At this time of year when farmers are dividing or purchasing hay in the stack it is handy to have a rule which Wes Heapy had his alfalfa seed is approximately correct for measuring. The following rule is about as Mr. Whitmore drove a herd of cattle good as any. Measure the average width of the stack at the bottom, then throw the tape over the stack at an average place and measure from the ground on one side to the ground on the other, add this measurement to the width of the bottom, divide by four to get the actual square, multi-Russel Curry, of Linscott, Neb., is self and then multiply by length of here visiting with his mother this stack, divide the product by 500 for prairie hay when it has settled for about thirty days and the number obthe home of Tom Parsley, Tuesday tained will be the number of tons in the stack. The following is an example:

Across the bottom 12 ft. Over the top from base to base 24 ft.

on Tuesday evening of last week by Colorado to live with her daughter Divided by 4 (sides) Mrs. Allison left Wednesday for ARE YOU EFFICIENT?

1

In these days of fierce competition, to succeed requires all o talents. Many an earnest, ambitious person falls short of complete success because of something that holds him back. Very often the cause is eye-strain. YOU can be a better stenographer, salesman, mechanic, baker, housewife—if you will remove the handicap of eye-strain. Eye-strain can be removed—remember that. So that puts the matter squarely up to you, doesn't it? We are eye-strain EXPERTS. Let us examine your eyes and

supply glasses that will give you an equal chance with others.

We have installed the dark room, which is an absolute necessity to do this fitting. We invite you to inspect our optical parlor. Eyes examined free of charge.

Guaranteed glasses at reasonable prices-\$3..00 up.

Kryptok:-the efficient bi-focal. Everloct:-the screwless mounting.
