

THE TOURIST SLEEPER WAY TO CALIFORNIA

The **BURLINGTON'S** Personally Conducted Tourist Sleeper Parties to California are one of the best patronized features of its Passenger Service. You should arrange to join these parties and go in this comfortable way.

BURLINGTON Denver train No. 3 along the Omaha-Oxford line carries these sleepers for California; they all go via the Rio Grande through scenic Colorado by daylight, and direct to Southern California via the Salt Lake Route, or to San Francisco via the Southern Pacific and Western Pacific roads. Connections with these tourist sleepers are made daily in Denver from Southern Nebraska main line train No. 17, and every Wednesday on the St. Joseph-Denver main line No. 17 there is a Personally Conducted through tourist sleeper to Los Angeles, via the Southern Pacific and San Francisco.

Ask for "California Excursions" and let me assist you to join these parties at the first available place en route.

J. A. DANIELSON, Ticket Agent.

LIVE STOCK PRICES AT SOUTH OMAHA

Best Beeves Strong, Short Feds Lower; Cows Steady

HOGS STEADY TO 5c HIGHER

All Lamb Records Smashed—Good Many Sales As Much As 30c Higher. Top Moves Up to \$12.80—Many Sales that High. Few Clippers at \$11.00. Muttons Gain a Quarter—Best Ewes Bring \$8.50—Only Small Lots of Feeders. Something Choice Would Probably Have Set a New Record.

Union Stock Yards, South Omaha, Nebr., December 12, 1916.—The week opened out with a very respectable run of cattle, 389 loads, or about 10,500 head. Strictly good to choice beeves sold from \$10.00 to \$11.00, and the bulk of the fair to good 1,050 to 1,300-pound cattle went at a spread of \$9.00 to \$10.00. The market for cows and heifers was about the same as the latter part of last week. Offerings were by no means excessive, and the demand was very good from both local packers and outside butchers as well as considerable inquiry from feeder buyers.

Quotations on cattle: Good to choice yearlings, \$10.00 to \$11.00; good to choice beeves, \$10.00 to \$11.00; fair to good beeves, \$8.75 to \$9.75; common to fair beeves, \$7.25 to \$8.75; good to choice heifers, \$6.75 to \$7.50; good to choice cows, \$6.60 to \$7.50; fair to good cows, \$5.75 to \$6.50; canners and cutters, \$4.50 to \$5.75; veal calves, \$8.00 to \$10.00; bologna bulls, \$5.00 to \$5.50; beef bulls, \$5.50 to \$6.75.

A liberal run of hogs showed up for Monday, estimates placing the supply at 150 loads or 11,300 head. Shippers bought hogs freely Monday, paying prices that were all the way from strong to a dime higher, or generally a nickel higher than last week. Packers' early bids were around steady to if anything a little lower, and quite a bit of stuff was bought steady on the less desirable kinds, but anything on which there was competition sold strong to 5c higher.

A very light run of sheep and lambs was on hand Monday, arrivals counting out thirty-nine cars or 9,000 head. Sellers started out asking sharply higher prices, some of them pricing their holdings as high as \$12.00. Movement starting in good season with some lambs selling fully 30 cents higher than the close of last week. Ewes were generally called about a quarter higher, one string of rangers bringing \$8.50, a new record for the season.

Quotations on sheep and lambs: Lambs, good to choice, \$12.25 to \$12.50; lambs, fair to good, \$11.75 to \$12.25; lambs, clipped, \$9.75 to \$10.75; lambs, feeders, \$10.50 to \$12.00; yearlings, good to choice, \$9.75 to \$10.50; yearlings, fair to good, \$8.50 to \$9.50; yearlings, feeders, \$7.00 to \$8.00; wethers, fair to choice, \$7.50 to \$9.10; ewes, fair to choice, \$8.00 to \$8.35; ewes, fair to good, \$6.75 to \$7.90; ewes, plain to culls, \$4.50 to \$6.25; ewes, feeding, \$5.00 to \$7.00; ewes, breeders, all ages, \$6.00 to \$8.50.

FEEDING MOLDSY CORN.

Feeding moldy corn to horses often causes blind staggers or similar diseases, says the college of agriculture, Lincoln. Several fungi are known to be responsible for mold, according to the agricultural botany department. As moldy kernels are lighter than water, they may be separated from the sound ones by placing the grain in water and skimming off the kernels that rise to the top. Mixing moldy corn with bran and oats appears to lessen danger to animals that consume it. Specimens of moldy ears may be sent to the agricultural botany department, University Farm, for examination.

THE PARTY STILL COMPACT.

