"SOLDIERS OF THE SEA."

Washington, April 18.—The great American public is realizing now more than ever the fact that our marine corps maintains separate and distinct recruiting stations from the other branches of our national defense and that although the marine goes to sea he is a soldier—not a sailor—and does not serve his country entirely on the ocean wave, according to Major General George Barnett, the commandant of the "Soldiers of the Sea."

The present crisis is causing many patriotic young men to investigate the different avenues in which they may protect the freedom which they enjoy, and those undecided as to whether they would "do their bit" as a soldier or a sailor are enlisting in the marine corps as a "Soldier and Sailor, too."

PATRIOTIC MEETING BIG SUCCESS

The patriotic meeting at the opera house last Friday evening was attended by one of the largest audiences that ever assembled in the building. Every seat was occupied and standing room was at a premium.

The meeting lasted nearly three hours and was very interesting from start to finish. Speeches were made by John W. Long, J. S. Pedler, R. P. Starr and Aaron Wall. Mayor R. H. Mathew presided over the meeting in a very pleasing manner. The speeches were instructive and entertaining. Loup City is fortunate in having some of the best talent in the state in that line. The boys who have enlisted from Loup City were represented by Cash Prichard, who made a short address, thanking Loup City for its splendid demonstration and making a few other appropriate remarks. Several Loup City boys have enlisted in Company M, Nebraska National Guard at Grand Island, in whose honor the fine public demonstration was given.

One of the splendid features of the meeting was the singing and the music given by the Loup City band under the leadership of Prof. R. N. Prichard. Four veterans of the civil war and a number of veterans of the Spanish-American war were present and lent enthusiasm to the meetings. The hall was profusely decorated with flags and bunting.

Delegations from a number of the neighboring towns were present and also Second Lieutenant Mast, of the U. S. regular army, who has been here getting enlistments for the army. Lieutenant Mast stated that it was the best patriotic meeting he had ever attended and said that if every town was as patriotic as Loup City he would have no trouble in securing all the recruits he needed.

The boys went to Grand Island Sunday and took the examination. Cash Prichard, Irvin Rowe, Lerol Lofholm, Clarence Peterson, Harold Hancock and Dwight Willis passed the examination and Wm. Curtis was rejected. M. H. Worlock left Monday, Lloyd Bulger, Tuesday and Jas. Gilbert, Wednesday for Grand Island to take the examination and all three were accepted. This makes nine Loup City boys who have joined Company M and we are glad to see so many showing their patriotism and sticking together by going to the same company.

R. H. Mathew and H. E. Willis took the Loup City boys over to Ravenna, Sunday so they could take a train to Grand Island and be there on time for company inspection. The roads were very wet and slippery and it was a hard trip.

MAUS-JOHNSON.

About two weeks ago E. J. Maus, of the independent garage, left for Lincoln, telling his many friends here that he was going on business and would return in a day or so. Up to the time of going to press Mr. Maus has not returned and judging from messages received here by some of his friends we are inclined to believe that the trip was most important as they read that he was married last Thursday to Miss Lucille Johnson of that city. While the young lady comes to us a stranger we feel that she must be a very refined and highly esteemed young lady to attract the attentions of Mr. Maus and we join many others in extending to her a glad hand and in welcoming her to our city. Mr. Maus is one of our most promising young business men and we are glad to join the many friends in wishing them many years of happy wedded life.

NATURE CURES THE DOCTOR TAKES THE FEE.

There is an old saying that "Nature cures, the doctor takes the fee," but as everyone knows you can help Nature very much and thereby enable it to effect a cure in much less time than is usually required. This is particularly true of colds, Chamberlain's Cough Remedy relieves the lungs, liquefies the tough mucus and aids in its expectoration, allays the cough and aids Nature in restoring the system to a healthy condition.

GERMANS WERE SUSPECTED BUT—

North Loup, Neb., April 18.—North Loup was very much excited early in the week when it was discovered that the flag which had been floating from the staff on the top of the school house for the past two months had been taken down and no trace of it had been left. Everybody guessed what had become of it and surmised that certain individuals had appropriated it unto themselves. But as there were too many guesses and as none of them seemed to be the correct one a purse was raised and the Albion bloodhounds were sent for. They arrived late Monday night and were immediately put to work. The trail was taken from the roof of the building and lead to where

the guilty parties evidently entered an automobile. Later the trail was again taken up about a block east of where it was lost and from then on it was clear enough. Suspicion began to point very clearly toward certain parties and in the morning two young men were summoned to appear before the school board and a few others and give an account of themselves. They finally pleaded guilty and told their story. It was only a foolish prank on the part of some young people who had no thought of the seriousness of their offense—who had no thought that in these times sympathizers with a foreign power with whom we are at war might be accused—who had no thought of the tempest they were stirring up. One member of the party was a high school student, one was a young man of the village and the other two members of the high school faculty. No one wishes to have the names of the guilty parties published because the teachers are non-residents of our village. The flag is again floating over the building and in a few days the affair will be forgotten and we shall be looking for new excitement.

The bloodhounds which were working in our village this week certainly know their business and seemed to be possessed of almost human intelligence. This is not doubted by the big crowd which watched them work Monday night.

The snow last Sunday was somewhat of a surprise but not a disappointment as we needed the moisture, but the rain on Tuesday evening was appreciated more than the snow. There was about an inch of rain fell in this vicinity which may change the looks of some of the damaged wheat, and just watch the pastures and alfalfa grow from now on.

A NEW FEATURE.

The realization that the war question is uppermost in the minds of our readers, has prompted us to add a new feature to the paper—a review of the past week's war news. This feature covers all phases of the situation and will enable our subscribers to keep themselves posted on the big conflict. The first article is printed in this issue and we'll wager you'll find every line interesting. It will appear every week. Watch for it.
