But today farming and agriculture have been given a supremacy machine measure, being at an average in the business world and require the of 115 bushels and 27 pounds per acre. same advanced methods as any other line of commerce. In no other business does a system adoption pay better than on the farm, and it is certain ing because they have so little to say that there is no other line of work. that they do not care how they say it, that, generally speaking, needs it as much. The old idea of getting a living off the farm and not knowing how it was made and following up the details of each branch of farming to get the maximum of profit, at the least expense, is fast being done away with. Farming is now being considered as

a business and a living is not sufficient for the modern agriculturist; a small per cent on the investment is not enough, the present-day farmer must have a percentage return equal to that of other lines of business. The prices for produce are high enough, but the cost of producing has been the factor. in many places, that has reduced the profit. It is the application of a system to the cost of various work on the to our business and follow our in farm that it is possible to give figures structions. on profits made in grain-growing in Western Canada

Mr. C. A. Wright of Milo, Iown. bought a hundred and sixty acres of McKennon, 416 Herskowitz Bldg., land in Western Canada for \$3,300 in Oklahoma City, Okla.-Adv. December, 1915, and took his first crop from it in 1916. S. Joseph and Sons of Des Moines In_ are looked upon as being shrewd. careful business men. Having some spare money on hand, and looking for to me at times. Lydia E. Pinkham's a suitable investment, they decided to Vegetable Compound and Liver Pills repurchase Canadian lands, and farm stored me to health and I want to thank

With the assistance of the Canadian Government Agent, at Des Moines, Ia., they made selection near Champion. Alberta. They put 240 acres of land in wheat, and in writing to Mr. Hew- to the The Canadian Government Agent at Des Moines, one of the members of the firm says: "I have much pleasure in advising you that on our farm five tisies east of Champion, in the Province of Alberta, Canada, this year (1916) we harvested and threshed 10,-600 bushels of wheat from 240 acres. this being an average of 44 bushels and 10 pounds to the acre. A considerable portion of the wheat was No. 1 Northern, worth at Champion, approximately \$1.85 per bushel, making a total return of \$19,610, or an average of \$81.70 per acre gross yields. And by aid of a thorough system were this to keep the cost of growing wheat at about 25 cents a bushel."

Messes, Smith & Sons of Vulcan, Alberta, are growers of wheat on a large scale and have demonstrated that there is greater profit in Western Canada wheat-raising than probably in any other business anywhere. Speaking of their experience Mr. Smith 8215 N.

"I have three sections of land at the present time and am farming yearly 1,200 to 1,400 acres of land. My returns from the farm for the past two years have been around 200%, that is for every dollar I have spent I have received three, now I do not know where you can do that well.

"This is surely the country for the man with the small capital as the land is still reasonable in price, payments in long term and work of all kinds for every man to do. I feel that if I was turned out here without a dollar that

Topics of Interest on Western Canada's soil and climate Home and Farm Building is suitable to graining large and prof-

William A. Radford tells the man who builds a medium priced home or farm building how to get the most in material value, convenience and architectural good looks for his money, in his articles which appear in the Northwestern weekly. He gives the latest ideas in construction and enables you to build without the expense of consulting

Experienced Stockmen Know Winter Swine Must Be Well Protected.

NOW IS BEST TIME TO BUILD

Plan Described Here Has Been Tested Under Rigid Conditions and Has Proved to Be One of Best Designs Known.

Mr William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to the subject of building work on the farm, for the readers of this paper. On account of his wide experience as Editor, Author and Manufacturer, he is, without doubt, the highest authority on all these subjects. Address all inquiries to William A. Radford, No. 1827 Prairie avenue, Chicago, Ill., and only inclose two-cent stamp for reply.

By WILLIAM A. RADFORD

Nearly every winter there are a well designed and carefully construct- building. ed winter hog house. The spring following a hard winter finds these men planning for the construction of such open pens which might be used in a building, which they erect during connection with this building. The the warm weather in readiness for the open pens are formed between the We Want to Establish a Permanent Connext winter.

Fall pigs must be carried through of them. A few pigs may be left to able fences are set up to divide off root around the straw stacks, but rais- the pens. On the opposite side of ing good hogs to make money requires | the building the inclosing fence is built careful planning to breed two litters close to the wall to form a runway, a year, at the right time to fit in with near the center of which it is intend-

circulation of air. Strong gates with sliding bolt locks are placed at the corner of each pen next to the central passage. The remainder of the front of each pen is taken up with the trough, above which a swinging gate is hinged to swing into the pen, a sliding rod stop being dropped down against the inside edge of the trough to hold the gate open while the trough is being filled. The same slide rod locks the gate shut when it is dropped down against the outside edge of the trough.

