ships would never again allow their roads to be just scratched over as they are this year. If two or three townships would go in together and buy a traction engine like Fritz Bichel's, a big elevator grader and a grader like Webster township has and then hire men who know how to do nothing else but grade roads. Pay good wages and see that the wheels are turning at 7 o'clock and are never stopped until 6 o'clock in the evening, then the people will get something for their money. To the Supervisors; start something like this and the county will soon get back more than the cost in a couple of years. Poor roads are one of the biggest drawbacks in this country. Hundreds of dollars are being spent this year and other years for roads and getting no roads either. Miles upon miles of roads are just skinned over each year and they would be better if left alone. The good roads days on Route two have come to stay and next year some other part of the route will get it. Again I want to thank you all for your generous help.
