Big Clearance Sale of High Grade Furniture

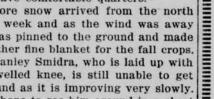

For the next 30 days we are going to make some of the greatest bargains ever offered in standard lines of furniture.

Every Piece of Furniture, Carpets and Rugs at Reduced Prices

We have nothing but high grade furniture on hand, but in order to make room for two carloads of new stock we are going to price this line so low that it seems ridiculous. : :

Don't Think of Buying Elsewhere Until You Look This Stock Over

E. P. DAILY FURNITURE CO. THE MONEY BACK STORE

Men may differ about preparedness for war, but all of us believe in preparedness for most things.

It is preparedness that sends the runner over the tape ahead of his rivals. It is preparedness that enables the advocate to sway judge and jury with his logic. It is preparedness that enables the manufacturer to out-distance

his competitors. It is preparedness that has made the General Roofing Manufacturing Company

The Big Gun of the Roofing Business

The General's preparedness consists of the three largest and best equipped roofing and building paper mills in the world.

Each is a complete producing unit, manufacturing the full line of the General's products. Each is advantageously located in the territory it serves, has cheap fuel and favorable transportation facilities.

The General buys raw materials in enormous quantities and far ahead. This means favorable buying and the pick of the market.

With manufacturing so perfected and cheapened, the highest quality is produced at the lowest cost.

This preparedness enables the General to make one-third of all the alls of roofing used. All over the civilized world you will find

The quality of roofing cannot be determined by looking at it, nor by twisting or tearing. Its durability can not be tested except in actual use over a period of years.

Contrary to popular belief, roofing does not wear out-it dries out. CERTAIN-TEED Roofing is especially made to defeat this process of drying out; as it is thoroughly saturated with our properly blended soft asphalts and coated with a blend of harder asphalts, which keeps the soft saturation—the life of the roofing—from dry-ing out. This produces a roofing pliable, yet durable, and impervious to the elements. CERTAIN-TEED products are made under the supervision of our board of grad-uate chemists, and are the result of long experience in mining, refining, and blending of these materials.

CERTAIN-TEED Roofing is guaranteed to hold "its place in the sun" for 5,10, or 15 years according to whether it is 1, 2, or 3 ply, respectively. Behind this guarantee stands the responsibility of the world's largest Roof-ing and Building Paper Mills. Past experience has

proved that our guarantee is conservative, and that the roofing will outlast the period of the guarantee. There is a type of CERTAIN-TEED, and a pro-per method of laying it, for every kind of building, with flat or pitched roofs, from the largest sky-scraper to the smallest structure.

CERTAIN-TEED Roofing is sold by responsible dealers all over the world at reasonable prices.
