# HOW WOMEN **OPERATIONS**

By Taking Lydia E. Pinkham's Vegetable Compound.

Cleveland, Ohio - "My left side pained me so for several years that I expected to have to

undergo an operation, but the first bottle I took of Lydia E. Pinkham's Vegetable Compound relieved meof the pains in my side and I continued its use until I became regular and free from pains. I had asked several doc-

tors if there was anything I could take to help me and they said there was nothing that they knew of. I am thankful for such a good medicine and

will always give it the highest praise."

- Mrs. C. H. GRIFFITH, 1568 Constant

St., Cleveland, Chio. Hanover, Pa .- "I suffered from female trouble and the pains were so bad at times that I could not sit down. The doctor advised a severe operation but my husband got me Lydia E. Pinkham's Vegetable Compound and I experienced great relief in a short time. Now I feel like a new person and can do a hard day's work and not mind it. What joy and happiness it is to be well once more. I am always ready and willing to speak a good word for the Compound."-Mrs. ADA WILT, 303 Walnut St., Hanover, Pa.

#### PAPAL SECRETARY OF STATE

Italy's participation in the European war necessarily involves to a certain extent the Holy See and the pope, and makes more important than usual the papal secretary of state. Cardinal Pietro Gasparri, who holds that high office, is a man of undoubted ability and long experience in church and diplomatic affairs.

He was born at Capovallazza di Ussita, in central Italy, on May 5, 1852. In his younger days he taught theology in the Pontifical Roman seminary, and canonic law at Propaganda Fide; and he was barely twenty-eight when he was appointed professor of law in the Institut Catholique of Paris, where he spent in scholarly pursuits nearly twenty years.

In 1898 he went back to Rome to receive his appointment as apostolic delegate to Peru, Bolivia and Ecuador; along with the title of archbishop of Caesarea "in partibus infidelium." His American delegation lasted four years

and was crowned with satisfactory results in every way. He was then made secretary to the congregation for extraordinary ecclesiastic affairs, one of the most important positions in the curia, since this is the office of corre epondence with foreign governments, and after that president of the com mission to codify the canonic law.

After two years' hard work, having found it advisable to allow himself some relaxation, he took a vacation, traveling to the Holy Land in company with Monsignore, afterwards Cardinal Delai, and returned quietly to his work soon after. The purple cloth came to him one year later, with the consistory of December 16, 1907, not as the perfunctory conclusion of a bureaucratic career, but as an early and well-deserved recognition of very

#### BANKER-DOCTOR AT THE FRONT

York has gone to Europe as the head of a French hospital unit on the firing line, and if anything should happen to this banker and doctor the United States would mourn the loss of a man who has been for years active in public movements. It is not surprising that he is giving his services to France, for in that country he was educated, first practiced medicine and became a leader in public welfare matters.

Doctor Sherwood-Dunn was born In Rushford, N. Y., and after studying in the New York university took his degrees at the University of France, began practicing in Paris and was married there to an American girl. He was a member of a committee that revised the laws governing the admission of foreign students to the university, and prevented the threatened exclusion of Americans. Later he was one of the founders and

directors of the Society for the Prevention of Cruelty to Animals in Paris. Some time after he returned to this country a group of bankers invited him to join with them in organizing the Century Trust company, and he became its secretary. As a result he became generally interested in the anking business, and in 1907-8 he was the president of the European-Amer-12 feet long and 26 inches in width. cient amount of wholesome food so ican bank. He sold his interest in it in 1908 and removed to South Carolina. where he was largely interested in the banking business and was president of several banks in that state. He is a director in several other banks and business corporations.

He is a member of the American Civic alliance, and during his residence in South Carolina he was the state chairman of the Progressive party there. A versatile man, a decidedly interesting man, with a highly varied career, he is now varying it still more among the shrapnel and the poison gases on the French frontier, where many doctors have fallen.

