

Teen Age Chatter

Reporter Dotty Greene
Asst. Ruby Lee Harper
Asst. Loretta McWilliams

Hi Chums and Chumlets

Mr. Ernest Taylor has returned from a short visit in Little Rock, Arkansas.

Miss Melsena Goolsby is spending her vacation in Colorado. We hope she will have a nice time.

Your reporter Dotty Green celebrated her 17th birthday by giving a party at the Urban League. Those attending were: Joyce Williams, Freddie Powell, Ruby Harper, Dorothy Scott, Robbie Powell, Bobbie Cooke, Frank King, Leon Wilkins, Lavanda Hill, Billie Mosby, Frank Burden, and Ralph Wilson.

Bike riding Monday evening were Joyce Williams, Dorothy Green, Freddie Powell, Ruby Harper, and John Vaughn.

"Freddie," said the Sunday School teacher, "Can you tell me what we must do before we can expect forgiveness of sin?" "Yes sir," replied the boy, "we must sin."

Four girls of the 4-H Club, Dorothy Green, Iona Adams, Jeannette Vinegar and Ida Adkins, attended the 4-H demonstration day at Ag College June 13th.

Miss Cleo Shakespeare, niece of Rev. Shakespeare, came thru our fair city Monday afternoon. She had been attending a Y-teen conference in Omaha, Nebraska. She is from Kansas City, Mo., and was accompanied by two other girls.

Our city was certainly graced with a lovely group of young ladies and fellows last week attending the District Conference. You missed a treat if you didn't meet them.

Missionaries Cont. from page 5 ties in Africa which is quite enough and if we had additional money for missionary work, Africa is the field in which it could be most profitably invested. On the other hand, it is to be remembered that during the past 150 years this great nation has been under the heel of the British Empire and the relations developed between the two have not been on the basis of equality. If we are really interested in being more than mere platitudinous Christians, the Negro must be prepared to share the load in any section of the world within his income.

No nation in the world today is in need of fellowship more than India. This country is in need of a real social and religious revolution that would reorganize the structure of its domestic social order. India has been limited in her contacts with the colored races of the world and every race and nation truly interested in the cause of human freedom must assist her in achieving maturity. In many respects India is in need of help but it must not be presumed that the nation is backward.

This plan cannot be pursued successfully on a denominational basis. All churches would be required to pool their efforts to sustain a worthy program. This means that an overall missionary board representing all denominations would, be organized and placed in charge of this venture. With cooperation on local matters being very difficult to obtain, could our churches be expected to work jointly at this point? That will be the test of Negro church leadership.

Another very important point that must be faced is the integrity of the church leadership in administering a foreign program. Too often have many of our leaders been found lacking in administrative ability and plain honesty. If these practices are being followed, in national affairs, can these defects be remedied in international projects? Regardless to the outcome I am transmitting the proposal to the appropriate religious bodies and shall continue working for the fulfillment of this significant task. The final answer depends on the vision of those leaders responsible for the direction of the affairs of church among Negroes in America.

NO MATTER HOW WE TRY, WE CAN'T GET ALL THE NEWS... UNLESS... YOU FOLKS LET US KNOW WHAT'S GOING ON IN YOUR NEIGHBORHOOD.

TRAFFIC SAFETY

Penalties we pay for our accidents far exceed any of the benefits that we hoped to gain. A sign on one of our roads, "DRIVE 'CARFUL' THE WAGES OF SIN IS DETH'."

Infantile Paralysis

Infantile paralysis--often called polio--attacks few people; 20 cases per 100,000 population usually is considered an epidemic.

Half of all those who get the disease recover without crippling. Another fourth with good care crippling.

Deformities may be prevented and crippling lessened by prompt complete and sometimes prolonged medical care.

Summer is the chief danger period. If infantile paralysis comes to your community, follow these suggestions.--Call your doctor immediately if any of these

symptoms appear: headaches, nausea, a cold, upset stomach, muscle soreness or stiffness, unexplained fever. Infantile paralysis starts in many different ways, most of them just like a lot of other childhood diseases. Be on the safe side. avoid new contacts. Try not to mingle with crowds. Local health authorities decide whether schools and other gathering places may remain open. If you can help it, don't take children to public places where they mingle with strangers.

--Avoid new contacts. Try not to mingle with crowds. Local health authorities decide whether the schools and other gathering places may remain open. If you can help it, don't take children to public places where they mingle with strangers.

--Don't get overtired. Extreme fatigue makes you an easier victim. Too strenuous play, late hours, irregular schedules are possible invitations to attack by polio.

--keep clean. Wash hands before eating. Keep flies and other insects away from food. Don't leave garbage uncovered.

--Consult your family doctor as to the advisability of removal of tonsils and adenoids, or other mouth and throat surgery, during the usual epidemic months.

--Don't worry about expense, if your doctor says it's polio. Get in touch with the Chapter of the National Foundation for Infantile Paralysis nearest your home. The telephone book or your Health Department will furnish the address. Costs of treatment will be paid in whole or in part, if you can't pay them yourself. Few families even with substantial incomes, can meet the full cost.

--Be guided by sound medical advice. Do everything your doctor advises. Doctors agree that infantile paralysis can best be cared for in hospitals. There is no known cure for infantile paralysis. --Good medical care may prevent or correct some deformities. There will be some who are permanently paralyzed. Do not believe those who, for one reason or another, promise to cure these cases.
