Carrier went to Boelus Sunday with Tom Lay and son, Nels Smith, Ray Shepard and A. L. Enderle, to look at the progress of the big power project under construction. This is one of the largest power undertakings that has been started in the state and it is estimated that it would take one million and a half dollars to complete it. It is worth your while to go and take a look at the different parts and see what a truly wonderful project for the state of Nebraska, and if a success, there will be a great many more over the state.

While carrier and party were looking over the power project at Boelus Sunday, A. L. Enderle came near getting his leg broken. We were all walking up to the top of a lot of steel sheet piling, twelve inches wide and forty feet long, weighing over 1,000 pounds apiece, when all at once three steel sheets started to slip, but all succeeded in making their getaway except Mr. Enderle, who slipped and one foot was caught with all the sheet piling resting on the foot and leg. All thought that we would find the leg broken and crushed but outside of a badly bruised leg he was all right. It shows what people can do when frightened, for we four fellows raised two ton and a half from off of him quickly.

A MAN WITH AN APPETITE

Is often the cause of endless perplexity to the careful and conscientious housewife. She wants him to have the best, she wants him to be satisfied, but she simply MUST keep the table expense down.

We cater to the good judgment of all such housewives. We carry a stock of meats, both salt and fresh, that cannot be surpassed in this locality, either in quality or price. Also all kinds of relishes and oysters.

PIONEER MEAT MARKET

O. L. TOCKEY, Proprietor

SECURE A FARM IN THE NORTH PLATTE VALLEY

THE NORTH PLATTE VALLEY, frequently called the "Scottsbluff country," is making a more wonderful showing every year in its production of irrigated crops—sugar beets, alfalfa, potatoes, wheat and oats; it is becoming one of the richest localities for breeding and fattening of live stock. Many Government irrigated holdings of 160 acres are being reduced to 80 acres, making it possible for land seekers to secure 80-acre tracts irrigated under the reliable system of the Government on terms that will never again be duplicated. All we can ask is that you visit the Valley and let our agents put you in touch with reliable firms. Ask about the crop tonnage, the increased population, and note the general prosperity; this will tell you what advance in land values you may expect there in the next five years.

Or, write me for the Burlington's new publication, "North Platte Valley." Let me help you go there and see for yourself this locality which is the talk of the West.
