a better profit for the little care that is given them than any other farm animal.

Never keep an unthrifty ewe on the place. Fatten her as quickly as possible and get rid of her.

When breeding stock is selling away down low by discouraged flock masters that is the time to buy a few good ewes.

If you have plenty of alfalfa and barley, with some sound turnips, your young sheep will lay on fat amazingly fast. Don't need corn when you have these rations.

Do not allow the sheep to lie around in fence corners or huddle in underbrush. The best shade is a shed on open ground where there is no grass.

A little bit of shelter is fine for sheep. Even if it be nothing more than a high board fence on the side toward the sunshine it will help a lot. The sheep can snuggle up near to that and escape the direct rays of the sun.

Better than such a fence is a piece of woodland. We have a cluster of little hemlocks on our pasture, up on a side hill. The sheep run up into that and escape not only the heat, but also the miserable flies that hurt them so.

It is a queer fancy with some men that sheep can get enough drink by eating grass when the dew is on in the early morning. Stop and think how very, very little water a sheep could get that way. Give them a good spring or a trough to drink from.

Corn as a Feeder. Corn is not cheap and the feeder should make the most of it. The way to do this is to feed a little tankage, oil meal or middlings with it. Don't feed cottonseed meal to hogs. The hog pays the highest price for corn when he has some protein feed along with it.

Double Cropping. Owners of small areas can greatly increase returns by double cropping. It is especially desirable in town and suburban gardens. When properly planned and managed the crops do not interfere with each other.

Keep Boys on the Farm. To keep the boy on the farm it will be necessary to make the country forces as effective and inspiring as the city forces. The longest step towards accomplishing this result is to have good highways in the country.

Delay to Farm Journals. If you miss a few copies of your favorite farm journal because the mail carrier could not get to your house on account of the bad condition of your roads, you know the answer. Get busy this year.

Make Rapid Growth. Growing chicks should have a ration that will enable them to make rapid growth. It is false economy to stint them in either quality or quantity of grain or meat food.

TOMATO CANNING IS QUITE PROFITABLE

One Advantage Is That Industry Offers Employment to Young Folks During Vacation.

(Prepared by the United States Department of Agriculture.)

The canning of tomatoes has in recent years grown to be an important commercial industry, according to the department of agriculture. In 1909 there were 12,800,000 cases of 12 cans each packed in the United States. This immense pack exceeded the combined aggregate of any three other vegetables. Only tomatoes used in commercial canning and not those used in home canning figures in this total.

It is estimated that the area devoted to tomatoes in the home garden is equal to or greater than that employed in their field culture. Of the quantity grown in the garden a considerable surplus goes to waste and brings no return to the cultivator. To insure plenty of fruit for home use it is customary to set out about twice as many plants as are actually necessary.

In order that the canned product of the garden may find a ready market it must be put up in attractive form in containers suitable for commercial purposes, and should bear a trademark which is distinctive and which will tend to hold the trade for the product as it gains a reputation in the market. One advantage of the home-canning of tomatoes in comparison with other employment open to young people in the country, is that it occurs during the vacation period. The large return in canned goods derived from a single acre makes the industry remunerative and, since the canning can be done during the vacation season it can be carried on without interfering with school work. It is surprising how many tomatoes can be raised on an acre, and what little expense is involved in raising and preparing them for market.

Weaning Pigs. Our experience is against weaning pigs other than to let nature take its course; by this method we get better pigs, says a writer in an exchange. It is almost impossible to prevent them from receiving a check if weaned at seven or eight weeks old as some advise. You not only check the growth of the pig, but it seems great injury would result to the sow. No one would take a calf from its mother, refrain from milking her, and then expect the cow to escape without injury, and surely a sow must be something like a cow.

Use Pure-Bred Stock. If you are determined to get the most out of your business you will not feed mongrel stock. Nothing pays so well or is so satisfactory as the best.

