

Dr. Shoop's Rheumatic Cure

Costs Nothing if It Fails.

Any honest person who suffers from Rheumatism is welcome to this offer. For years I searched everywhere to find a specific for Rheumatism. For nearly 20 years I worked to this end. At last, in Germany, my search was rewarded. I found a costly chemical that did not disappoint me as other Rheumatic prescriptions had disappointed physicians everywhere.

I do not mean that Dr. Shoop's Rheumatic Cure can turn bony joints into flesh again. That is impossible. But it will drive from the blood the poison that causes pain and swelling, and then that is the end of Rheumatism. I know this so well that I will furnish for a full month my Rheumatic Cure on trial. I cannot cure all cases within a month. It would be unreasonable to expect that. But most cases will yield within 30 days. This trial treatment will convince you that Dr. Shoop's Rheumatic Cure is a power against Rheumatism—a potent force against disease that is irresistible.

My offer is made to convince you of my faith. My faith is but the outcome of experience—of actual knowledge. I know what it can do. And I know this so well that I will furnish my remedy on trial. Simply write me a postal for my book on Rheumatism. I will then arrange with a druggist in your vicinity so that you can secure six bottles of Dr. Shoop's Rheumatic Cure to make the test. You may take it a full month on trial. If it succeeds the cost to you is \$5.50. If it fails the loss is mine and mine alone. It will be left entirely to you. I mean that exactly. If you say the trial is not satisfactory I don't expect a penny from you.

I have no samples. Any mere sample that can affect chronic Rheumatism must be drugged to the verge of danger. I use no such drugs for it is dangerous to take them. You must get the disease out of the blood. My remedy does that even in the most difficult, obstinate cases. It has cured the oldest cases that I ever met, and in all of my experience, in all of my 2,000 tests, I never found another remedy that would cure one chronic case in ten.

Write me and I will send you the book. Try my remedy for a month, for it can't harm you anyway. If it fails the loss is mine.

Address Dr. Shoop, Box 515, Racine, Wis. Mild cases not chronic are often cured by one or two bottles. At all druggists.

Remedy for constipation in children and adults, is bran tea, made by putting a handful of good, fresh bran in about a pint of boiling water and steeping it a few minutes. For an adult, a cupful of the bran water is not too much, and more will not hurt; take it regularly, for a week or more.

An excellent remedy for whooping cough is said to be a tea made by steeping sunflower seeds and sweetening to taste. I believe it is harmless, and no danger of drinking too much. Another remedy is powdered black rosin; give as much as will lie on a cent, in a little moistened sugar, three times a day, before meals.

Bulb Planting.

This is the month in which the florist sends out his gay-colored catalogue and when it reaches you, the sooner you make out a list of what you want and send it in, the better service you will get, and the finer bulbs. Late September or early October is the time for potting the Roman hyacinth for Christmas and New Year blooming, and later plantings may be made for a succession of bloom until Easter flowers are in demand. Except the Chinese Sacred Lily, no bulb forces so readily as the Roman hyacinth; the bulbs are inexpensive, grow readily, bloom freely, last longer on the plant, are of many shades of color, and are deliciously fragrant.

Narcissus are fine for forcing, and come into bloom very quickly; they should be treated the same as the hyacinth. Paper White, Von Sion and Double Roman are three of the most satisfactory for forcing. Paper White Narcissus will grow in a dish, with only water, and pebbles or shells to hold it in place. The Chinese Sacred Lily is of the narcissus family, and is

A CURE FOR ASTHMA

Asthma sufferers need no longer leave home and business in order to be cured. Nature has produced a vegetable remedy that will permanently cure Asthma and all diseases of the lungs and bronchial tubes. Having tested its wonderful curative powers in thousands of cases (with a record of 90 per cent. permanently cured, and desiring to relieve human suffering, I will send free of charge to all sufferers from Asthma, Consumption, Catarrh, Bronchitis and nervous diseases, this recipe in German, French or English, with full directions for preparing and using. Sent by mail. Address with stamp, naming this paper. W. A. Noyes, 247 Powers Block, Rochester, N. Y.

one of the easiest to grow, requiring only water, with pebbles to hold it in place. Generally, it comes into bloom in about four weeks after planting. The bulbs are cheap by the dozen, and it makes a lovely window plant, filling the room with fragrance; it is sure to bloom, under any reasonable treatment.

