Starting Trouble.  
"My husband says he has an idea—"  
"Your husband is always boasting."  
—Houston Post.

Safety First.  
Baron—This paper says St. Louis policemen have been instructed to keep their uniform coats tightly buttoned when on duty.

Egbert—Gee! St. Louis must have some very clever watch thieves.

Gorgeous Globe of Blossoms.  
To obtain a gorgeous globe of blossoms, get two hoops. Place one within the other so as to form a spherical figure and nail firmly to an old tree stump or other preferred foundation. Plant running flowers around the base and train the blossoms upon the hoops.

Her Regret.  
She—If I'd rejected you would you have given me up?  
He—Not much! I'd have kept right on trying to win you if you'd turned me down a hundred times.  
She—Ah, what a lot of fun I missed.  
—Boston Evening Transcript.

Hazy Ideas.  
"I have been promised a job in the forest service," said the politician.  
"What are your duties to be?"  
"I don't know much about the proposition. I have been told that I may be sent out to inspect government preserves."  
"For what purpose?"  
"To see if they comply with the pure-food laws, I suppose."

**Paxtine**  
A Soluble Antiseptic Powder to be dissolved in water as needed For Douches  
In the local treatment of woman's ills, such as leucorrhoea and inflammation, hot douches of Paxtine are very efficacious. No woman who has ever used medicated douches will fail to appreciate the clean and healthy condition Paxtine produces and the prompt relief from soreness and discomfort which follows its use. This is because Paxtine possesses superior cleansing, disinfecting and healing properties.  
For ten years the Lydia E. Pinkham Medicine Co. has recommended Paxtine in their private correspondence with women, which proves its superiority. Women who have become convinced of its value, say it is "worth its weight in gold." At druggists. See large box or by mail. Sample free. The Paxton Toilet Co., Boston, Mass.

**PASTURE SHEEP IN CORN TO ADVANTAGE**

Sheep Are of Much Advantage in Pasturing Off Weeds in Corn After Cultivati<sup>n</sup> Has Ceased.

Those who have a flock of sheep, or who purchase lambs for fall fattening, can pasture them to advantage in late summer and all through the fall in cornfields. If the corn is not infested with summer grasses and weeds it will be necessary to plant cowpeas, rye or some other catch crop between the rows of corn. Where the cornfield is large and the flock of sheep or lambs small there will be no need of planting any special crop between rows, as there will be enough feed for the animals in chance weeds and herbage among the corn and along the fence.  
Where corn is not to be cut for fodder or silage, but husked in the field, it can be pastured heavily with sheep and lambs in late summer and through the fall. Of course, where there are no weeds or grass for the animals to eat, they will eat the lower blades of corn, stripping the stalks up as far as they can reach. Old sheep will sometimes disturb and destroy the field of weeds and grass, but not till then. Lambs cannot reach the ears on corn of standard height.  
Cowpeas planted in corn at the last cultivation make an excellent feed for fattening sheep and lambs, the peas being a legume and furnishing protein for flesh building. This method of pasturing sheep not only furnishes clean, healthful, shady pasture for the animals, but it cleans the field of many plant pests and fertilizes the soil evenly.

**FURNISH HOGS SOME SHADE IN SUMMER**

Farmer Who Is Not Supplied With Trees Has Quite Difficult Problem to Solve.

The hog needs a shade in the hot summertime. Without it he will be reduced in flesh very rapidly. Heat is a great flesh reducer, and the blistering rays of the sun will trim down the hogs very rapidly. The man who is fattening his hogs is very liable to lose some of them if they must be exposed to the burning rays of the midday sun during the hot season.  
The farmer who lives in a timbered country will have no trouble in providing shade for his hogs. On one farm there was a 40-acre tract of wooded land. Here the hogs were kept in the summer. They had the shade to protect them from the sun, and a cooling spring came from under a ledge of rock and flowed down the branch, so they had sufficient pure water in which to wallow.

**UNPROFITABLE LAND LIKE BORDER COWS**

Low Yielding Acres Are Often Fatal to Successful Farming—Drainage Favored.

The United States department of agriculture sends out a bulletin from which this article is taken:  
We hear many uncomplimentary things about the unprofitable dairy cow—the border cow that is supported from the profits of the remainder of the herd. On many farms the unprofitable dairy cow is not by any means the only border. Low yielding acres, like border cows, are often fatal to successful farming.  
Our farm survey records show that area of poorly drained, compact, sour soils, or soils low in humus greatly reduce net profits and are a frequent cause of minus labor income. Sometimes these records show that as much as 30 per cent of the entire farm acreage does not produce enough to pay its way.  
One farm on which we recently took records has 40 acres of poorly drained land that in its present condition is practically worthless. Twenty-five dollars per acre spent in drainage will make this 40-acre tract the equal of any in that district, and good land is selling there at \$150 per acre.

**STUDY EACH COW IN EVERY DAIRY HERD**

Greatest Good Not Always Derived in Eliminating the Unprofitable Animals.

It is a fact, and there is evidence of it, that it is a good plan to weigh and test the milk of each individual cow; but it is a far better plan to take each cow in the herd and make a careful study of her and investigate to see if she has reached the limit of her production. By weighing and testing the milk some rather surprising results have been found in many of our dairy cows.

The greatest good that has been derived is not alone in eliminating the unprofitable cow, but rather in awakening to the importance of studying the individuals in each herd.  
When you find a cow that is not yielding a desired profit, see if she is not capable of better things before condemning her.  
Watch the scales and reward her with each increase of milk, and you will oftentimes find that her limit will be far above what you had at first thought. Be fair to the cow and give her a chance.

**Loss Among Turkeys.**  
The fatality among young turkeys in nine cases out of ten is caused by want of due care during the earliest stages of existence. Low or wet grounds, in fact any dampness, induces rheumatism of the joints, etc.

**Cull Out Poor Stock.**  
No dairyman should be satisfied with cows that produce much less than 300 pounds of butter fat per year. Use the Babcock test and dispose of the poor stock.

**Profitable Sheep.**  
For the man who has rough or poor land with short pastures, sheep are much more profitable than cattle.

**From Shell to Market.**  
Ten weeks from shell to the market is the time allotted a chick.

Separate Ailing Hogs.  
Hogs afflicted with swine plague should be immediately separated from the rest of the herd, kept in an isolated pen and fed absolutely nothing for two or three days. No danger of their being starved.

**Teach Boys Gentleness.**  
Boys often chase the cows, not realizing the great danger and even cruelty they cause. They should be taught gentleness toward all animals, and particularly toward horses and cattle.

**Canada is Calling You to her Rich Wheat Lands**  
She extends to Americans a hearty invitation to settle on her FREE Homestead lands of 160 acres each or secure some of the low priced lands in Manitoba, Saskatchewan and Alberta.  
This year wheat is higher than Canadian land just as cheap, so the opportunity is more attractive than ever. Canada wants you to help to feed the world by tilling some of her soil—land similar to that which during many years has averaged 20 to 45 bushels of wheat to the acre. Think what you can make with wheat around \$1 a bushel and land so easy to get. Wonderful yields also of Oats, Barley and Flax. Mixed farming is fully as profitable an industry as grain growing.  
The Government this year is asking farmers to put increased acreage into grain. Military service is not compulsory in Canada. There is no conscription and no war tax on lands. The climate is healthful and agreeable, railway facilities excellent, good schools and churches convenient.