#### WILD BEASTS HER CHUMS

Lady Mackenzie, who recently returned from Africa to take up her residence, for the present at least, on her ranch in Montana, is an interest ing person in more ways than one For some years she has been known as one of the most fearless and skilled of big game hunters, and her trips to Africa especially have resulted in extraordinary "bags" of elephants, lions and other large and fierce animals

Always when she travels Lady Mackenzie carries with her some pet wild beasts, and callers at her apartments are sure to be met by some of these startling chums. She entertained sixty guests recently at Delmonico's in New York, and the diners were amused by the antics of lion cubs, wildcats and other lively animals, some of which were so strenuous that more than one dinner jacket was torn badly.

The menu was an elaborate one There were stuffed eagles' eggs, roast black bear, rhinoceros tongues, Egyption quail, salad served in cocoanuts and other edibles. As the diners sipped their coffee a monkey sprang from a branch in the tropical palms. None of the blackened employees of Delmonico's, who stood in true Sene-

gambian postures around the table, seemed afraid of the wild animals, even if the leopard was a bit ferocious. The chains were strong. A huge lion's skin was the centerpiece and cocoanuts were placed on the table.

#### GIVE A NICKEL TO SUFFRAGE

the Washington headquarters of the Congressional Union for Woman Suffrage and pointed to as a "horrible example" is a nickel donated at a suffrage street meeting by Congressman Thomas Heffin of Alabama, whom the women style the "arch enemy of suffrage in congress." An interesting story is told in connection with the Heflin five-cent piece. One day Miss Elsie Hill, one of the leading speakers for "the cause," was conducting a meeting at a Pennsylvania avenue corner, and a large crowd had collected to listen to her eloquent pleas. Among her hearers were many who believed in the cause sufficiently to contribute liberally when she called for financial assistance for the organization. Just as they were handing over their cash along came Congressman Heffin with some friends, and, seeing what was The Scotch pine and the white going on, the Alabama statesman

## In Use For Over 30 Years

The Kind You Have Always Bought

VALUE OF THE "SCRAP HEAP"

"Secondary Metals" Have Added Much to the Wealth of the United States.

In 1914 the value of the "secondary metals," exclusive of gold, silver, platinum, iron and steel, recovered in the United States was \$57,039.706, according to J. P. Dunlop of the United State geological survey. This is a decrease from 1913 of \$15,746,321, the secondary metals recovered in that

year being valued at \$72,786,027. The term "secondary" does not imply that these metals, which are recovered from scrap metal, sweepings, skimmings, drosses, etc., are of inferior quality, but it is used to distinguish them from "primary metals," which are derived from ore. While the survey figures relative to lead, zinc, copper, aluminum, tin and antimony given in this statement cover a large field and form an essential addition to the reports on primary metals, the scope of the inquiry probably reveals less than one-half the extent of the wastemetal trade. The value of the old fron and steel reused amounts to millions of dollars.

SHE QUIT But It Was a Hard Pull.

It is hard to believe that coffee will put a person in such a condition as it did an Ohio woman. She tells her own story:

"I did not believe coffee caused my trouble, and frequently said I liked it so well I would not, and could not. quit drinking it, but I was a miserable sufferer from heart trouble and nervous prostration for four years.

"I was scarcely able to be around, had no energy and did not care for anything. Was emaciated and had a constant pain around my heart until I thought I could not endure it.

"Frequently I had nervous chills and the least excitement would drive Constipation sleep away, and any little noise would upset me terribly. I was gradually getting worse until finally I asked myself what's the use of being sick all the time and buying medicine so that CARTER'S LITTLE I could indulge myself in coffee?

"So I got some Postum to help me quit. I made it strictly according to directions and I want to tell you that but gently on the change was the greatest step in my the liver. change was the greatest step in my life. It was easy to quit coffee because I now like Postum better than the coffee.

"One by one the old troubles left until now I am in splendid health. nerves steady, heart all right and the pain all gone. Never have any more nervous chills, don't take any medicine, can'do all my house work and have done a great deal besides."

Name given by Postum Co., Battle Creek, Mich. Read "The Road to Wellville," in pkgs.

Postum comes in two forms: Postum Cereal-the original formmust be well boiled. 15c and 25c packages.

Instant Postum-a soluble powderdissolves quickly in a cup of hot water and, with cream and sugar, makes a delicious beverage instantly. 30c and 50c tins.

Both kinds are equally delicious and cost about the same per cup. "There's a Reason" for Postum. -sold by Grocers.