Bulbs of the Amaryllis family are more sure to bloom under disadvantages than any of the nearly allied lilies. One of the most satisfactory for house culture is the Johnsonii. If potted in ordinarily good garden soil, and put away to make roots, it may be brought to the light in January, and an established bulb will send up from one to half a dozen flower-stalks, each bearing from two to four large lily-like blossoms, red, with a white stripe down each petal. It will bloom about Easter time. The Queen Amaryllis is another satisfactory house plant, bearing beautiful red-gold blossoms. After done blooming, they must be kept growing until they show signs of wanting to rest, by the tips of the leaves dying, when watering must be gradually withheld, and when the leaves have all died down, put them in some cool place, leaving the bulb in the pot, until they again show signs of renewed growth. They will not bloom unless allowed their seasons of rest.

Query Box

E. S. B.—Linoleum is made with a mixture of ground cork, linseed oil and resin, and a pigment pressed on burlap between heated rollers. The patterns are painted on, after which it is varnished. Linoleum should not be washed with soap; a careful oiling will keep the appearance bright. A cheap grade of the material soon wears down.

Gracie.—The ferns found in the woods may be safely transferred to your garden, and will grow nicely if given conditions such as they had when you found them. Of course, they must have some shade, but need a good light.

Frolic.—I think you might find a "Book of Games" designed for Halloween amusement, by writing to some publishing house. I do not know of any just now. The literary periodicals will publish many Halloween features if you care to consult them.

Seamstress.—Plain-surfaced materials are given the preference for house gowns of heavy material. The circular flounced skirt is still worn; the new skirt differs from the one of last season only in the arrangement of the flounces, and not in the actual shape of the skirt.

Young Housewife.—I think "the woman who does her own work" is coming to the front rapidly. Indeed, they are given a great deal of attention in the best periodicals of the day, and it is regarded as a necessary accomplishment, now-a-days, to have a practical knowledge of housekeeping. Many of our best writers on housewifely subjects are women who are their own servants.

Walter.—If you will pour a little benzine on your soiled coat collar, and rub it briskly with a clean cloth, it will take off the soiled look. Do not use a white cloth, but have something the color of the coat. With a little practice, you can crease your own pants, and there are buttons now made for the pants which do not need sewing on.

Sister Annie.—An exchange says: "When silver ware gets tarnished, if it is washed in a pint of very hot water to which has been added one teaspoonful of aqua ammonia, rubbed with a soft brush and dried with a clean soft towel, then rubbed very dry with a chamoliz skin, it will become again very brilliant, and the polish will last much longer than when polished with powders."

Mrs. F. J.—For making pumpkin butter try this: Peel the pumpkin

and cut into small pieces, put into a cooking vessel with about a teacupful of water and cook slowly until it can be easily pierced with a fork; remove from the stove, mash, and drain in a colander. When the juice has been extracted from the pumpkin, boil it with good molasses or sugar (to sweeten to taste, on the stove; when this mixture begins to thicken, add the pumpkin. Stir into the pumpkin three tablespoonfuls of flour, a teaspoonful of salt, and flavor with ginger, if liked.

Mother.—Sugar is a heat-producer, and sweets may be used more plentifully in cold than in warm weather. Home-made candies are the best for the children, and are easily made of either sugar or molasses. A reasonable amount of candy will not hurt a child, and forenoon is a better time than evening in which to let them eat it. When eaten at night, a bad taste in the mouth and coated tongue is the usual result in the morning. Children should not eat much rich cake at any time.

Mental Science.

A correspondent asks: "What is Mental Science? Is Mental Science and Christian Science the same?"

Mental science and Christian science are not synonymous terms. As I understand it, mental science teaches that the soul, or mind, has absolute control over the body; that it can make the body it lives in obey its orders. Your thought, or auto-suggestion (suggestions to your self) as it is called, takes possession of your subjective mind, as we will say, which never tires or sleeps, but carries out the orders of the higher power. The auto-suggestion must be positive, and you must rely on it entirely. Many people do this who never heard of mental science. One goes to bed at night with the thought in his mind that he must awake at a certain hour in the morning; it may, for some special purpose, be an unusual hour; trusting entirely to his ability to do this, he goes to sleep, as usual, and, punctually to the desired moment, he awakens. The subjective mind, which receives the order from the Ego, and which never sleeps, awakens him.

