Fashions and Styles

Fashions of the season and the coming season are simply divine? You bet they are—but do not be misled. Upon your height, weight and build depends the style you should select.

Skirts and jackets are longer, backs are flare, skirts are straight and cutaway suits are taking the day. Bustle backs, dolman sleeves, wedgies and platform shoes are still in style.

The drape is lagging. The hats are taking us back more and more to grandma's day, and not bad either. In fact most fashions have a trend toward the gay nineties.

Shorties are still in style; but instead of the three-quarter lengths, hip lengths are more popular. They will do a lot for the short, slightly plump miss.

Before you select your styles, study your figure, height, and weight. Select what does most for you no matter what the fashion trend is.

A TRIBUTE TO

Alexander Graham Bell

Alexander Graham Bell in an early demonstration of the telephone

This month marks the 100th anniversary of the birth of Alexander Graham Bell—it also commemorates the 71st anniversary of the telephone, product of his inventive genius. Truly he gave the world a new freedom of speech. We join in honoring his memory and pledge ourselves to continue in the path of communications progress he so nobly pioneered.
