THE GERMAN STUDENTS
Drunkenness has of late been charged in England against the sth dents of the Universty of Oxford Of this charge Percival Farrar, an Ozford man, said in Detroti:
"Now and then young men drink too much at Oxford, but to accuse them generally of arunkenness is quite unpardonable and false.
"Such an accusation is to my mind absurd, like the accusation of idleness made against the students of the greai German umiversities.

Attendance at lectures is not com.

pulsory in Germany, and there are all sorts of yarns about the students' idleUss. They say that a young man in
Heidelberg once approacned another ieidelberg once appr
young man and asked:
"Where are the university buildlugs?

The second young man replied: student here myself.' "一MInneapolis 3ournal.

NOT OVERWORKED
A Manila newspaper prints this nore or less interestrog item: The night clerk at a local hotel nad posted a muchacno at the door of Mr. Bryan's room that the latter
might not be without quick service might not be without quick service at any hour of the night he mignt
cequire it. Twenty minutes later he heard footsteps on the stairs over head and there emerged into the light a bulky figure which proved to be that of the great orator.
"I should like some water to be sent o my room please," suggested Mr. Bryan.
come down, Mr. Bryan: why did to come down, Mr. Bryan; why did you
not send down the noy stationed at your door for that purpose?"
"Oh! the poor fellow was asleep and I thought perhaps he had been working hard all-day and I did not like to wake him."
"Easy!" growled the clerk as he made two steps at a Jump for the
 , the last boat came in five days ago."

## MAKING CITIZENS

That there is something wrong with the naturalization laws of the country is shown by an incieent that occurred at Des Moines last week. A large number of Greeks were before Judge McHenry to be naturalized. Their instructor had coached the men to answer "yes" to any and all questions that should be propounded. After asking numerous questions to which the men answered "Yes," the court said: "Are there any anarchists among you?" Immediately eame the reply, "Yes." Of course they were not anarchists, but their answer shows they had no real knowledge of what American citizenshíp means.-Cedar Rapids Gazette.

## KIND WORDS

Bryan's Commoner nas just entered its sixth year. It was predicted, shortly after The Commoner was launched, that it would be shortlived. The wish was father to the thought, and the prediction merely came from the camp of the opposition to aemocratic doctrine and tradition. There is a distinctive demand for The Commoner and that excellent journal will live to round out many more years of poItasca (Texas) Item.

MACHIAVELLIANISM IN AMERICA Miss Tarbell says "there has always been a trace of Machíavellianism in American life."
But of what people cannot this be said? The doctrine that every man is one of those devir's dogmas which obtain in all lands in all times, but never, has it laid hord with great power upon any of the great nations. -St. Louls Post-Dispatch.

KNEW THE DIFFERENCE
Mrs. Gaswell-Everybody says we ought to give Lottie a European tour, and I think so too. We want her to shine in society, don't we?
Mr. Gaswell--Shine? Huh! You know well enough we can afford to give her a real polish if we want to, and that costs twice as much.--Philadelphia Press.

## 

There is not a state in the Union in which Cream Separators have contributed more largely to dalrying and agricultural prosperity generally than in Nebraska.

The Nebraska Experiment Station has recently mede a very careful census of the number of Cream Separators in use in the State, which census shows 30,960 machines.

The State Experiment Station has been authority for the anofficial statement that from 80 per cent to 90 per cent of chese 30,960 separators were DE LAVAL.

10,000 machines will likely be added to the number in 1906, and it is safe to assume that 90 per cent of them will be DELAVAL.
Nebraska dairy farmers who have yet to buy separators may well profit by the overwhelming preponderance of example set by their fellow farmers who have already had separator experience.

The farmer who buys a DE LAVAL machine can surely make no mistake. The one who buys anything else must surely make some mistake-accoraing to the degrees of relative inferiority of the make of machine he may select,

The strong clinching argument above all else is that chere can be no possible excuse for any buyer taking chances with an inferior machine, since the DE LAVAL is not only best but actually the cheapest in proportion to actual capac ity, while if the buyer cannot take the benefit of cash discounts he can buy on such liberal terms that the machine will actually pay for itself.

Send for new 1906 catalogue and any desired information or particulars gladly supplied upon application.
