factories are making money.

The lower foothills of Alberta, used only at the present time as ranges or for no purpose, will in time produce cheese in great quantities, and doubtless will soon equal the famous uplands of Denmark.

The cool nights mean the better keeping of milk and cream and cheese, and that is a great thing for the industry, especially when combined with possibilities of cattle feed such as exist on the long slopes from that. the Rockies eastward. The hog market, which may be

classed as an adjunct of farming, is an exceedingly good one, and the low cost at which the feed can be produced, coupled with the high prices realized, make this industry very prof-

THAT EAT UP PROFIT One of the first thoughts that occur to the mind of the average prospective settler is the likelihood of suitable markets. In this connection the following table will be illuminating. It is supplied by the P. Burns company, packers and exporters, of Calgary, and shows the average monthly price paid for hogs for the six years 1910 to 1915 inclusive. When one considers the low By D. A. A farmer of Monarch, Alberta, claims the distinction of being the first in the province to sell a carload of hogs at the high price of eleven cents a pound, live weight. The sale was made a short time ago at Calgary, and at that time was a record, although prices have since gone as high as \$11.121/2 per hundredweight. With such prices available for hogs the farmer has a market for everything his farm produces, as there is practically no farm product which cannot be converted into good hog flesh. The uncertainty of results which attends grain farming even under most favorable conditions is removed when the settler goes in for raising hogs, beef and dairy products. With Western Carada's chear lands, heavy crops, and climate free from diseases of stock, the stock farmer is as sure of success as anyone can be .- Advertisement.