This building is framed in a simple yet rigid manner. The roof is supported by the two outside walls and by two inside bents which define the central passage. The extension of one of these bents forms the wall in which the pivoted windows are framed. A vertical post is set at the inner corners of each pen. The plate surmounting these posts supports the rafters. Lateral bracing is spiked to the posts and to the outer wall studs and also to the two rows of posts immediately beneath the plate below the pivoted windows. The foundation under the two rows of posts is not continuous, but consists of a concrete pier carried down to a solid footing under each of the posts. These piers are placed at the time of building the floor. One very good method consists in embedding metal sockets of suitable size in the soft large number of farmers and stock- concrete above the piers in the exact men who become convinced that the location of the posts which will then profitable raising of swine requires a be held firmly in place in the finished

The floor plan illustration also presents a suggestion for the fencing and south side of the building and the main inclosing fence, which is 11 feet the winter to get the money value out from the building on this side. HOME-PLANNING IN COUNTRY

Whole Farm Layout Should Be Sketched and Studied Before Any Buildings Are Erected.

Put the house, if possible, on an eminence, or rise, facing east or south, with a gentle slope away from the front. Don't build too near the road, nor yet too far back-150 to 250 feet will generally be about right.

Don't, don't ever put the barn and ot buildings in front of the house. The only logical place for these is in the rear and hidden, if practicable, by trees, vines and shrubbery.

Before building, give study and time to planning the whole farm lay-Progressive Farmer advises. Doing this may save many later regrets. Take paper and pencil, and, with the aid of the family, sketch the grounds as they should be when the building and planting scheme is completed. It may and probably will be years before all details of building and planting are completed, but then there will be a harmonious, pleasing whole. Aim at an ideal and come as near reaching it as possible.

As never before, convenience and sifeple dignity are the aims of housebu'iding. A compact, well-arranged plan saves steps for the housewife and likewise building materials.

Put in plumbing and wiring as the house is built. Every live, hustling farmer these days should aim at nothing less than waterworks, a sewage disposal system and electric lights, or at least an acetylene lighting system. Make the farm home fit its surround-

ings; the country is no place for ostentatious show. Multitudes of gables, bay windows and vivid-tinted paints jar especially in country houses, because they give an air of artificiality among nature's harmonies of coloring.

Have an open grass lawn. However well designed and built a house may be, if it has no green lawn in front it is incomplete. Make the lawn open and free from shrubs or flowers except at the borders.

Frame the whole picture with flowering shrubs and trees. Directly in front of and near the house is no place for trees, however beautiful they may be; rather place them at the side and toward the back, bordering them with flowering shrubs like the crape myrtle, and these, in turn, with banks of the easily grown flowering annuals like zinnias and salvia.

Put vines, preferably a hardy evergreen like the English ivy, over unsightly fences, stumps and walls. Make stately, cool avenues of the

hot, dusty lanes by bordering them with pecan trees.

"Weekly Payments" for Wives.

Generally speaking, says a writer in the Wide World Magazine a Sondanese is content with one wife, but the marriage laws vary considerably among different tribes, though all have much in common. A man buys his wife, or rather gives the value agreed uponcash in prosperous towns like Omdurman, and cattle and grain in the country. Half of the amount is usually handad over to the bride's people before marriage, and is spent on wedding festivities; the remainder is paid by installments. You get your wife, in short, on the hire-purchase system; the motto of Soudanese fathers-in-law, where eligible daughters are concerned, is evidently "Weekly payments taken." The price of a wife varies considerably. In Omdurman, where the natives are wellto-do, a wife costs from \$75 to \$150, or growing their best is when the ex- larger animals wearing thick hairy even more. There is no restriction upon the number of wives a man may have; a wife is regarded as so much personal property, and valued accord-

> Lessons Learned in Sleep. Lessons have been learned and difficult problems solved while in sound

slumber.

A young girl, through the death of her father, was told that she must leave school unless she passed an examination which would entitled her to a scholarship. She studied assiduously, and on one occasion carried her school books to her bedroom, intending to rise early the next day for the purpose of study. In the morning, on looking over her lessons, she was surprised to find that she already knew square from the White House, in them. This happened for several succeeding days, when she mentioned the circumstances to her mother, who determined to watch her. This she did. and observed the girl get up as soon as it was light, apply herself to her lessons, and then return to bed. When awake she had no idea of what she had done.

Dishes From the Indians.

The early American colonists adopted certain dishes from the Indians. among them samp, which is coming into popularity once again today. Roger Williams is credited with having described this as "Indian corn beaten and bolted and eaten hot or cold with milk sented by Mrs. Roosevelt and Mrs., or butter." "Hominy" was the term applied to maize boiled with alkali, which removed the outer skin of the grain, leaving the inner part soft and of the house than it is when the house larly seen in the congregation, includ- good to eat. "Hoe cake," popular with the negroes of the South, is said to have been adopted from the Indians who once inhabited that section of the United States.

How Careless. "Say, young feller," said Broncho

Bob, "have you got a gun on you?" "No, sir!" replied the man with the brand-new cowboy uniform. I was told that it was better to be unarmed, so enough for you? as to avoid any impression that I was seeking a quarrel."

"Well, that's a big disappointment. I needed a brand-new gun an' thought you'd be bringing along at least a pair 'em. Don't you let anything this occur again.'