When one is sick and determines in his own mind, as we say, that he will get well, any way, and leaves that determination undisturbed, trusting to the power within him to bring about this effect, he has great odds in his favor, and sometimes the influence is marvellous in its results. We know that the one who does not fear disease, generally escapes infection. Any physician will tell you that the hopeful, optimistic, resolute patient is the one that gets well. Mental healing, you may not doubt, that you are sick; that your pain is quite real, but your higher power says to your subjective mind: "It is nothing; you will get well of it soon," and if your faith in your own assertion is strong enough to shut out all doubt, you certainly have something in your favor. You must not forget that it was Christ who taught this faith cure. Repeated instances are given us in the Bible, both in the Old and in the New Testaments, where faith has triumphed over disease and danger. Perhaps you will say, not faith in one's self, but the higher Mind, which rules, ordered the body to do certain things, which should result as we believed.

There is doubtless a great deal in this matter: a great principle of truth back of it which the world is getting some little hold of. Mind certainly has a wonderful influence over matter, as all will agree; and some of our great thinkers claim that when the mind knows how to use its power, it can absolutely control the body. The main thing is to have faith in one's own self; to believe earnestly, to work hopefully, and to cultivate a strong faith in the ultimate mastery of Good over Evil. The "I can, and I will,"

a good doctrine to live by, not only in so far as it concerns the physical, but the moral, as well. Some call it will power, but, whatever it is, it is a good thing to have, and one should earnestly that "their faith fail not." "Wherefore didst thou doubt? Oh, thou of little faith."

Abraham's Tomb.

A dispatch to the Philadelphia Public Ledger under date of Chicago, September 8, says: President Harper has secured the consent of the sultan of Turkey to an exploration of the country in the vicinity of ancient Babylon, according to advices just received at the University of Chicago. This marks the successful issue of an attempt begun in July, 1900, when application was first made for university exploring parties to enter the district.

The place where the exploring parties will have special privileges is Tel Ibrahim, long regarded as a part of Babylon. In this vicinity are supposed to be the ruins of the temple in which Nebuchadnezzar offered sacrifices, and the explorers hope to find the tomb of Abraham.

President Harper met with the opposition of the German government, which was trying to secure excavating privileges in the same place.

IS YOUR STOMACH ON A STRIKE?

There is Nothing to Prevent You Employing a Substitute to Do Its Work

There is such a thing as forbearance ceasing to be a virtue even in the case of one's stomach. There is no question but that some stomachs will stand a great deal more wear and tear and abuse than others, but they all have their limit, and when that limit is reached, the stomach must be reckoned with as sure as fate. The best way and really the only effective way to treat your stomach when it rebels is to employ a substitute to do its work. This will give the weakened and worn-out organ an opportunity to rest and regain its strength and health.

Stuart's Dyspepsia Tablets relieve the stomach of its work by taking up the work and doing it just as one set or shift of workmen relieves another. They actually digest the food in just the same manner and just the same time as the digestive fluids of a sound stomach do. In fact, when dissolved in the stomach, they are digestive fluids for they contain exactly the same constituents and elements as the gastric juice and other digestive fluids of the stomach. No matter what the condition of the stomach is, their work is just the same. They work in their own natural way without regard to surrounding conditions.

The stomach being thus relieved by Stuart's Dyspepsia Tablets, is restored and renewed by Nature and the rest of the human body does not suffer in the least by reason of its failure to perform its work.

A Wisconsin man says: "I suffered the pangs of dyspepsia for 10 years. I tried every known remedy with indifferent results until I was told of the remarkable cures of Stuart's Dyspepsia Tablets. I bought a box, began taking them and forgot I had a stomach. Three boxes cured me completely. I have had no trouble whatever for a year and have an appetite like a harvest hand and can eat anything that is set before me without fear of bad results."

Stuart's Dyspepsia Tablets are for sale by all druggists at 50c a box. The druggist never fails to have them in stock because the demand for them is so great and so pronounced that he cannot afford to be without them. People who could not get them of one druggist would go to another and would get in the habit of buying their other drugs there as well as their Stuart's Dyspepsia Tablets.
