Most of the real good lambs brought \$8.60@8.65, while others not quite so desirable went around \$8.50. Breeding ewes sold at \$5.50@6.00, and ewes for strictly feeding purposes reached \$5.50. Killing ewes shared the fat lamb advance and were cleaned up in good season on a 15@25c higher basis, and \$5.60@5.65 bought decent grades, with a good class reaching \$5.75, a quarter above the top at last week's close.

## TO FARMERS! BUY LAND NOW!

There is no better investment in sight right now than to buy Western lands; buy them before values advance, due to the high prices of products and the present cycle of productive years in Nebraska, Colorado and Wyoming.

In the Big Horn Basin and the North Platte Valley, irrigated farms are being cut in two and offered for sale on favorable terms. All crops in those localities are the heaviest on record. You can secure a Government irrigated farm near Powell, Wyo., almost a gift. This year's crop on thousands of acres in Nebraska and Colorado equals in value the original price of the land.

If you are not fixed to buy, even on easy terms, take a 320-acre Mondell homestead in Wyoming, for mixed dairy farming; crops of wheat and oats on these this year just like a settled country. Look over the West now, along the Burlington lines; you can ride all day through crops and make your own deduction as to what this condition means to the man who will get hold of land in these localities now. Write me. I can help you. My services are free.