There is one comfort. The republican party is practically reconstructed and compact. The practical, sensible men in it, both regulars and wandering but returned progressives, can and will shape its future. The best field in which to hope and work for any betterment of human conditions is still in and with the party of Abraham Lincoln. We have carried most of the old republican states except for president. Most of the "Kept us out of war" element will return; we will sweep the country in 1918.—Lebanon (N. H.) Free Press.

GREEN STUFFS FOR WINTER.

Many of the green things of the summer garden may be had for little cost even in the winter if one takes a little time to care for a hotbed, says the horticultural department of the University of Nebraska. Hotbeds at the university farm are doing fine, and it is expected that there will be plenty of lettuce to offer for the Christmas trade. While the growing things in cold frames were killed during the recent zero weather, everything in the hotbeds came through in good condition.

SHOULD FUTURE GENERATIONS PAY?

In all large public undertakings where permanent improvements were sought to be made it has become a custom to issue long-time bonds in order to secure the money with which to finance the work. Probably nine-tenths of the counties of nine-tenths of the states of the union are bonded to a greater or less extent, and scarcely a city or town of any importance in the land but carries its bonded debt that has gone to pay for public utilities.

But in many cases the advocates of the bond issue have had hard fights to carry their projects through. One of the most serious objections has always been from the man who "doesn't believe in saddling a debt on future generations."
Now let us see about this. Suppose, for instance, our country has no railroad. For generations our ancestors, and we ourselves, have laboriously hauled in our supplies and hauled

our products, realizing, when all expenses were met, but a meagre pitance for our year's work.

But a railroad is projected and we are told if we will bond our county for a few hundred thousand dollars, it will be put through. This we do. Now arises the objection that we have placed a heavy debt on posterity.

Have we? Yes. But at the same time we have given posterity the means to pay that debt and then be infinitely better off than we and our fathers were.

Compare for a moment the difference in their condition, and ours before the road was built. The average county is about twenty-five miles wide. Suppose that represented the nearest shipping point. Do you see the enormous saving we have effected for posterity in bringing the road to their doors?

Again, the question of roads. The same reasoning will hold good there. Whereas we and our fathers toiled through mud and mire to drag fifteen or twenty bushels of grain to market, our sons can hitch up an ordinary team and take a load of two or three thousand pounds with ease and in less time than we needed.

And so on through the list of all permanent public improvements.

But the work should be permanent, or at least as nearly permanent as our best judgment can make it. When we have builded to the best of our ability and have lain a groundwork on which our children can continue to build, we have not only benefited ourselves and not injured them, but we have benefited them, and made it possible to attain to conditions that were entirely beyond our reach.

A debt on posterity is just, provided it represents a tangible asset.

A whole nation was stirred because a Chicago doctor let a newborn babe die rather than keep it alive as a possible burden to society. June Travis was born with the curse of

Her cradle was in a lawless mining camp and there was no doctor to decide. She lived and—

PIZER & CO.

NO REAL GOVERNMENT IN MEXICO.

In the ultimatum which the president's commissioners presented to their Mexican colleagues at Atlantic City, there was constant talk about "the Mexican government," what it is expected to do and not to do. Strictly speaking, however, is there a government in Mexico? There is some sort of a de-facto organization down there, whose First Chief isn't recognized as possessing some kind of authority—which he is unable to exercise over any extended portion of Mexican territory; but as for a responsible government in the accepted sense of the term, there is none.

240 Pound Pigs.
With corn above 50 cents hogs eat their heads off very quickly. The hog that takes two or three months to get on full feed never brings you a profit.

When you are ready to put your shoats on feed, begin with the B. A. Thomas Hog Medicine. Use regularly and watch your shoats round out into fat hogs in nine months—hogs going well over 200 pounds and as high as 240 pounds. Figure the average feeding and you will see why the B. A. Thomas medicine is a good investment. Try feeding out your hogs on this plan and if you are not more than pleased, we will refund the cost of the medicine.—J. J. Slominski.

Want to buy 100 head of mules. Sucklings, yearlings and twos. Call Sam Fletcher, at Rockville. Phone No. 4202 513.

Make it a home Christmas for home people with home money in the home town.

Henry M. Elsner for glasses.

SCRAWNY CALVES.

What makes a calf scrawny—off its feet? Germs—parasites—in the intestines. Why not free them of this trouble? If you will give the calf some B. A. Thomas Stock Remedy in its feed, within a week you will see it brighten up and in four or five weeks you won't know the calf. Costs you but a few cents and we will refund that if it doesn't do as we say.—J. J. Slominski.