Teach the Pig to Eat. Teach the pig to eat at as early an age as possible, gradually increase the feed until about two months of age, giving as much butter, or skim milk as they will take along with what grain they get, and weaning will not be hurtful to either the pig or dam.

Cull Surplus Cocks. Don't let any surplus cocks eat up the profits. Keep enough for breeding purposes and no more. If the others cannot be sold as breeding birds, get them into condition and market them.

ROAD BUILDING

EVOLUTION OF GOOD ROADS

One of Greatest Factors in Campaign Is Voluntary Work Being Done, Especially in West.

In the early days of our country emigration and settlement usually followed the waterways, particularly the Merrimac, Connecticut, Hudson, Mohawk, Delaware, Susquehanna, Potomac and James—always at a great loss of time and doubling or even trebling of distance. As soon, however, as permanent roads began to be made distances were greatly shortened and the time required for a journey, and especially for a military operation, was wonderfully lessened. General Braddock's expedition against Fort Duquesne failed more from the ex-

"Devil's Sickle," on the Colorado Springs-Canon City State Highway.

hausting necessity of cutting its way through the primeval wilderness from Fort Cumberland to Turtle creek and the difficulty of bringing up an adequate support than from attacks upon it by the French forces and their Indian allies. And when after Braddock's tragic death, in the course of his disastrous retreat, the command devolved upon George Washington, that young Virginian officer was forced by the slow progress made over the rough, newly cut roads to pitch camp at Fort Necessity, in southwestern Pennsylvania, the scene of his first and only surrender.

It was undoubtedly this bitter experience that gave Washington an insight into the need of the new country for improved roads, a subject which he discussed with vigor soon afterward in correspondence with General Forbes, who succeeded in taking Fort Duquesne only after cutting a shorter way from Carlisle through Bedford and across the Alleghany mountains.

One of the greatest factors in the national campaign for better roads is the voluntary work being done, especially in the far west, Robert Bruce writes in Leslie's. Of course the greatest single example of this is the prospective Lincoln highway from New York to San Francisco, which the automobile and allied industries have undertaken to build and toward which over five million dollars have already been subscribed. In the territory west of the Mississippi river, which has no such sources of revenue to draw upon as the Eastern states, this voluntary effort shows itself in an increasing number of "good roads" days, when thousands of able-bodied men, frequently headed by the governors of states, turn out and contribute the labor that is just as necessary as cash. Sometimes it accomplishes more because voluntary work is uniformly enthusiastic and contagious. A fine example of this voluntary effort is the building of a \$50,000 sea level causeway along the Pacific coast between Ventura and Santa Barbara, Cal., shortening the Los Angeles-San Francisco route about eight miles and saving many steep, dangerous turns over the mountains through the Castas passes. The funds for this work were raised principally through the Automobile club of southern California and the causeway was constructed for use by motorists pending the completion of a permanent sea level route by the state.

ROADS ARE MADE TOO WIDE?

Western Roadways Are From Fifty to Sixty Feet in Width—Much of Space Grown to Weeds.

It is argued that as a general thing and particularly in the West, the roads of the United States are too wide. The West and Germany are compared in this respect. It is pointed out that while in Germany, where the traffic is enormous, the highways are but 20 and 21 feet, in the West, where the traffic is comparatively light, and land worth \$100 an acre, the roadways are from fifty to sixty feet in width, three-fourths of which grows up in weeds and grass.

It can hardly be said, however, that the roads are too wide in the eastern states. Mountain travelers, especially, will smile at the idea of wide roads in reading of the subject, having many a time and oft met face to face other travelers far from the "wide place," with the result that their vehicles had to be taken apart and carried by piecemeal or stood up at a dizzy angle against the cliff while the other hugged the perilous edge of a fathomless ravine.

Keep Boys on the Farm. To keep the boy on the farm it will be necessary to make the country forces as effective and inspiring as the city forces. The longest step towards accomplishing this result is to have good highways in the country.

