

Where will You Be at 65

It is up to you ? We can help you

DO YOU REALIZE that out of 100 average healthy men at the age of 25 36—will die before reaching the age of 65

- 5—will be wealthy
- 5—will be supporting themselves by work
- 54—will be dependent upon friends, relatives or charity.

THIS CHART represents man's accumulating period from 30 to 50 years of age. Either success or failure is settled.

<p>At 20 Everything to gain and nothing to lose. This is the egotistical period—the age son thinks he knows more than his father. This space represents the young man's self-sufficiency. Age of indiscretion.</p>	<p>At 30 The boy at this age is changing his mind and concludes he doesn't know as much as he thought for. He now considers the father a man of judgment.</p>	<p>At 35 The son realizes that life is a reality, and he is not so smart as he once thought. His father was a man of master mind.</p>	<p>At 40 75 per cent of men at this age meet with reverses and lose their entire accumulation.</p>
<p>At 45 90 per cent have lost all by this age.</p>	<p>At 50 This is the age of caution. A man must not speculate, for he has all to lose and nothing to gain. He must look for security—not high rates of interest. Only one man in 5000 can after this age recover his financial footing.</p>	<p>At 60 At sixty, 95 per cent of men are dependent upon their daily earnings or on their children for support. Will you be one of them or one of the 5 per cent with a competence?</p>
