Avoid Those Disputes

Disputes over tradesmen's bills are very unpleasant. They may lead to permanent ill-feeling.

If you would forever obviate the possibility of such an experience—

Pay Your Bills by Check

Then in case of a misunderstanding you have but to look up your canceled voucher. That tells the story. And it is the only way that will clear up the uncertainty satisfactorily to all concerned.

W. F. MASON, President. L. HANSEN, Cashier. C. H. RYAN, Ass't Cashier.

YOUNG MAN

Do You Expect to Own a Home of Your Own?

We have smooth, rich prairie land that grows good wheat, oats, corn and alfalfa that we can sell on a small cash payment and give you ten years' time to pay the balance. Why rent land when you can buy on these terms? If you are interested it will pay you well to investigate this at once.

A new market for skim milk has been found in the effort to develop a fire resistant covering for wooden shingles. It has been found that cement and fire sand mixed into paste with ordinary water form an excellent coating for wooden roofs. But the water soaks into the shingles and the sand and cement blow away. By using skim milk in the place of water a permanent fire resistant covering is assured.—State Journal.

When the war in Europe is over there will be one great scramble by the nations at strife in an effort to regain the commerce of the world which they have lost to the United States while engaged in the doubtful pastime of slitting each other's throats. Desperate measures will be devised by the shrewdest minds of the old world in their campaign for commercial self preservation, and to meet this united onslaught, the financiers and manufacturers and other powers of the business interests of our own country should be even now entrenching themselves and building a bulwark of protection which even time itself will find indestructible. We can not hope to retain the advantages we have gained unless extraordinary measures are pursued, and any relaxation of vigilance now or in the future will result in commercial loss and eventual disaster. It is time to act.
The new school house will be completed and will be turned over to the district on August 28th. The Northwestern believes that some kind of a dedication ceremony should be held on that day. A program of music and speaking would be very appropriate. The school board should take this in hand and arrange for a suitable celebration upon the acquiring of this beautiful new building.
We are a firm believer in education. We believe in the erection of buildings that will not only afford the necessary opportunities for instruction, but that will be strictly modern in sanitary measures. We believe in employing the best of instructors for the guidance of our children in their schoolhood days, and we believe in the election of trustees and other public school officials who will give their best thought, energy and action to this end. The right kind of a school board will employ the right kind of teachers, and they in their turn will produce from our unlettered youth the keenest intellectual minds of the future. Let us conserve the interests of our public schools of today, for the instruction and control of our children in their young days will bespeak their standing, efficiency and success in the later years of life. If there is one single thing that can be done to improve educational conditions locally, that thing should be done promptly, cheerfully and without quibble. Half measures today will not make whole men and women of tomorrow.