Delay to Farm Journals. If you miss a few copies of your favorite farm journal because the mail carrier could not get to your house on account of the bad condition of your roads, you know the answer. Get busy this year.

"I Spend My Hard-earned Nickels for

I get the most pleasure for the longest while."

You can't get a bigger buy for a nickel. It is as delicious as economical—as beneficial as delicious—as popular with your family as with you.

It's as clean as it's fresh. It's always clean and always fresh because the new air-tight, dust-proof seal keeps it so. Every sealed package is personal to you.

Look for the Spear

Purify your breath, preserve your teeth, harden your gums and keep your digestion good with this mouth-cleansing pastime.

Chew it after every meal

Be SURE it's WRIGLEY'S

FARMER'S WIVES

will receive Absolutely Free of Charge a very convenient and useful Kitchen Article while the supply lasts.

We simply ask you to demonstrate the use of it to your husband. Mail us a postal request for this today as the supply is limited and will soon be taken. Then watch this space for our offer next month.

REDWOOD STOCK AND TANKS

LAST A LIFETIME—CAN'T RUST OR ROT—NO KNOTS. We manufacture the celebrated California Redwood tanks. They neither shrink nor swell and cannot rot. Our tanks are held in perfect shape by a patented appliance, not found in any other tank made. Redwood tanks have been known to stand 65 years without decay. Cost no more than others. Send for price list and mention size of tank wanted. ATLAS TANK MFG. CO., 200 W. O. W. Bldg., Omaha

Is Your Stomach Wrong?

Sooner or later you will be wrong in every organ of your body. It is a well known fact that over 95% of all sicknesses are caused by ailments of the digestive organs. If you have the slightest suspicion that your stomach requires treatment, don't delay a moment. Little ills soon grow into serious ills.

DR. PIERCE'S Golden Medical Discovery

soon rights the wrong. It helps the stomach digest the food and manufacture nourishing blood. It has a tonic effect and soon enables the stomach and heart to perform their functions in a natural, healthy manner, without any outside aid. As Dr. Pierce's Golden Medical Discovery contains neither alcohol nor narcotics there is no reaction. For over forty years it has stood the test of both use and abuse and is today the greatest remedy of its kind in the world. Begin now. Take it home today. Sold by Medicine Dealers in liquid or tablet form, or send 50c to Dr. Pierce's Invalids Hotel, Buffalo, N. Y., for a trial box.

For 25c you can get the Common Sense Medical Advice, 1600 pages—cash refund—to pay cost of mailing.

Write Dr. R. V. Pierce, Buffalo, N. Y.

WORMS.

"Worms," that's what's the matter of 'em. Stomach and intestinal worms. Nearly as bad as distemper. Cost you too much to feed 'em. Look 'em up. Don't physic 'em to death. Speer's Cure will remove the worms, improve the appetite, and turn 'em up all round, and don't "physic." Acts on glands and blood. Full directions with each bottle, and sold by all druggists.

SPORN MEDICAL CO., Chemist, Cochen, Ind., U.S.A.

SPECIAL TO WOMEN

The most economical, cleansing and germicidal of all antiseptics is

Paxtine

A soluble Antiseptic Powder to be dissolved in water as needed.

As a medicinal antiseptic for douches in treating catarrh, inflammation or ulceration of nose, throat, and that caused by feminine ills it has no equal. For ten years the Lydia E. Pinkham Medicine Co. has recommended Paxtine in their private correspondence with women, which proves its superiority. Women who have been cured say it is "worth its weight in gold." At druggists, 50c. large box, or by mail, The Paxton Toilet Co., Boston, Mass.

PARKER'S HAIR BALSAM

A toilet preparation of merit. Satisfies to eradicate dandruff. For Restoring Color and Beauty to Gray or Faded Hair. See and Hear its Testimony.

Pettitt's Eye Salve FOR EYE ACHES

W. N. U. OMAHA, NO. 19-1914.
